PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory
Source: Department of Environmental Protection
Telephone: 609-984-2243

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

New Jersey Public-Community Water-Supply Wells
Source: Department of Environmental Protection, Geological Survey
Telephone: 609-984-6587

New Jersey Ambient Ground Water Quality Network Data
Source: Department of Environmental Quality
Telephone: 609-984-6587
Ambient Groundwater Quality of the New Jersey Part of the Newark Basin. Natural groundwater quality in the Newark Basin summarize natural groundwater quality in sedimentary bedrock formations of the Newark basin part of the Piedmont physiographic province of New Jersey.

STORET Water Quality Monitoring Stations
Source: Department of Environmental Protection
Telephone: 609-984-6831
STORET maintains the locations of water quality monitoring stations from NJDEP's NJ STORET (Modernized) database. A station is a location at which a data collection event takes place, such a collection of a field sample, measurement of field parameters or evaluation of environmental habitats.

Water Well Permit Information
Source: Department of Environmental Protection
Telephone: 609-984-6831
Permits to drill wells. Once constructed, the driller must submit a well record document with the as-built description of the well. Drillers also submit a well abandonment report whenever a well has been decommissioned.

OTHER STATE DATABASE INFORMATION

RADON

State Database: NJ Radon
Source: Department of Environmental Protection
Telephone: 609-984-5425
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Prestige Env. Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

State Use Only

Tracking #	341555
Received Date	08/23/2023
Access Method	**Send Electronic copies**

All matters relating to the response and access of any records identified for this request should be directed to:

NJDEP – Office of Record Access
401 East State Street
PO Box 420 Mail Code 401-06Q
Trenton, New Jersey 08625-0420

Tele #: (609) 341-3121
Fax #: (609) 292-1177

Record Request Details:

I am conducting an environmental due diligence on the above referenced property and seek all identifiable remedial, permitting, compliance, and enforcement records.

Disposition Notes

Based on this record request,responsive records have been identified and available for access. Requester should contact the Office of Record Access at 609-341-3121 to schedule a file review, copies, or to obtain further information.

Addendum Disposition Notes: Based on this request, responsive records have been located. Please note that the request is very broad and does not define specific records and for that reason; the NJDEP is providing all remedial, permitting, compliance and enforcement records that were able to be identified based on your request from the various NJDEP Programs that have historically provided records in response to Environmental Phase I or Due Diligence (e.g. performing a Preliminary Assessment) requests.

If the an individual was specified above, the individual was DEP Licensed, please specify the license type the individual holds:	License Type:	

The New Jersey Department of Environmental Protection has responded to your submitted Open Public Records Act (OPRA) record request. The following information will help you understand the response and your next available actions.

Tracking #: This is the Department's assigned Tracking # to your OPRA record request, which should be used in all corresponding matters.

Record Request Response:

- **In Progress** – Based on the nature of the request, the records sought, and/or the manner to which the records may exists, the Department requires additional time to investigate and respond to the request.
- **Filled** – Based on the information provided in your request, the Department was able to investigate and respond to your record request.
- **Denied** – Based on the nature of the request and/or the records sought, the Department has denied your request pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.
- **Partial** – The Department has identified both responsive government records and records being denied based on the nature of the request and/or the records sought, that do not meet the definition of a government record pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.

Disposition Notes: Provides detailed information concerning the Department's response to your request.

Accessing Records: Dependent on the volume of records and your interest, there are five (5) methods available to access the responsive government records:

- **File Review** – Schedule a file review with the Department to directly access the records and take notes or tag records of interest for copying. Copying can be performed by either the Department's onsite Copying Unit at State duplication fee costs or by the requester employing a Copy Vendor Service. If there are records stored in archives, a five-day processing period will be included prior to scheduling a review.
- **Copy Request** – All records of interest will be copied by the Department's onsite Copying Unit at State duplication fee costs unless a Copy Vendor Service is employed.
- **Electronic Records Request** – Dependent on the size & nature of the e-records, the Department will email the records or provide a CD or DVD.
- **Fax Request** – Based on the number of pages, the Department faxes the responsive records.

Access to Government Records Under the New Jersey Open Public Records Act (N.J.S.A. 47:1A-1 et seq.)

- **Web Access** – The responsive records can be access directly through the Department's web site. Web address will be provided.

1. The fees for duplication of a government record are specified below. We will notify you of any special charges, special service charges or other additional charges authorized by State law or regulation before processing your request. Payment shall be made by check or money order payable to the State of New Jersey and mailed to the address specified below.

   Hard Copies: Letter & Legal size = $0.05 per page
   Oversized Maps (Color) = $5.00 per map
   Oversized Maps (B&W) = $3.00 per map

   Electronic Records: CDs = $0.55 per CD
   DVDs = $0.55 per DVD

2. Pursuant to OPRA (C.47:1A-5c & C47:1A-5d), the Department will apply special service charge for any extraordinary expenditure of time and effort to accommodate a request. The special service charge will be based on the actual direct cost of providing the records. The requester shall have the opportunity to review and object to the charge prior to it being incurred; however, in the event the requester objects to the special service charge, the request will be closed and access to the records will not be granted.

3. By law, the Department must notify you that it grants or denies a request for access to government records within seven business days after the custodian of the record requested receives the request, provided that the record is currently available and not in storage. If the record requested is not currently available or is in storage, the custodian will advise you within seven business days when the record can be made available and the estimated cost. You may agree with the custodian to extend the time for making records available, or granting or denying your request.

4. You may be denied access to a government record if your request would substantially disrupt agency operations and the custodian is unable to reach a reasonable solution with you.

5. If the Department was unable to comply with your request for access to a government record, the custodian will indicate the reasons for denial on the request form.

6. Except as otherwise provided by law or by agreement with the requester, if the custodian of the record requested fails to respond to you within seven business days of receiving a request form, the failure to respond will be considered a denial of your request.

7. **Resolution of Disputed Findings:**

   In the event that a requester does not agree with the Department's record response, the requester should:

   No Records - Reexamined the request details to evaluate if all of the information was provided that could aid the Department in locating records. The Department's ability to identify records of interest is in direct correlation to matching the Department information with the information provided on the request. Such important identifiers are Facility/Site Name, Address, Case #, Permit #, Block/Lot.

   Denial - If your request for access to a government record has been denied or unfilled within the time permitted by law, you have a right to challenge the decision by the Department to deny access. The Department denies access to records only when those records do not meet the definition of a government record and/or public access is not allowed pursuant to the law. At your option, you may either:

   a. Contact the Office of Record Access to re-visit the matter or provide further explanation.

   b. Institute a proceeding in the Superior Court of New Jersey

   c. File a complaint in writing with the Government Records Council (GRC). You may contact the GRC by toll-free telephone at 866-850-0511, by mail at PO Box 819, Trenton, NJ, 08625, by e-mail at *grc@dca.state.nj.us*, or at their web site at *www.state.nj.us/grc*. The Council can also respond to other questions about the law.

8. Information provided on this form may be subject to disclosure under the Open Public Records Act.

for reporting activities at an UST facility:

___ General Facility Information Changes
X Closure (Abandonment or Removal)
___ Temporary Closure
___ Change in Service
___ Sale or Transfer
___ Substantial Modification
___ Financial Responsibility
___ Address Change Only

Check ONLY One Type of Activity – Complete Form For That Activity

(More than one tank can be listed per activity)

*** * * NOTE * * * ALL NEW tank installations at existing registered facilities must submit a Registration Questionnaire for the new tanks.**

Answer questions 1 through 5 and others as applicable.

1. Company name and address (as it appears on registration questionnaire): NAVAL & MARINE CORPS RES CENTER
SCOTCH RD
TRENTON, NJ 08628-1895

2. Facility name and location (if different from above): _____

3. Contact person for this activity: SGT BRIAN SCHAFLE
Telephone Number: (609) 882 5133

4. The identification number of the affected tank as it appears in Question Number 12 on the Registration Questionnaire: 5 / 2 of 5

5. Registration Number (if known): UST - 0127086

6. For GENERAL FACILITY INFORMATION changes (address, telephone, contact person, etc. – supply NEW information only):

a. Facility name: MARINE CORPS RESERVE CENTER
b. Facility location: _____
c. Owner's mailing address: _____
_____
_____ NJ _____
_____
d. Block: _____ Lot: _____
e. Contact person (facility operator): SGT BRIAN SCHAFLE
f. Contact telephone number: (609) 882 - 5133
g. Other (Specify): _____

(OVER)

7. For CLOSURE (abandonment or removal – check all that apply):

a. ☐ Abandonment Date: ____/____/____ Case No: _____

Attach the necessary implementation schedule (3 copies) and all documentation needed for abandonment per N.J.A.C. 7:14B-9.1 (d).

b. ☒ Removal Date: 4 / 20 / 94 Case No. C93 5911

Attach the necessary implementation schedule (3 copies).

8. For CHANGES IN HAZARDOUS SUBSTANCES STORED (check all that apply):

a. ☐ Temporary Closure (12 month maximum time – see N.J.A.C. 7:14B-9.1(b)). Remove all hazardous substances; leave tank in place.

b. ☐ Change in service from a regulated substance to a non-regulated substance. Tank must be cleaned and site assessment performed per N.J.A.C. 7:14B-9.1(e).

c. ☐ Changes in service from one regulated hazardous substance to another regulated hazardous substance.

Tank No. _____ Old _____ New _____
Tank No. _____ Old _____ New _____
Tank No. _____ Old _____ New _____
(Attach additional sheets if more space is needed)

9. For TRANSFER OF OWNERSHIP: Effective Date: ____/____/____

a. New Owner (operator) _____

b. New Facility Name _____

_____

_____

_____ NJ _____

_____
County

c. Closing Attorney _____ Tele: (____) _____ - _____

10. For SUBSTANTIAL MODIFICATIONS (to include any retrofitted activity – e.g the addition of spill/overfill protection, monitoring systems, cathodic protection, etc.):

a. Type of Modification _____ Date: ____/____/____

b. * NOTE * Substantial modifications require a permit under N.J.A.C. 7:14B-10.

11. For changes in FINANCIAL RESPONSIBILITY to (check appropriate changes and attach copies of new information):

a. Policy Type: ☐
b. Policy Number: ☐
c. Other: ☐
d. Company/Carrier: ☐
e. Expiration Date: ☐

_____

_____

_____
(Specify)

NOTE: ALL appropriate and applicable permits, licenses and certificates required by the above activity(ies) from any local, state and/or federal agencies must be obtained separately from this notification.

CERTIFICATION

This registration form shall be signed by the highest ranking individual at the facility with overall responsibility for that facility (N.J.A.C. 7:14B-2.3 (a) 1).

"I certify under penalty of law that the information provided in this document is true, accurate and complete. I am aware that there are significant civil and criminal penalties for submitting false, inaccurate or incomplete information, including fines and/or imprisonment."

NOV 08 1989

Department of Environmental Protection
Attn: Underground Storage Tank Coordinator
Division of Water Resources
CN 029
Trenton, New Jersey 08625

Gentlemen:

In accordance with the provisions of Federal and State Law, Naval Marine Corps Reserve Center, West Trenton is submitting enclosures (1) and (2) in order to register its three underground storage tanks.

Present plans call for the removal of all tanks, replacing one with a substitute that meets both Federal and State regulations.

Prior to removal your office will be properly notified.

Sincerely,

Kevin J. McSpirit
Commanding Officer

Encl:

RE: Initial Registration Fee - Underground Storage Tank Program

Dear Underground Storage Tank Owner:

We are in receipt of your Underground Storage Tank Registration Questionnaire for:

Naval & Marine Corps Res Center
(Facility Name)
Scotch Road Mercer County
(Facility Address)
Airport West Trenton
Trenton, NJ. 086281395

Please be advised that as per N.J.A.C. 7:14B-3.2 an Initial Registration Fee of $100.00 must accompany every Underground Storage Tank registration submitted to this office as of December 21, 1988.

The above facility's registration (UST # 0187086) included NO // ~~INCORRECT fee~~. Please submit the required $100.00 fee (payable to: "Treasurer, State of New Jersey) no later than 30 calendar days from receipt of this letter. Use of the enclosed return envelope will expedite processing. NOTE: FAILURE TO SUBMIT THIS FEE MAY RESULT IN ENFORCEMENT ACTION AGAINST THIS FACILITY.

Questions may be directed to the UST Hotline at 1-800-722-TANK.

Your cooperation in expediting this request will be appreciated. Thank you.

Enclosures:

Respectfully,

Rob Nugent, Acting Section Chief
Registration and Billing Section
Bureau of Underground Storage Tanks

Site Assessment
UST Number 0187086
TMS Numbers C93-5911 & C93-5912
Marine Corp. Reserve Center
Mercer County Airport
West Trenton, New Jersey

Dear Mr. Patel:

On May 27, 1994, JMT Environmental Technologies Incorporated (JMT) hand delivered the prime contractor for this project four (4) copies of the completed Underground Storage Tank Site Assessment Report. Enclosed in the package to the prime contractor and Department of the Navy was the Standard Reporting Form (SRF) which was to have an updated signature and was to be forwarded to your office to document the proper closure and removal of the three (3) tanks for this project. The prime contractor has informed JMT on numerous occasions that the Department of the Navy does have originals and copies of the reports in house. It is our understanding that to date, the SRF and Site Assessment Report have not been submitted to your office. Since JMT was completing the closure and removal of these UST's and the Site Assessment Report; JMT would like to have in-house and NJDEP letter documentation that the delay for submittal of the proper notifications and reports is not due to our organization. This letter is being sent to document that JMT has provided (in completion) the proper number of copies to the prime contractor and Department of the Navy. We respectfully request that any correspondence regarding this issue be carbon copied and forwarded to our office.

MR. HASMIK PATEL/NJDEP

We trust that the information provided in this letter is sufficient for your file. If you have any questions, please feel free to contact me at (610) 759-0200 if you need to discuss this issue further.

Very truly yours,

JMT ENVIRONMENTAL TECHNOLOGIES INCORPORATED

Subject: Deficiency in Closure Plan Approval Application
Marine Corp. Reserve Center
West Trenton

UST # 0187086
TMS # C93-5911, C93-5912

Dear Sir,

On Nov. 24, 1993 the New Jersey Department of Environmental Protection (the Department) received an "Underground Storage Tank Closure Approval Application" for the above referenced facility. This application details the procedures to be implemented as required by the Underground Storage Tank Systems Technical Requirements and Procedures of N.J.A.C. 7:14B-9 et seq.

A review of the information submitted indicates the following deficiencies:

1. Standard Reporting Form (SRF)

A.___ SRF not supplied - (blank SRF attached)
B.___ Form not signed / dated by Owner/Operator
C.___ Other

2. Closure Plan Approval Application (CPAA)

A.___ CPAA not supplied - (blank CPAA form attached)
B.___ Size of UST's / contents not indicated
C.___ CPAA not signed / dated
D.___ Activity not indicated
E.✓ Fee incorrect - Please submit a check for $50.00, Payable to "Treasurer, State of NJ".
F.___ Tank Decommissioning Plan not complete / not submitted
G.___ Implementation Schedule not complete / not submitted
H.___ Other

3. Abandonment

A.___ Abandonment justification not complete / not submitted.
B.___ Form not properly signed / certified by Professional Engineer
C.___ Other

5. Site Assessment

A.___ Site Assessment not submitted
B.___ Site Assessment incomplete
i. ___ Site plan not submitted
ii. ___ Piping assessment not indicated
iii. ___ Tank locations not indicated on Site Plan
iv. ___ Scale not indicated on Site Plan
v. ___ Location of wells is inappropriate / not indicated
vi. ___ Number of wells is insufficient / not indicated
vii. ___ Screening of excavation not indicated
viii.___ Number of soil samples is insufficient
ix. ___ Improper chemical analysis of water / soil
x. ___ Other

Comments

The above noted deficiencies should be corrected and submitted to the undersigned at the above address, within 30 days of the date of this letter. Please include a copy of this letter to expedite processing. Failure to comply with this letter will result in disapproval of your CPAA, in accordance with N.J.A.C. 7:14B - 9.2(b). Disapproved CPAA's will be returned and fees forfeited. Any closure activities begun without a valid Closure Approval may be subject to fines and penalties in accordance with N.J.S.A. 58:10A-10.

If you have any question, please contact Hasmukh Patel of my staff at (609) 984-3156.

Sincerely,

Lynne Mitchell, Supervisor
Bureau of Applicability and Compliance

UNDERGROUND STORAGE TANK CLOSURE PLAN APPROVAL APPLICATION

Under the provisions of the Underground Storage of Hazardous Substances Act in accordance with N.J.A.C. 7:14B-9 et seq.

This application form shall be used by all applicants who plan to close Underground Storage Tank Systems pursuant to N.J.A.C. 7:14B-9 et seq.

INSTRUCTIONS:

- *Before completing application form please refer to the attached Application Instruction Sheet.*
- *Please print legibly or type.*
- *Fill in all appropriate blanks. This application form requires that additional sheets be attached for some of the information requested. You may call the Bureau of Underground Storage Tanks/Tank Management Section (609/984-3156) for assistance.*
- *Return one original of this form (including all attachments required) and a copy of the complete Standard Reporting Form (SRF) to the address above. You must sign all forms as required and attach a check for the proper fee (see the fee schedule on Page 3). Make check payable to the Treasurer, State of New Jersey.*
- *If the subject facility is not registered the Closure Plan will not be approved.*
- *Please Note: Make sure that all required informaiton on the Standard Reporting Form (SRF) is submitted. The SRF and this Closure Plan Application must be submitted together.*

Date of Application NOVEMBER 15, 1993

FACILITY REGISTRATION #

NO. 0187086

I. FACILITY NAME AND ADDRESS

MARINE CORP. RESERVE CENTER

SCOTCH ROAD
MERCER COUTNY AIRPORT
WEST TRENTON, NEW JERSEY MERCER

Telephone No. (215) 441-1645
CONTACT PERSON: LT. FRATTARELLI

11-24-93
TMS# C935911
C935912
$290.00

II. THIS CLOSURE [illegible]N IS FOR:

A. Substance stored in subject tank(s):

1. Petroleum Products

Indicate Type of Product E1, E2, HEATING OIL #2 E3 WASTE OIL
(Write out product name;, e.g.)

a. Gasoline, Jet Fuel, or Kerosene
b. Heating Oil (#2, 4, 6), or Diesel
c. Waste Oil (Please indicate total storage capacity of waste oil at the facility (including the tank(s) being closed)) 5,000 gals.

2. Hazardous Substances other than Petroleum Products *(Describe)*

Indicate Type of Product _____
(Write out product name; add sheet if necessary.)

B. Type of Activity: *(Circle one)*

1. Abandonment of Tank(s)

Attach the closure plan for abandonment, as required by N.J.A.C. 7:14B-9.2(b) or 9.3(b), which must contain the following items:

a. Implementation schedule (3 copies per N.J.A.C. 7:14B-9.2(a)3)
b. Site assessment plan
c. Tank decommissioning plan
d. A site map
e. Attach all justification for abandonment-in-place as required by N.J.A.C. 7:14-9.1(d). Attach the certification statement (on the back page) for abandonment-in-place, if applicable.

2. Removal of Tank(s)

Attach the closure plan for removal as required by N.J.A.C. 7:14B-9.2(b) or 9.3(b). The following items must be included:

a. Implementation schedule (3 copies)
b. Site assessment plan
c. Tank decommissioning plan
d. A site map

3. Temporary Closure

Indicate which situation applies and attach appropriate documentation.

a. ____ Temporary closure for 12 months or less is subject to requirements of N.J.A.C. 7:14B-9.1(a).

b. ____ Requesting an extension of temporary closure for more than 12 months per N.J.A.C 7:14B-9.1(b) must perform site assessment and submit results.

4. Change in Service

Attach documentation that the tank system being changed from the storage of a regulated to a non-regulated substance has been emptied and cleaned and that a site assessment has been performed, as required by N.J.A.C. 7:14B-9.1(e).

III. FEE SCHEDULE

Check the activit elow that apply, calculate the Total Fee a bmit that amount with this applicatio Make checks pa to Treasurer, State of New Jersey. F schools and religious and charitab e institutions are exempt form the fees. The owner or operator shall submit a separate fee for each excavation where an activity occurs.

A.	Activities Which Require a Site Assessment	2	$ 120.00
	1. Removal or Abandonment without exemption to site assessment requirement		
	2. Change in service from a regulated substance to a non-regulated substance		
	3. Extension of period of Temporary Closure		
B.	Activities Not Requiring a Site Assessment		$ 80.00
	1. Removal or abandonment with valid exemption		
C.	Additional Activities		
	1. Change in service from one regulated substance to another regulated substance		NO FEE

APPLICATION REVIEW FEE (activities in A, B, C) + $ 50.00

TOTAL FEE DUE $ 290.00

IV. THE BUREAU OF UNDERGROUND STORAGE TANKS WILL REVIEW THE CLOSURE PLAN FOR COMPLETENESS AND APPROPRIATENESS AS SPECIFIED IN SUBCHAPTER 9 OF THE UST REGULATIONS. PLAN APPROVAL WILL INDICATE THAT THE OWNER OR OPERATOR MAY PROCEED WITH THE CLOSURE. FINAL APPROVAL OF THE CLOSURE IS NOT IMPLIED. ALL APPROPRIATE AND APPLICABLE PERMITS, LICENSES AND CERTIFICATES REQUIRED FOR ANY OF THE ABOVE ACTIVITIES FROM ANY LOCAL, STATE AND/OR FEDERAL AGENCIES MUST BE OBTAINED SEPARATELY FROM THIS APPLICATION.

THE SITE ASSESSMENT SAMPLING AND ANALYTICAL REQUIREMENTS WILL BE SENT WITH THE APPROVAL TO PROCEED.

NOTE: Notice of Approval to Proceed or Disapproval will be mailed to the facility address unless some other address is specified here.

AMERICAN INDUSTRIAL MARINE SERVICES, Inc.
440 ALLENTOWN DRIVE
ALLENTOWN, PA 18105

SIGNATURE OF CONTACT PERSON

This application form must be signed by a contact person of the owner or operator of the subject facility. The contact person should have overall knowledge of tank decommissioning procedures and the site assessment requirements applicable to the tank closure which is the subject of this application.

STANDARD REPORTING FORM
for reporting activities at an UST facility:

____ General Facility Information Changes	____ Sale or Transfer
XXX Closure (Abandonment or Removal)	____ Substantial Modification
____ Temporary Closure	____ Financial Responsibility
____ Change in Service	____ Address Change Only

Check ONLY One Type of Activity – Complete Form For That Activity

(More than one tank can be listed per activity)

*** * * NOTE * * * ALL NEW tank installations at existing registered facilities must submit a Registration Questionnaire for the new tanks.**

Answer questions 1 through 5 and others as applicable.

1. Company name and address (as it appears on registration questionnaire):
   OIC, NAVAL CONTRACTS
   NAVAL AIR WARFARE CENTER, CODE 064
   POST OFFICE BOX 5152
   WARMINSTER, PA 18974-0591

2. Facility name and location (if different from above):
   NAVAL AND MARINE CORP. RESERVE CENTER
   SCOTCH ROAD
   MERCER COUNTY AIRPORT
   WEST TRENTON, NEW JERSEY 08628-1395

3. Contact person for this activity:
   LT. FRATTARELLI
   Telephone Number: (215) 441-1645

4. The identification number of the affected tank as it appears in Question Number 12 on the Registration Questionnaire:
   E-1, E-2, E-3

5. Registration Number (if known): UST - 0187086

6. For GENERAL FACILITY INFORMATION changes (address, telephone, contact person, etc. -- supply NEW information only):

   a. Facility name: _____
   b. Facility location: _____
   c. Owner's mailing address: _____
   _____
   _____ NJ _____
   _____
   d. Block: _____ Lot: _____
   e. Contact person (facility operator): LT. FRATTARELLI (FOR CLOSURE PURPOSES)
   f. Contact telephone number: (215) 441 - 1645
   g. Other (Specify): _____

(OVER)

7. For CLOSURE (abandonment or removal – check all that apply):
   a. ☐ Abandonment

      Attach the necessary implementation schedule (3 copies) and all documentation needed for abandonment per N.J.A.C. 7:14B-9.1 (d).
   b. ☒ Removal

      Attach the necessary implementation schedule (3 copies).

8. For CHANGES IN HAZARDOUS SUBSTANCES STORED (check all that apply):
   a. ☐ Temporary Closure (12 month maximum time – see N.J.A.C. 7:14B-9.1(b)). Remove all hazardous substances; leave tank in place.
   b. ☐ Change in service from a regulated substance to a non-regulated substance. Tank must be cleaned and site assessment performed per N.J.A.C. 7:14B-9.1(e).
   c. ☐ Changes in service from one regulated hazardous substance to another regulated hazardous substance.

      Tank No. _____ Old _____ New _____
      Tank No. _____ Old _____ New _____
      Tank No. _____ Old _____ New _____

      (Attach additional sheets if more space is needed)

9. For TRANSFER OF OWNERSHIP:
   a. New Owner (operator) _____
   b. New Facility Name _____

      _____

      _____ NJ _____

      _____

      County
   c. Closing Attorney _____ Tele: (____) _____ – _____

10. For SUBSTANTIAL MODIFICATIONS (to include any retrofitted activity – e.g. the addition of spill/overfill protection, monitoring systems, cathodic protection, etc.):
    a. Type of Modification _____
    b. * NOTE * Substantial modifications require a permit under N.J.A.C. 7:14B-10.

11. For changes in FINANCIAL RESPONSIBILITY to (check appropriate changes and attach copies of new information):
    a. Policy Type: ☐
    b. Policy Number: ☐
    c. Other: ☐
    d. Company/Carrier: ☐
    e. Expiration Date: ☐

    _____

    _____

    _____

    (Specify)

NOTE: ALL appropriate and applicable permits, licenses and certificates required by the above activity(ies) from any local, state and/or federal agencies must be obtained separately from this notification.

CERTIFICATION

This registration form shall be signed by the highest ranking individual at the facility with overall responsibility for that facility (N.J.A.C. 7:14B-2.3 (a) 1).

"I certify under penalty of law that the information provided in this document is true, accurate and complete. I am aware that there are significant civil and criminal penalties for submitting false, inaccurate or incomplete information, including fines and/or imprisonment."

DATE	ACTIVITY
12/30/93	Receive tank closure plan approval notice from NJDEPE/BUST.
01/03/94	Receive local township permit(s) for the tank removal.
01/05/94	Commence tank removal activities.
01/12/94	Complete tank removals & disposal of tank contents and remove tanks off site.
01/26/94	Receive post-excavation sampling results. Backfilling will be scheduled providing that the analytical results are acceptable (within the NJDEPE/BUST action limits for each analytical parameter). Should residual contamination concentrations be deemed unacceptable, a revised schedule will be provided to allow for additional excavation, collection of additional post-excavation soil samples, sample analyses, and remediation.
01/27/94	Backfill tank excavation with clean fill material.
02/07/94	Submit Standard Reporting Form.
04/27/94	Submittal of tank closure report to NJDEPE/BUST.

TANK DECOMMISSIONING PLAN

Marine Corp. Reserve Center
Scotch Road
Mercer County Airport
West Trenton, New Jersey

UST No. 0187086
Tank No. E-1
Tank No. E-2
Tank No. E-3

Product Stored: E-1 & E-2 Heating Oil
Product Stored: E-3 Waste Oil

The removal of two (2) 10,000 gallon tank heating oil and one (1) 5,000 gallon waste oil underground storage tanks (USTs) at the above referenced facility will be performed by American Industrial Marine Services, Inc. (American Industrial) of Allentown, Pennsylvania. The tank removal will be performed in accordance with all applicable federal, state, and local rules, regulations, procedures and guidelines, including, but not limited to the following:

N.J.A.C. 5.23	- New Jersey Uniform Construction Code
API Bulletin 1604	- Removal and Disposal of Used Underground Petroleum Storage Tanks.
API Bulletin 2015	- Cleaning Petroleum Storage Tanks.
NFPA Bulletin 329	- Recommended Practice for Handling Underground Leakage of Flammable and Combustible Liquids.
40 CFR Parts 280 and 281	- Underground Storage Tanks; Technical Requirements and State Program Approval; Final Rules.

The removal of the tank will proceed as follows:

1. Concrete pads, asphaltic pavement, and/or overburden soil will be removed from around the tank using jackhammers (when necessary) and excavating equipment (i.e. excavator/backhoe). The concrete will be recycled. Suspect contaminated soil will be stockpiled on and securely covered with six mil poly-sheeting.

2. The fuel dispensing pump (if any) will be disconnected and properly disposed of.

3. Suction and return piping will be flushed back to the tank to remove residual product.

4. Residual tank contents will be removed by direct loading into a vacuum truck.

5. The tanks will be tested for oxygen content and explosion potential (if any); if any tank exhibits unacceptable or inadequate oxygen content, it will be allowed to aerate, and will be re-tested.

6. Once an acceptable environment for tank entry is achieved, access holes will be cut into the tanks using a pneumatic air chisel and the tanks will be entered wearing appropriate personnel protection equipment.

7. The tank interior will be cleaned of all residuals and disposed of properly.

8. The tank contents and cleaning material will be transported to a proper disposal facility.

9. The piping associated with the tanks will be removed.

10. All inaccessible piping will be flushed clean, cut, and hydraulically cemented.

11. The cleaned tanks and piping will be loaded onto a flatbed trailer and transported for disposal as scrap metal.

12. Should contaminated soil be encountered, the tank excavation will be expanded laterally as site constraints permit and vertically to the water table (in a safe manner). Contaminated soil will be stockpiled on and securely covered with poly/plastic sheeting pending disposal.

13. The excavation will be backfilled immediately to several inches above the soil/groundwater interface with coarse stone; the excavation will be cordoned off with high visibility fencing until final backfilling can proceed.

14. The NJDEPE/BUST section will be notified to discuss remediation alternatives.

SITE ASSESSMENT PLAN

Marine Corp. Reserve Center
Scotch Road
Mercer County Airport
West Trenton, New Jersey

UST No. 0187086
Tank No. E-1
Tank No. E-2
Tank No. E-3

Product Stored: E-1 & E-2 Heating Oil # 2
Product Stored: E-3 Waste Oil

The site assessment for these tanks will include the collection of six soil samples (per tank) and one soil sample for every 15 feet of piping. The soil samples will be collected at the sides and ends, along the centerline of the tank outline in native soil under the tank. Each soil sample (for the heating oil USTs) will be analyzed for total petroleum hydrocarbons (TPHCs) by USEPA Method Number 418.1. If the TPHC concentration level is less than or equal to 1,000 parts per million (ppm), no further action will be required. If the soil samples exhibit TPHC levels above 1,001 ppm, American Industrial will remediate below 1,000 ppm TPHC, if site conditions permit, or analyze 25 percent of the samples with the highest (>1,001 ppm) TPHC levels for volatile organics with a forward scan (VOA+15) and xylene by USEPA Method 8240. The 5,000 gallon waste oil UST soil samples will be analyzed for Volatile Organics plus 10 peaks and xylenes (VO+10/xylenes), TPHC, Base Neutrals plus 15 peaks (BN+15), PCBs, and thirteen Priority Pollutant Metals with a library scan by USEPA Method Numbers 8240, 418.1, 8270, and SW-846 ICP 6010 (for soil), respectively. Soil samples will be collected in accordance with the procedures set forth in the NJDEPE May 1992 Field Sampling Procedures Manual. An aqueous field blank will also be collected during sampling as a Quality Assurance/Quality Control (QA/QC) measure. The field blank will be sent to the New Jersey certified laboratory along with the post-excavation soil samples and analyzed for the appropriate parameters.

The removal of contaminated soil to acceptable levels will be determined by field observations and field monitoring equipment (i.e. OVA or HNu). Post-excavation samples will be collected once contaminated soil is believed to have been

excavated to acceptable concentrations.

If initial post-excavation analytical results are not acceptable, additional soil excavation will be performed. A second round of post-excavation samples will be collected at locations along the margins of the expanded excavation. These samples will be analyzed for those parameters which were present at unacceptable levels in the first round of sampling.

The excavation will be backfilled upon receipt of acceptable post-excavation sample results.

UST Closure Plan

Dear Sir/Madam:

Enclosed, please find one original and three copies of the required Underground Storage Tank (UST) Closure Plan for approval by the New Jersey Department of Environmental Protection and Energy, Bureau of Underground Storage Tanks (NJDEPE/BUST). The required fee of $290.00 for the Site Assessment and Department Review is also enclosed with the Closure Plan for two 10,000 gallon heating oil USTs and one 5,000 gallon waste oil UST (UST No. 0187086 Tank Nos. E-1, E-2, & E-3) at the Marine Corp. Reserve Center (Mercer County Airport) located at Scotch Road, West Trenton, New Jersey.

We trust that the attached maps are satisfactory for your needs. If you wish to discuss the enclosed material further or if you need additional information, please feel free to contact me at American Industrial Marine Services Incorporated at your earliest convenience (215) 432-5400.

Very truly yours,

Record Request Details:

I am conducting an environmental due diligence on the above referenced property and seek all identifiable remedial, permitting, compliance, and enforcement records.

Disposition Notes

Based on this record request,responsive records have been identified and available for access. Requester should contact the Office of Record Access at 609-341-3121 to schedule a file review, copies, or to obtain further information.

Addendum Disposition Notes: Based on this request, responsive records have been located. Please note that the request is very broad and does not define specific records and for that reason; the NJDEP is providing all remedial, permitting, compliance and enforcement records that were able to be identified based on your request from the various NJDEP Programs that have historically provided records in response to Environmental Phase I or Due Diligence (e.g. performing a Preliminary Assessment) requests.

Information Regarding the Requested Records		
If your request is in reference to a single facility, please provide the name of the facility, and the name of the operator name of the facility:	Facility Name: **Mercer Armory & OMS** Operator Name:	
Please provide the owner name the facility or parcel of land:	Owner Name:	
If your request is in reference to a specific parcel of land, please provide the street address, block, lot and property owner of the parcel of land: (Note: if the property in question is over multiple blocks and lots, please list all in the description field below)	Street Address 1: **Scotch Road** Street Address 2: Block: **373** Lot: **9.01**	
If your request is in reference to a facility, site or parcel of land, please provide the Municipality and County where the facility, site or parcel of land is located:	County: **Mercer** Municipality: **Ewing Twp**	
If the request is in reference to a particular permit issued by NJDEP, please provide the type of permit and any identifying numbers such as permit, incident or case numbers. (i.e. Fishing, Hunting, Hazardous Waste, Solid Waste, Land Use, NJPDES, Pesticides, Stream Encroachment, TWA, UST, Water Allocation)	List Permit Type:	List ID Numbers: **000671**
If your request is in reference to an individual, please provide the individual's name and type, and if the individual is a DEP employee, your relationship with the individual:	Individual's name: Type of Individual: Relationship:	
If the an individual was specified above, the individual was DEP Licensed, please specify the license type the individual holds:	License Type:	

The New Jersey Department of Environmental Protection has responded to your submitted Open Public Records Act (OPRA) record request. The following information will help you understand the response and your next available actions.

Tracking #: This is the Department's assigned Tracking # to your OPRA record request, which should be used in all corresponding matters.

Record Request Response:

- **In Progress** – Based on the nature of the request, the records sought, and/or the manner to which the records may exists, the Department requires additional time to investigate and respond to the request.
- **Filled** – Based on the information provided in your request, the Department was able to investigate and respond to your record request.
- **Denied** – Based on the nature of the request and/or the records sought, the Department has denied your request pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.
- **Partial** – The Department has identified both responsive government records and records being denied based on the nature of the request and/or the records sought, that do not meet the definition of a government record pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.

Disposition Notes: Provides detailed information concerning the Department's response to your request.

Accessing Records: Dependent on the volume of records and your interest, there are five (5) methods available to access the responsive government records:

- **File Review** – Schedule a file review with the Department to directly access the records and take notes or tag records of interest for copying. Copying can be performed by either the Department's onsite Copying Unit at State duplication fee costs or by the requester employing a Copy Vendor Service. If there are records stored in archives, a five-day processing period will be included prior to scheduling a review.
- **Copy Request** – All records of interest will be copied by the Department's onsite Copying Unit at State duplication fee costs unless a Copy Vendor Service is employed.
- **Electronic Records Request** – Dependent on the size & nature of the e-records, the Department will email the records or provide a CD or DVD.
- **Fax Request** – Based on the number of pages, the Department faxes the responsive records.

Access to Government Records Under the New Jersey Open Public Records Act (N.J.S.A. 47:1A-1 et seq.)

- **Web Access** – The responsive records can be access directly through the Department's web site. Web address will be provided.

1. The fees for duplication of a government record are specified below. We will notify you of any special charges, special service charges or other additional charges authorized by State law or regulation before processing your request. Payment shall be made by check or money order payable to the State of New Jersey and mailed to the address specified below.

   Hard Copies: Letter & Legal size = $0.05 per page
   Oversized Maps (Color) = $5.00 per map
   Oversized Maps (B&W) = $3.00 per map

   Electronic Records: CDs = $0.55 per CD
   DVDs = $0.55 per DVD

2. Pursuant to OPRA (C.47:1A-5c & C47:1A-5d), the Department will apply special service charge for any extraordinary expenditure of time and effort to accommodate a request. The special service charge will be based on the actual direct cost of providing the records. The requester shall have the opportunity to review and object to the charge prior to it being incurred; however, in the event the requester objects to the special service charge, the request will be closed and access to the records will not be granted.

3. By law, the Department must notify you that it grants or denies a request for access to government records within seven business days after the custodian of the record requested receives the request, provided that the record is currently available and not in storage. If the record requested is not currently available or is in storage, the custodian will advise you within seven business days when the record can be made available and the estimated cost. You may agree with the custodian to extend the time for making records available, or granting or denying your request.

4. You may be denied access to a government record if your request would substantially disrupt agency operations and the custodian is unable to reach a reasonable solution with you.

5. If the Department was unable to comply with your request for access to a government record, the custodian will indicate the reasons for denial on the request form.

6. Except as otherwise provided by law or by agreement with the requester, if the custodian of the record requested fails to respond to you within seven business days of receiving a request form, the failure to respond will be considered a denial of your request.

7. **Resolution of Disputed Findings:**

   In the event that a requester does not agree with the Department's record response, the requester should:

   No Records - Reexamined the request details to evaluate if all of the information was provided that could aid the Department in locating records. The Department's ability to identify records of interest is in direct correlation to matching the Department information with the information provided on the request. Such important identifiers are Facility/Site Name, Address, Case #, Permit #, Block/Lot.

   Denial - If your request for access to a government record has been denied or unfilled within the time permitted by law, you have a right to challenge the decision by the Department to deny access. The Department denies access to records only when those records do not meet the definition of a government record and/or public access is not allowed pursuant to the law. At your option, you may either:

   a. Contact the Office of Record Access to re-visit the matter or provide further explanation.

   b. Institute a proceeding in the Superior Court of New Jersey

   c. File a complaint in writing with the Government Records Council (GRC). You may contact the GRC by toll-free telephone at 866-850-0511, by mail at PO Box 819, Trenton, NJ, 08625, by e-mail at *grc@dca.state.nj.us*, or at their web site at *www.state.nj.us/grc*. The Council can also respond to other questions about the law.

8. Information provided on this form may be subject to disclosure under the Open Public Records Act.

Mr. Frank Kirby
Chief, Environmental Management Bureau
New Jersey Department of Military and Veterans Affairs
101 Eggerts Crossing Road
Lawrenceville, New Jersey 08648

Re: Response Action Outcome
Remedial Action Type: *Unrestricted Use*
Scope of Remediation: *Areas of Concern:* (Tank E3 and Tank E5) *and no other areas*
Case Name: West Trenton Army Aviation Support Facility
Address: Scotch Road
Municipality: Ewing
County: Mercer
Block: 373 **Lot:** 9
Preferred ID: 000671

Dear: Mr. Kirby:

As a Licensed Site Remediation Professional authorized pursuant to N.J.S.A. 58:10C to conduct business in New Jersey, I hereby issue this Response Action Outcome for the remediation of the areas of concern specifically referenced above. I personally reviewed and accepted all of the referenced remediation and based upon this work, it is my professional opinion that this remediation has been completed in compliance with the Administrative Requirements for the Remediation of Contaminated Sites -N.J.A.C. 7:26C-6.2(c), that is protective of public health, safety and the environment and full payment has been made for all Department fees and oversight costs pursuant to N.J.A.C.7:26C-4.

This remediation includes the completion of a Site Investigation as defined pursuant to the Technical Requirements for Site Remediation (N.J.A.C. 7:26E).

My decision in this matter is made upon the exercise of reasonable care and diligence and by applying the knowledge and skill ordinarily exercised by licensed site remediation professionals in good standing practicing in the State at the time these professional services are performed.

As required pursuant to N.J.A.C. 7:26C - three electronic copies of all records related to the remediation activities that occurred at this location is being simultaneously filed with the New Jersey Department of Environmental Protection (Department). These records contain all information upon which the decision was based to issue this Response Action Outcome.

By operation of law a Covenant Not to Sue pursuant to N.J.S.A. 58:10B-13.2 applies to this remediation. The Covenant Not to Sue is subject to any conditions and limitations contained herein. The Covenant Not to Sue remains effective only as long as the real property referenced above continues to meet the conditions of this Response Action Outcome.

3 AAA Drive, First Floor, Hamilton, NJ 08691 p | 609.584.5271 f | 609.584.7498

CONDITIONS

Pursuant to N.J.S.A. 58:10B-12o, the New Jersey Department of Military and Veterans Affairs and any other person who is liable for the cleanup and removal costs, and remains liable pursuant to the Spill Compensation and Control Act, N.J.S.A. 58:10-23.11 et seq. shall inform the Department in writing, on a form available from the Department, within 14 calendar days of when its name or address changes. Any notices you submit pursuant to this paragraph shall reference the above case numbers and shall be sent to: New Jersey Department of Environmental Protection, Bureau of Case Assignment and Initial Notice – Case Assignment Section, P.O. Box 434, Trenton, N.J. 08625.

In concluding that this remediation has been completed, I am offering no opinions concerning whether either primary restoration (restoring natural resources to their pre-discharge condition) or compensatory restoration (compensating the citizens of New Jersey for the lost interim value of the natural resources) has been completed.

Pursuant to N.J.S.A. 58:10C-25, the Department may audit this Response Action Outcome and associated documentation up to three years following issuance. Based on a finding by the Department that a Response Action Outcome is not protective of public health, safety and the environment, the Department can invalidate the Response Action Outcome. In addition, a Department audit following issuance of this document may be initiated at any time if: a) undiscovered contamination is found that should have been addressed by the Response Action Outcome, b) if the Licensed Site Remediation Professional Board conducts an investigation of the Licensed Site Remediation Professional issuing the Response Action Outcome or, c) if the license of that person is suspended or revoked.

Thank you for your attention to these matters. If you have any questions, please contact me at (609)584-5271 extension 490.

Sincerely,

Richard A. Jasaitis,
Licensed Site Remediation Professional #575610

UNDERGROUND STORAGE TANK FACILITY CERTIFICATION QUESTIONNAIRE

Date Stamp (For Department use only)

Completion of this UST Facility Certification Questionnaire will satisfy the registration requirements of the Underground Storage of Hazardous Substances Act, N.J.S.A. 58:10A-21 et seq., and the Underground Storage Tank Rules N.J.A.C. 7:14B et. seq. **An owner or operator's submission of false, inaccurate, or incomplete information on this Questionnaire constitutes a violation of these regulations and may result in a delay or denial of a Registration.**

SECTION A. GENERAL FACILITY INFORMATION

UST Facility # (Program Interest ID): 000671

UST Facility Name: Mercer Armory and OMS

Street Address: Scotch Road

Municipality: Ewing (*Township, Borough or City*)

County: Mercer Zip Code: 08628

List the name and contact information of the owner of the real property on which the UST facility is located and the municipal Block and Lot numbers of the property:

Real Property Owner: NJ Department of Military and Veteran's Affairs

Contact Person: LTC Viviene McNamara

Mailing Address: 101 Eggerts Crossing Road

Municipality: Lawrenceville State: NJ Zip Code: 08648

Phone Number: 609-530-6961 Email Address: viviene.e.mcnamara.mil@mail.mil

Block # 373	Lot #(s) 09	Block #	Lot #(s)
Block #	Lot #(s)	Block #	Lot #(s)
Block #	Lot #(s)	Block #	Lot #(s)

1. Type of Submission *(Check all that apply)*

a) ☐ Registration of a newly installed underground storage tank(s). (***Complete Attachment A)***
b) ☐ Registration of an existing underground storage tank not presently registered. (***Complete Attachment A)***
c) ☐ Change, correction, or amendment to an existing facility registration ***(Check type of change, correction, or amendment below)***
d) ☒ Annual renewal

If "c" is checked above, please check the appropriate type of change, correction, or amendment below (check all that apply)

☐ UST Facility Name and/or Address
☐ UST Facility Owner and/or Address
☐ UST Facility Operator and/or Address
☐ Property Owner Name
☐ Class A or B Operator
☐ Billing Contact Person
☐ Change in Type of Product(s) Stored ***(Complete Attachment A - 3)***
☐ Substantial Modification(s) ***(Complete Attachment A - 12B)***
☐ Tank(s) and/or Piping ***(Complete Attachment A)***
☐ Closure ***(Complete Attachment A - 3, 4,10C)***
☐ Financial Responsibility *(Attach whole policy listing all tanks)*
☐ Other *(please specify)*:

2. Total number of regulated underground storage tanks at facility: 1

3. Total capacity of regulated underground storage tanks at facility (gallons): 10,000

4. Facility Type

☒ State ☐ County/Municipal ☐ Charitable / Public School ☐ Farm
☐ Commercial/Industrial ☐ Federal ☐ Residential

5. Is this facility a retail service station? ☐ Yes ☒ No

6. Is this facility a heating oil sales / distribution center? ☐ Yes ☒ No

SECTION B. UST FACILITY OWNER AND OPERATOR INFORMATION

1. UST Facility Owner *(Owner of tanks)*

Name of UST Facility Owner: NJ Department of Military and Veteran's Affairs
Mailing Address: 101 Eggerts Crossing Road
Municipality: Lawrenceville State: NJ Zip Code: 08648

Name of UST Facility Owner Contact: Viviene McNamara Title: LTC
Mailing Address: 101 Eggerts Crossing Road
Municipality: Lawrenceville State: NJ Zip Code: 08648
Phone Number: 609-530-6961 Ext: Fax: 609-530-6880
Email Address: viviene.e.mcnamara.mil@mail.mil

If the owner is a corporation, a limited liability company, a partnership, a limited partnership, or other form of business complete the following:

NJ Business Entity 10-digit ID #: Type of business entity:
Date of original business formation or date registration filed with the State:
Name of the corporate officer, partner, or other person with primary decision making authority regarding this UST Facility:
Phone Number:
Email Address:

2. UST Facility Operator ☐ Same as UST Facility Owner (*Attach additional pages if necessary)*

If change to facility operator, check one:

☐ Add this operator ☐ Replace prior operator with this operator

Name of UST Facility Operator: NJ Department of Military and Veteran's Affairs
Mailing Address: 101 Eggerts Crossing Road
Municipality: Lawrenceville State: NJ Zip Code: 08648

Name of UST Facility Operator Contact: Charles Appleby
Mailing Address: 101 Eggerts Crossing Road
Municipality: Lawrenceville State: NJ Zip Code: 08648
Phone Number: 609-530-7135 Ext: Fax: 609-530-6880
Email Address: charles.appleby@dmava.nj.gov

If the operator is a corporation, a limited liability company, a partnership, a limited partnership, or other form of business complete the following:

NJ Business Entity 10-digit ID #: _____ Type of business entity: _____

Date of original business formation or date registration filed with the State: _____

Name of the corporate officer, partner, or other person with primary decision making authority regarding this UST Facility: _____

Phone Number: _____ Ext: _____ Fax: _____

Email Address: _____

3. Class A Operator

Name: Abigal Zorn

Mailing Address: 101 Eggerts Crossing Road

Municipality: Lawrenceville State: NJ Zip Code: 08648

Phone Number: 609-530-6917 Ext: _____ Fax: 609-530-6880

Email Address: abigail.zorn@dmava.nj.gov

Provide the NJ Registration and Validation Numbers, which can be found on the examination results page. If you received training/certification in another state, provide the name of the state from which you received training and attach formal documentation of training received and/or record of a passing evaluation.

NJ Registration Number: 339283531 and Validation Number: 903857124

OR, *if training received out of state:*

Name of State where training occurred: _____ *(attach training documentation)*

4. Class B Operator ☒ Same as Class A Operator

Name: _____

Mailing Address: _____

Municipality: _____ State: _____ Zip Code: _____

Phone Number: _____ Ext: _____ Fax: _____

Email Address: _____

Provide either the NJ examination result numbers or, if you received training/certification in another state, provide the name of the state from which you received training and attach formal documentation of training received and/or record of a passing evaluation.

NJ Registration Number: _____ and Validation Number: _____

OR, *if training received out of state:*

Name of State where training occurred: _____ *(attach training documentation)*

5. Billing Contact *Check the appropriate box:*

☐ Same as Facility Owner ☐ Same as Facility Operator ☒ Other – provide contact information below

Name of UST Facility: Mercer Armory and oMS

Name of UST Facility Billing Contact: Abigail Zorn Title: Env. Specialist

Mailing Address: 101 Eggerts Crossing Road

Municipality: Lawrenceville State: NJ Zip Code: 08648

Phone Number: 609-530-6917 Ext: _____ Fax: 609-530-6880

Email Address: abigial.zorn@dmava.nj.gov

SECTION C. FINANCIAL RESPONSIBILITY *(Attach additional pages if necessary)*

Include entire Financial Responsibility Assurance Mechanism Document

Type of Mechanism (e.g., Insurance): STATE OF NEW JERSEY

Carrier/Issuing Institution: _____

Name of Insured: _____ Policy Number: _____

Effective Date: _____ Expiration Date: _____

Limit of Liability: Each "Occurrence" or "Incident": .. _____

Limit of Liability: Aggregate: ..... _____

Limit of Defense Costs: ..... _____

(*Defense costs must be subject to a separate policy limit as provided in 40 CFR 280.97*)

Retroactive Dates(s): _____

(attach or Identify Insurer's Schedule of Covered UST Systems Providing This Information)

SECTION D. ATTACHMENTS

The owner and operator can submit attachments to the NJDEP electronically by emailing them to: srpustregistration@dep.nj.gov. The owner and operator must save the documents in Adobe Portable Document Format (PDF) and then add them as attachments to the email. The owner and operator shall include in the email subject line the UST Facility # (Program Interest ID) and the year, separated by a comma.

Example: You are submitting for XYZ facility in Hamilton Twp. with the UST Facility # of 013164. So, the Email Subject Line should be only: 013164,2016.

Indicate below how you have included each of the following attachments with this submission:

Attached	Emailed	
☐		**Attachment A – Specific Tank Information** *(if applicable)*
☐	☐	**Facility Site Plan** *(if applicable)*
		You are required to submit a Facility Site Plan only for the initial registration of a tank or if there are any changes to the physical configuration of the tank system or property. You must include in the facility site plan the location of the tanks, lines, pumps, dispensers, fill pipes, and other features of the underground storage tank system, including the distance from existing buildings and property boundaries;
☐	☐	**Financial Responsibility Assurance Mechanism** *(entire document always required)*
☐	☐	**Owner's** copy of written authorization authorizing the signature above. *(if applicable)*
☐	☐	**Operator's** copy of written authorization authorizing the signature above. *(if applicable)*
☐	☐	**Other** *(specify):* _____

SECTION E. INSTALLER CERTIFICATION

(To be completed by installer for new UST installations or returning out-of-service USTs to service)

Purpose of Certification (*check all that apply)*

☐ *Certification of New UST Installation*

☐ *Certification that out-of-service USTs are properly designed and capable of being put back into service*

Check the applicable boxes to indicate the methods used to comply with installation/return-to-service requirements.

(Attach additional pages if necessary)

Tank Identification Number	Tank No.	Tank No.	Tank No.	Tank No.
Installer certified by tank and piping manufacturers	☐	☐	☐	☐

SECTION F. FACILITY OWNER CERTIFICATION

Must be signed as follows:

- For a corporation, by a responsible corporate official.
- For a partnership or sole proprietorship, by a general partner or the proprietor, respectively.
- For a municipality, County, State, Federal or other public agency, by either a principal executive officer or ranking elected official.
- For a person other than those indicated above, a duly authorized representative.

"I certify under penalty of law that:

1. *I have read, understand, and have followed the applicable rules and instructions for this New Jersey Underground Storage Tank Facility Certification Questionnaire;*
2. *I have personally examined and am familiar with the information submitted in this New Jersey Underground Storage Tank Facility Certification Questionnaire and all attached documents;*
3. *I believe, based on my inquiry of those individuals responsible for obtaining the information, that the submitted information is true, accurate and complete;*
4. *This facility is in compliance with N.J.A.C. 7:14B; and*
5. *I am the person required, pursuant to N.J.A.C. 7:14B-2.2, to sign this New Jersey Underground Storage Tank Facility Certification Questionnaire for the owner of this facility.*
6. *I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute or regulation, I am personally liable for penalties."*

Signature: _____ Date: 03/06/2021

Name: LTC Viviene McNamara Title: CFMO

UST Facility #: 000671

SECTION G. FACILITY OPERATOR CERTIFICATION

Must be signed as follows:

- For a corporation, responsible corporate official.
- For a partnership or sole proprietorship, by a general partner or the proprietor, respectively.
- For a municipality, County, State, Federal or other public agency, by either a principal executive officer or ranking elected official.
- For a person other than those indicated above, a duly authorized representative.

"I certify under penalty of law that:

1. *I have read, understand, and have followed the applicable rules and instructions for this New Jersey Underground Storage Tank Facility Certification Questionnaire;*
2. *I have personally examined and am familiar with the information submitted in this New Jersey Underground Storage Tank Facility Certification Questionnaire and all attached documents;*
3. *I believe, based on my inquiry of those individuals responsible for obtaining the information, that the submitted information is true, accurate and complete;*
4. *This facility is in compliance with N.J.A.C. 7:14B; and*
5. *I am the person required, pursuant to N.J.A.C. 7:14B-2.2, to sign this New Jersey Underground Storage Tank Facility Certification Questionnaire for an operator of this facility.*
6. *I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute or regulation, I am personally liable for penalties."*

c) ☐ Change, correction, or amendment to an existing facility registration ***(Check type of change, correction, or amendment below)***
d) ☒ Annual renewal

If "c" is checked above, please check the appropriate type of change, correction, or amendment below (check all that apply)

☐ UST Facility Name and/or Address
☐ UST Facility Owner and/or Address
☐ UST Facility Operator and/or Address
☐ Property Owner Name
☐ Class A or B Operator
☐ Billing Contact Person
☐ Change in Type of Product(s) Stored ***(Complete Attachment A - 3)***
☐ Substantial Modification(s) ***(Complete Attachment A - 12B)***
☐ Tank(s) and/or Piping ***(Complete Attachment A)***
☐ Closure ***(Complete Attachment A - 3, 4,10C)***
☐ Financial Responsibility *(Attach whole policy listing all tanks)*
☐ Other *(please specify)*:

2. Total number of regulated underground storage tanks at facility: 1

3. Total capacity of regulated underground storage tanks at facility (gallons): 10,000

4. Facility Type

☒ State ☐ County/Municipal ☐ Charitable / Public School ☐ Farm
☐ Commercial/Industrial ☐ Federal ☐ Residential

5. Is this facility a retail service station? ☐ Yes ☐ No

6. Is this facility a heating oil sales / distribution center? ☐ Yes ☐ No

SECTION B. UST FACILITY OWNER AND OPERATOR INFORMATION

1. UST Facility Owner *(Owner of tanks)*

Name of UST Facility Owner: NJ Department of Military and Veteran's Affairs
Mailing Address: 101 Eggerts Crossing Road
Municipality: Lawrenceville State: NJ Zip Code: 08648

Name of UST Facility Owner Contact: Viviene McNamara Title: LTC
Mailing Address: 101 Eggerts Crossing Road
Municipality: Lawrenceville State: NJ Zip Code: 08648
Phone Number: 609-530-6961 Ext: N/A Fax: 609-530-6880
Email Address: viviene.e.mcnamara.mil@army.mil

If the owner is a corporation, a limited liability company, a partnership, a limited partnership, or other form of business complete the following:

NJ Business Entity 10-digit ID #: _____ Type of business entity: _____
Date of original business formation or date registration filed with the State: _____
Name of the corporate officer, partner, or other person with primary decision making authority regarding this UST Facility: _____
Phone Number: _____
Email Address: _____

2. UST Facility Operator ☐ Same as UST Facility Owner *(Attach additional pages if necessary)*

If change to facility operator, check one:

☐ Add this operator ☐ Replace prior operator with this operator

Name of UST Facility Operator: NJ Department of Military and Veteran's Affairs
Mailing Address: 101 Eggerts Crossing Road
Municipality: Lawrencevill State: NJ Zip Code: 08648

Name of UST Facility Operator Contact: Charles Appleby
Mailing Address: 101 Eggerts Crossing Road
Municipality: Lawrenceville State: NJ Zip Code: 08648
Phone Number: 609-530-7135 Ext: N/A Fax: 609-530-6880
Email Address: charles.appleby@dmava.nj.gov

If the operator is a corporation, a limited liability company, a partnership, a limited partnership, or other form of business complete the following:

NJ Business Entity 10-digit ID #: _____ Type of business entity: _____

Date of original business formation or date registration filed with the State: _____

Name of the corporate officer, partner, or other person with primary decision making authority regarding this UST Facility: _____

Phone Number: _____ Ext: _____ Fax: _____

Email Address: _____

3. Class A Operator

Name: Abigail Zorn

Mailing Address: 101 Eggerts Crossing Road

Municipality: Lawrenceville State: NJ Zip Code: 08648

Phone Number: 609-530-6917 Ext: N/A Fax: 609-530-6880

Email Address: abigail.zorn@dmava.nj.gov

Provide the NJ Registration and Validation Numbers, which can be found on the examination results page. If you received training/certification in another state, provide the name of the state from which you received training and attach formal documentation of training received and/or record of a passing evaluation.

NJ Registration Number: 339283531 and Validation Number: 903857124

OR, *if training received out of state:*

Name of State where training occurred: _____ *(attach training documentation)*

4. Class B Operator ☒ Same as Class A Operator

Name: _____

Mailing Address: _____

Municipality: _____ State: _____ Zip Code: _____

Phone Number: _____ Ext: _____ Fax: _____

Email Address: _____

Provide either the NJ examination result numbers or, if you received training/certification in another state, provide the name of the state from which you received training and attach formal documentation of training received and/or record of a passing evaluation.

NJ Registration Number: _____ and Validation Number: _____

OR, *if training received out of state:*

Name of State where training occurred: _____ *(attach training documentation)*

5. Billing Contact *Check the appropriate box:*

☐ Same as Facility Owner ☐ Same as Facility Operator ☐ Other – provide contact information below

Name of UST Facility: Mercer Armory and OMS

Name of UST Facility Billing Contact: Abigail Zorn Title: Env. Specialist

Mailing Address: 101 Eggerts Crossing Road

Municipality: Lawrencevill State: NJ Zip Code: 08648

Phone Number: 609-530-6917 Ext: N/A Fax: 609-530-6880

Email Address: abigail.zorn@dmava.nj.gov

SECTION C. FINANCIAL RESPONSIBILITY *(Attach additional pages if necessary)*

Include entire Financial Responsibility Assurance Mechanism Document

Type of Mechanism (e.g., Insurance): STATE OF NEW JERSEY

Carrier/Issuing Institution: _____

Name of Insured: _____ Policy Number: _____

Effective Date: _____ Expiration Date: _____

Limit of Liability: Each "Occurrence" or "Incident": .. _____

Limit of Liability: Aggregate: ..... _____

Limit of Defense Costs: ..... _____

(*Defense costs must be subject to a separate policy limit as provided in 40 CFR 280.97*)

Retroactive Dates(s): _____

(attach or Identify Insurer's Schedule of Covered UST Systems Providing This Information)

SECTION D. ATTACHMENTS

The owner and operator can submit attachments to the NJDEP electronically by emailing them to: srpustregistration@dep.nj.gov. The owner and operator must save the documents in Adobe Portable Document Format (PDF) and then add them as attachments to the email. The owner and operator shall include in the email subject line the UST Facility # (Program Interest ID) and the year, separated by a comma.

Example: You are submitting for XYZ facility in Hamilton Twp. with the UST Facility # of 013164. So, the Email Subject Line should be only: 013164,2016.

Indicate below how you have included each of the following attachments with this submission:

Attached	Emailed	
☐		**Attachment A – Specific Tank Information** *(if applicable)*
☐	☐	**Facility Site Plan** *(if applicable)* You are required to submit a Facility Site Plan only for the initial registration of a tank or if there are any changes to the physical configuration of the tank system or property. You must include in the facility site plan the location of the tanks, lines, pumps, dispensers, fill pipes, and other features of the underground storage tank system, including the distance from existing buildings and property boundaries;
☐	☐	**Financial Responsibility Assurance Mechanism** *(entire document always required)*
☐	☐	**Owner's** copy of written authorization authorizing the signature above. *(if applicable)*
☐	☐	**Operator's** copy of written authorization authorizing the signature above. *(if applicable)*
☐	☐	**Other** *(specify):* _____

SECTION E. INSTALLER CERTIFICATION

(To be completed by installer for new UST installations or returning out-of-service USTs to service)

Purpose of Certification *(check all that apply)*

☐ *Certification of New UST Installation*

☐ *Certification that out-of-service USTs are properly designed and capable of being put back into service*

Check the applicable boxes to indicate the methods used to comply with installation/return-to-service requirements.

(Attach additional pages if necessary)

Tank Identification Number	Tank No.	Tank No.	Tank No.	Tank No.
Installer certified by tank and piping manufacturers	☐	☐	☐	☐
Installer certified or licensed by the NJDEP	☐	☐	☐	☐
Installation is/will be in accordance with manufacturers installation checklists	☐	☐	☐	☐

Company: _____ Installation-Entire UST System License #: _____

Mailing Address: _____

Municipality: _____ State: _____ Zip Code: _____

Phone Number: _____ Ext: _____ Fax: _____

Email Address: _____

Signature of UST installer certifies that the UST System and/or out-of-service UST system is/are properly designed and capable of being put back into service:

Signature: _____ Date: _____

Name: _____ Title: _____

SECTION F. FACILITY OWNER CERTIFICATION

Must be signed as follows:

- For a corporation, by a responsible corporate official.
- For a partnership or sole proprietorship, by a general partner or the proprietor, respectively.
- For a municipality, County, State, Federal or other public agency, by either a principal executive officer or ranking elected official.
- For a person other than those indicated above, a duly authorized representative.

"I certify under penalty of law that:

1. *I have read, understand, and have followed the applicable rules and instructions for this New Jersey Underground Storage Tank Facility Certification Questionnaire;*
2. *I have personally examined and am familiar with the information submitted in this New Jersey Underground Storage Tank Facility Certification Questionnaire and all attached documents;*
3. *I believe, based on my inquiry of those individuals responsible for obtaining the information, that the submitted information is true, accurate and complete;*
4. *This facility is in compliance with N.J.A.C. 7:14B; and*
5. *I am the person required, pursuant to N.J.A.C. 7:14B-2.2, to sign this New Jersey Underground Storage Tank Facility Certification Questionnaire for the owner of this facility.*
6. *I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute or regulation, I am personally liable for penalties."*

Signature: _____ Date: 03/08/2022

Name: LTC Viviene McNamara Title: CFMO

UST Facility #: 000671

SECTION G. FACILITY OPERATOR CERTIFICATION

Must be signed as follows:

- For a corporation, responsible corporate official.
- For a partnership or sole proprietorship, by a general partner or the proprietor, respectively.
- For a municipality, County, State, Federal or other public agency, by either a principal executive officer or ranking elected official.
- For a person other than those indicated above, a duly authorized representative.

"I certify under penalty of law that:

1. *I have read, understand, and have followed the applicable rules and instructions for this New Jersey Underground Storage Tank Facility Certification Questionnaire;*

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

The EDR Vapor Encroachment Worksheet enables EDR's customers to make certain online modifications that effects maps, text and calculations contained in this Report. As a result, maps, text and calculations contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. Environmental Data Resources shall not be responsible for any customer's decision to include or not include in any final report any records determined to be within the relevant minimum search distances.

This report contains information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANYSUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES.ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this report "AS IS". Any analyses, estimates, ratings, or risk codes provided in this report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can produce information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

R C A FLIGHT OPERATIONS, MERCER COUNTY AIRPORT, TRENTON, NJ 08628 (Continued)

Hazardous Waste Summary:

Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	X001
Waste Description:	Not Defined

APPENDIX 8

QUESTIONNAIRE AND CLIENT PROVIDED DOCUMENTS

Owner/Entity Name of Property: Trenton-Mercer Airport

Subject Property Address: 152 Scotch Rd, West Trenton, NJ 08628

Block and Lot: Block 373 Lots 9 & 9.01

Total Property Area: 204, 032 ft^2

Building footage and floors: N/A

Site Contact: Felipe S. Contreras, P.E.

Familiar with Property Since: 2015

What is the purpose of performing the Phase I ESA/PA? (Refinancing, purchasing, bank loan, etc.)

The purpose is to identify environmental liabilities that may inhibit future development of the subject property.

What is the current use and owner of the Subject Property?

The subject property has no current use. The owner of this property is Trenton-Mercery County Airport.

What is the proposed use and owner of the Subject Property?

Proposed use of the subject property is to establish an air traffic control tower.

Please provide a list of the current tenants on the Subject Property and a brief description of their operations

NJ State Policy (current)
Army National Guard - Helicopter operations and truck parking.

What were the historical operations/use of the Subject Property?

The subject property used to serve as a helicopter landing pad, aircraft fueling station, and provided truck parking.

Do you possess any plans, maps or previous reports (asbestos, lead based paint, wetlands, soil/groundwater investigation, underground/aboveground storage tanks)? If yes, please provide copies.

No.

Are there any current or historical environmental legal issues in connection with the Subject Property (environmental liens, deed notice, deed restriction, environmental enforcement actions)? If yes, provide further details.

There is no current knowledge of existing legal issues.

Does the Subject Property have any environmental permits (underground storage tanks, aboveground storage tanks, hazardous materials, community right to know, stormwater/wastewater discharge, solid waste, air emissions)? If yes, provide further details.

There is no current knowledge of existing environmental permits.

What buildings, if any, are on the Subject Property? What type of building is it? What are the estimated construction dates?

Not applicable. No buildings.

What is the current fuel source used to heat (coal, electric, natural gas, oil, steam) the building(s)?

Not applicable. No building.

What was the historical fuel source used to heat the building(s)?

Not applicable. No building.

What previous buildings were on the Subject Property?

Not applicable.

Are there currently or have there previously been any registered or unregistered underground/aboveground storage tanks at the Subject Property? If yes, provide further details.

There were two fuel tanks that were removed about 15 years ago.

Are there currently or have there previously been electrical transformers or capacitors on the Subject Property? If so, who is the equipment owned and maintained by?

There is no current knowledge on previous electrical transformers or capacitors on the subject property.

Is there currently or has there previously been hydraulic equipment (elevators, lifts) at the Subject Property? If yes, provide further information including Material Safety Data Sheets (MSDS), if applicable.

There is no current knowledge on previous or existing hydraulic equipment.

Are there currently or have there previously been any bulk quantities or chemicals or raw materials stored on the Subject Property?

The subject property used to serve as an aircraft fuel station that likely stored bulk quantities of fuel. Timeline of storage and exact location of storage areas is unknown.

Is there a community right to know survey for the chemical storage on the property?

Not to our knowledge.

Do the Site operations generate wastes (municipal waste, waste oil, hazardous, medical, radioactive)? If so, please provide additional information.

Given current knowledge, the subject property is not known to generate waste.

Are there are floor drains or sumps on the Subject Property? If yes, where do they discharge (storm water sewer, sanitary sewer, septic tank, cesspool, dry well, French drain)?

Not applicable. Adjacent buildings to the subject property may likely have floor drains or sumps.

Were there historically any different discharge points for the floor drains and/or sumps?

Not applicable.

Do Site operations discharge industrial wastewater on or adjacent to the Subject Property other than into a storm sewer system or sanitary sewer system?

There is no current knowledge of current industrial operations on the subject property. There is also no current knowledge of industrial operations discharge from adjacent site buildings.

Are there any pits, pond and/or lagoons utilized for wastewater disposal, solid waste disposal or industrial operations?

There is no current knowledge of discharge or disposal areas in use by the subject property.

Are there any oil/water separators or grease traps at the Subject Site?

Not applicable. Oil/water separators from adjacent buildings are no longer in use, and was removed in the last month; timeline of use is unknown.

Are there any retention or detention ponds on the Subject Property?

No in the area of study, there is a stormwater retention pond in the vicinity of the area.

Where does the stormwater on the Subject Property discharge to?

There is no current knowledge on stormwater sewers that service or serviced the subject property.

If the Subject Property is serviced by public sewer, who provides the sanitary sewer service?

There is no current knowledge of public sanitary sewers that service or serviced the subject property. The adjacent properties are served by Ewing Lawrence Sewerage Auhtority.

When was the Subject Property connected to public sewer?

There is no current knowledge of public sanitary sewers that service or serviced the subject property.

Prior to connection, what was the previous wastewater disposal system (cesspool, septic system, french drain)?

There is no current knowledge of previous wastewater disposal systems that service or serviced the subject property.

Are there any railroad spurs or railroad lines running through or adjacent to the Subject Property?

The West Trenton Railroad Line runs adjacent to the subject property.

Is there any evidence of stressed vegetation on or adjacent to the Subject Property?

There is no current knowledge of the state of vegetation on subject property or on adjacent buildings.

Has there been any evidence of dumping (drums, municipal solid waste) on the Subject Property?

There is no current knowledge of any evidence of dumping of waste(s) on the subject property.

Is the Subject Property serviced by public water, if so, who provides potable water service?

Not the area in question, the adjacent building are sever by Trenton Water Works.

Is the Subject Property serviced by an onsite potable water well? If so, has the well ever been tested and does it possess a permit?

There are no current knowledge of potable water wells only monitoring wells.

Does the plumbing on the Subject Property contain lead fittings or faucets, lead water pipes or water pipes with lead solder?

There is no actual water service in the property.

Has the drinking water ever been tested on the Subject Property?

Yes. There are 4 monitoring wells for well water. The adjacent properties are served by Trenton Water Works.

Who provides electric service to the Subject Property?

Not applicable. Adjacent buildings are located in a municipality serviced by PSEG.

If the property is serviced by natural gas, who provides the natural gas service to the Subject Property?

There is no current knowledge on natural gas providers that service or serviced the subject property.

Do any major oil, gasoline or chemical underground transmission lines exist on the Subject Property?

No.

Provide the ownership history details for the Subject Property

The property has been under the operation of Trenton Mercer Airport since its conception.

Is the Subject Property applicable to ISRA Operations?

Not applicable.

New Jersey Department of Environmental Protection
Site Remediation Program

ANNUAL REMEDIATION FEE REPORTING FORM

Date Stamp
(For Department use only)

SECTION A. SITE NAME AND LOCATION

Site Name: West Trenton Army Aviation Support Facility

List all AKAs:

Street Address: Scotch Road

Municipality: Ewing (Township, Borough or City)

County: Mercer Zip Code: 08628

Program Interest (PI) Number(s): 000671 Case Tracking Number(s): Not applicable (NA)

Date trigger compliance with N.J.A.C. 7:26C-2:

Check One: First Annual ☒ Renewal ☐

SECTION B. FEE BILLING CONTACT

Business Name: New Jersey Dept. Military and Veteran's Affairs Phone: (609) 530-7135

Contact: Frank Kirby Title: Chief, Environmental Management Bureau

Street Address: 101 Eggerts Crossing Road

City: Lawrenceville State: NJ Zip Code: 08648

SECTION C. CATEGORY FEE

Fee Category	Number of CAOC	Annual Fee
☒ 1	0 to 1	$450.00
☐ 2	2 to 10	$900.00
☐ 3	11 to 20	$5,000.00
☐ 4	> 20	$9,500.00

Note:
A single regulated heating oil tank system is Category 1; One or more regulated underground storage tanks are in Category 2; Landfills are in Category 3

Subtotal Fee from Section C: $450.00

SECTION D. CONTAMINATED MEDIA FEE (see instructions for applicability)

☐ Ground Water	$1,400.00
☐ Sediment	$1,400.00
☐ Ground Water Migrating into Surface Water	$1,400.00

Subtotal Fee from Section D:

Note: A Section C fee above must always be included with Section D fee (i.e., 0-1 CAOC at a minimum)

Total Fee from Section C and Section D: $450.00 (unless prorating applies, see E. below)

Check #: 117422

SECTION E. PRORATED FEES (Check to see if this applies)

The person responsible for conducting the remediation who was conducting the remediation without a Licensed Site Remediation Professional (LSRP) prior to May 7, 2012, (i.e., an existing case that did not opt-in to LSRP) and who is continuing on or after that date to conduct the remediation using a licensed site remediation professional and who is submitting their first LSRP annual fee payment shall submit the prorated annual remediation fee amount based on the county the site is located in. Please refer to **Page 3 and 4** of the **ANNUAL REMEDIATION FEE REPORTING FORM INSTRUCTIONS** to determine the prorated fee, if applicable.

Total Prorated Fee from Section C and Section D: Check #:

SECTION F. PERSON RESPONSIBLE FOR CONDUCTING THE REMEDIATION INFORMATION AND CERTIFICATION

Full Legal Name of the Person Responsible for Conducting the Remediation: NJ Dept. of Military and Veteran's Affairs

Representative First Name: Frank Representative Last Name: Kirby

Title: Chief, Environmental Management Bureau

Phone Number: (609) 530-7135 Ext: Fax: (609) 445-9880

Mailing Address: 101 Eggerts Crossing Road

City/Town: Lawrenceville State: NJ Zip Code: 08648

Email Address: frank.kirby@us.army.mil

This certification shall be signed by the responsible party who is submitting this notification in accordance with Administrative Requirements for the Remediation of Contaminated Sites rule at N.J.A.C. 7:26C-1.5(a).

I certify under penalty of law that I have personally examined and am familiar with the information submitted herein, and that to the best of my knowledge, I believe that the submitted information is true, accurate and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute, I am personally liable for the penalties.

Signature: Frank Kirby Date: 14 Aug 12

Name/Title: Frank Kirby, Chief, Environmental Management Bureau **No Changes Since Last Submittal** ☐

SECTION G. LICENSED SITE REMEDIATION PROFESSIONAL INFORMATION AND STATEMENT

LSRP ID Number: 575610

First Name: Richard Last Name: Jasaitis

Phone Number: (609) 584-5271 Ext: 490 Fax: (609) 584-7498

Mailing Address: 3 AAA Drive, First Floor

City/Town: Hamilton State: NJ Zip Code: 08691

Email Address: rjasaitis@kleinfelder.com

This statement shall be signed by the LSRP who is submitting this notification in accordance with SRRA Section 16 d. and Section 30 b.2.

I certify that I am a Licensed Site Remediation Professional authorized pursuant to N.J.S.A. 58:10C to conduct business in New Jersey. As the Licensed Site Remediation Professional of record for this remediation, I:

[SELECT ONE OR BOTH OF THE FOLLOWING AS APPLICABLE]:

☐ *directly oversaw and supervised all of the referenced remediation, and\or*

☒ *personally reviewed and accepted all of the referenced remediation presented herein.*

I believe that the information contained herein, and including all attached documents, is true, accurate and complete.

It is my independent professional judgment and opinion that the remediation conducted at this site, as reflected in this submission to the Department, conforms to, and is consistent with, the remediation requirements in N.J.S.A. 58:10C-14.

My conduct and decisions in this matter were made upon the exercise of reasonable care and diligence, and by applying the knowledge and skill ordinarily exercised by licensed site remediation professionals practicing in good standing, in accordance with N.J.S.A. 58:10C-16, in the State of New Jersey at the time I performed these professional services.

I am aware pursuant to N.J.S.A. 58:10C-17 that for purposely, knowingly or recklessly submitting false statement, representation or certification in any document or information submitted to the board or Department, etc., that there are significant civil, administrative and criminal penalties, including license revocation or suspension, fines and being punished by imprisonment for conviction of a crime of the third degree.

LSRP Signature: R J Jasaitis Date: 8/29/12

August 24, 2012

Mr. Frank Kirby
Chief, Environmental Management Bureau
New Jersey Department of Military and Veterans Affairs
101 Eggerts Crossing Road
Lawrenceville, New Jersey 08648

Re: Response Action Outcome
Remedial Action Type: *Unrestricted Use*
Scope of Remediation: *Areas of Concern:* (Tank E3 and Tank E5) *and no other areas*
Case Name: West Trenton Army Aviation Support Facility
Address: Scotch Road
Municipality: Ewing
County: Mercer
Block: 373 **Lot:** 9
Preferred ID: 000671

Dear: Mr. Kirby:

As a Licensed Site Remediation Professional authorized pursuant to N.J.S.A. 58:10C to conduct business in New Jersey, I hereby issue this Response Action Outcome for the remediation of the areas of concern specifically referenced above. I personally reviewed and accepted all of the referenced remediation and based upon this work, it is my professional opinion that this remediation has been completed in compliance with the Administrative Requirements for the Remediation of Contaminated Sites -N.J.A.C. 7:26C-6.2(c), that is protective of public health, safety and the environment and full payment has been made for all Department fees and oversight costs pursuant to N.J.A.C.7:26C-4.

This remediation includes the completion of a Site Investigation as defined pursuant to the Technical Requirements for Site Remediation (N.J.A.C. 7:26E).

My decision in this matter is made upon the exercise of reasonable care and diligence and by applying the knowledge and skill ordinarily exercised by licensed site remediation professionals in good standing practicing in the State at the time these professional services are performed.

As required pursuant to N.J.A.C. 7:26C - three electronic copies of all records related to the remediation activities that occurred at this location is being simultaneously filed with the New Jersey Department of Environmental Protection (Department). These records contain all information upon which the decision was based to issue this Response Action Outcome.

By operation of law a Covenant Not to Sue pursuant to N.J.S.A. 58:10B-13.2 applies to this remediation. The Covenant Not to Sue is subject to any conditions and limitations contained herein. The Covenant Not to Sue remains effective only as long as the real property referenced above continues to meet the conditions of this Response Action Outcome.

3 AAA Drive, First Floor, Hamilton, NJ 08691 p | 609.584.5271 f | 609.584.7498

CONDITIONS

Pursuant to N.J.S.A. 58:10B-12o, the New Jersey Department of Military and Veterans Affairs and any other person who is liable for the cleanup and removal costs, and remains liable pursuant to the Spill Compensation and Control Act, N.J.S.A. 58:10-23.11 et seq. shall inform the Department in writing, on a form available from the Department, within 14 calendar days of when its name or address changes. Any notices you submit pursuant to this paragraph shall reference the above case numbers and shall be sent to: New Jersey Department of Environmental Protection, Bureau of Case Assignment and Initial Notice – Case Assignment Section, P.O. Box 434, Trenton, N.J. 08625.

In concluding that this remediation has been completed, I am offering no opinions concerning whether either primary restoration (restoring natural resources to their pre-discharge condition) or compensatory restoration (compensating the citizens of New Jersey for the lost interim value of the natural resources) has been completed.

Pursuant to N.J.S.A. 58:10C-25, the Department may audit this Response Action Outcome and associated documentation up to three years following issuance. Based on a finding by the Department that a Response Action Outcome is not protective of public health, safety and the environment, the Department can invalidate the Response Action Outcome. In addition, a Department audit following issuance of this document may be initiated at any time if: a) undiscovered contamination is found that should have been addressed by the Response Action Outcome, b) if the Licensed Site Remediation Professional Board conducts an investigation of the Licensed Site Remediation Professional issuing the Response Action Outcome or, c) if the license of that person is suspended or revoked.

Thank you for your attention to these matters. If you have any questions, please contact me at (609)584-5271 extension 490.

Sincerely,

Richard A. Jasaitis,
Licensed Site Remediation Professional #575610

SECTION C. SITE USE

Current Site Use (check all that apply)

- ☐ Industrial
- ☐ Residential
- ☐ Commercial
- ☐ School/Childcare
- ☐ Agricultural
- ☐ Park or recreational use
- ☐ Vacant
- ☐ Government
- ☐ Other: _____

Intended Future Use (check all that apply)

- ☐ Industrial
- ☐ Residential
- ☐ Commercial
- ☐ School/Childcare
- ☐ Park or recreational use
- ☐ Vacant
- ☒ Government
- ☐ Future site use unknown

SECTION D. PUBLIC FUNDS

Did the remediation utilize public funds? ..... ☐ Yes ☐ No

If "Yes," check applicable:

- ☐ UST Grant
- ☐ UST Loan
- ☐ Brownfield Reimbursement Program
- ☐ HDSRF Grant
- ☐ HDSRF Loan
- ☐ Landfill Reimbursement Program
- ☐ Spill Fund
- ☐ Schools Development Authority

SECTION E. SCOPE OF THE RESPONSE ACTION OUTCOME

1. Check only 1 box
   - ☒ Area(s) of Concern Only
   - ☐ Entire Site
   - ☐ Entire Site − Child Care Center Facility License
   - ☐ Lease Hold Portion Only – Child Care Center Facility (Refer to RAO Guidance Document for license details)
   - ☐ ISRA Subject Industrial Establishment (leasehold portion only)
2. Total number of contaminated AOCs associated with the site: 2
3. Total number of contaminated AOCs addressed in this submittal: 2
4. Are there any outstanding contaminated AOCs associated with the case where an RAO has not been filed? ..... ☐ Yes ☐ No

SECTION F. FEES

- ☐ Child Care Center RAO $450.00
- ☒ All Oversight Invoices and Annual Remediation Fees are Paid in Full.

SECTION G. EXTENT OF REMEDIATION COVERED BY THE RESPONSE ACTION OUTCOME (check only 1 box)

- ☒ Unrestricted RAO
- ☐ Limited Restricted RAO
- ☐ Restricted RAO

SECTION H. RESPONSE ACTION OUTCOME PREPARATION CHECKS

1. Was the RAO issued only to the "Person(s) that conducted the Remediation"? ..... ☐ Yes ☐ No
2. Does the language in the issued RAO document conform to the RAO shell document? ..... ☒ Yes ☐ No
3. Were all the applicable individuals/agencies noted in the shell document copied on the RAO? . ☐ Yes ☐ No
4. Are there electronic copies of all remediation related records included with this submittal? ..... ☐ Yes ☐ No
5. Have all Department fees and outstanding oversight costs been paid? ..... ☐ Yes ☐ No
6. Have any identified deficiencies been addressed in this or prior submittal? ..... ☐ Yes ☐ No ☐ N/A
7. Did the remedial action render the property unusable for future redevelopment or recreation use? ..... ☐ Yes ☒ No

SECTION I. APPLICABLE REMEDIATION STANDARDS

1 Were Default Remediation Standards used for all compounds? ..... ☐ Yes ☐ No
(If "Yes," check all that apply)

- ☐ Direct Contact
- ☒ Impact to Ground Water Soil Screening Levels
- ☐ Ecological Screening Levels

2. Has compliance averaging been utilized to determine compliance with the Inhalation Pathway? ..... ☐ Yes ☐ No

3. Has a compliance option been utilized to determine compliance with the Impact to Ground Water Pathway? (If "Yes," check all that apply) ☐ Yes ☐ No
   - ☐ Immobile Compounds
   - ☐ Data evaluation for metals and semi-volatiles
   - ☐ Data evaluation for volatile organics derived from discharges of petroleum mixtures
4. Were Alternate Remediation Standards used for the Ingestion/Dermal Pathway? ☐ Yes ☐ No
5. Were Alternate Remediation Standards used for the Inhalation Pathway? ☐ Yes ☐ No
6. Were Site Specific Standards used for the Impact to Ground Water Pathway? ☐ Yes ☐ No
   (If "Yes," check all that apply)
   - ☐ Soil-Water Partitioning Equation ☐ SPLP ☐ Sesoil ☐ Sesoil/AT123D
   - ☐ DAF Modification ☐ Immobile Chemicals List
   - ☐ Soil and Ground Water Analytical Data Evaluation
7. Were site specific Ecological Remediation Goals used? ☐ Yes ☒ No
8. What is the ground water classification for this site as per N.J.A.C. 7:9C? (check all that apply)
   - ☐ Class I-A ☐ Class II-A
   - ☐ Class I-PL Pinelands Protection Area ☐ Class III-A
   - ☐ Class I-PL Pinelands Preservation Area ☐ Class III-B

SECTION J. MEDIA IMPACTED/REMEDIATED

1. Soil Remediation Types (check all that apply):
- ☒ No remedial action required ☐ Excavation
- ☐ Capping / other engineering controls ☐ Treatment
- ☐ Institutional Control ☐ Other _____

2. Ground Water

Have the Ground Water Quality Standards been met? ☐ Yes ☐ No

Do groundwater concentrations remain above the Ground Water Quality Standards but concentrations are low and non-decreasing? ☐ Yes ☐ No ☐ N/A

3. Ground Water Remediation Types (check all that apply):
- ☒ No remedial action required ☐ Physical Containment ☐ Pump & Treat
- ☐ In-Situ ☐ Hydraulic Control ☐ Institutional Control
- ☐ Monitored Natural Attenuation ☐ Other _____

4. Ecological

Was wetlands mitigation/restoration required? ☐ Yes ☐ No

Was a wetlands mitigation/restoration plan approved by NJDEP? ☐ Yes ☒ No

Do contaminant levels currently meet ecological screening levels or ecological remediation goals?
- Surface water ☐ Yes ☐ No ☐ N/A
- Sediment ☐ Yes ☐ No ☐ N/A

5. Wetland Remediation Types (check all that apply):
- ☐ No remedial action required ☐ Capping
- ☐ Excavation ☐ Other_____

6. Sediment Remediation Types (check all that apply):
- ☒ No remedial action required ☐ Capping
- ☐ Excavation ☐ Other_____

7. General

Has radionuclide contamination been addressed in any media? ☐ Yes ☐ No ☒ N/A

SECTION K. ALTERNATIVE STANDARD / VARIANCES

Alternative remediation standard / screening level
If proposing an alternative remediation standard pursuant to N.J.A.C. 7:26D-7.4, or alternate vapor intrusion screening level, check here ☐ and attach the Alternative Soil Remediation Standard and/or Screening Level Application Form as an addendum.

A site-specific screening level was developed for the evaluation of the VI pathway..... ☐ Yes ☐ No

Variance from regulations
If the Licensed Site Remediation Professional has varied from the Technical Rules, provide the citation(s) from which the remediation varied and the page(s) in the attached document where the rationale for the variance is provided.

N.J.A.C. 7:26E- _____ Page _____
N.J.A.C. 7:26E- _____ Page _____
N.J.A.C. 7:26E- Page

SECTION L. RESPONSE ACTION OUTCOME NOTICES (check all the apply and were used in the RAO document)

1. General Notices
- ☐ Well Decommissioning
- ☐ Building Interiors Not Addressed

2. Child Care Center Notices
- ☐ Child Care Center Notices (Use this notice in all Child Care Center RAOs)
- ☐ Child Care Center Specific-Multi-Tenant Situations

3. Contamination Remaining Onsite
- ☐ Regional Natural Background Levels of Contamination
- ☐ Existing CEA or Deed Notice
- ☐ Soils Only RAO
- ☐ Ground Water Contamination Not Yet investigated
- ☐ Ground Water Contamination Due to Regional Historic Fill
- ☐ Contamination Remaining Onsite Due to Migration from Off-site Source
- ☐ Known Onsite Contamination Source Not Yet Remediated
- ☐ Less than an Order of Magnitude Remediation Standard Change For A Site With An Approved RAW Prior To A New Remediation Standard
- ☐ Less than an Order of Magnitude Remediation Standard Change For A Site With A Final Remediation Document Prior to A New Remediation Standard

4. ISRA Specific Notices
- ☐ ISRA Specific – RCRA Situations
- ☐ ISRA Specific – Multi-Tenant Situations
- ☐ ISRA Specific – Landfill Situations

SECTION M. REMEDIATION FUNDING SOURCE

1. Has a Remediation Funding Source been posted for this site pursuant to N.J.A.C. 7:26C-5? ... ☐ Yes ☐ No
   (If No, skip to Section L. below)
2. Check a. or b. below as applicable:
   a. ☐ This RAO is for the entire site and serves as notice to the Department to return the Remediation Funding Source posted for this site*****.
   b. ☐ This RAO is for an Area of Concern only and (check one below):
      - ☐ serves as notice to the Department to decrease the Remediation Funding Source posted for this site*****.
      - ☐ no adjustments to the Remediation Funding Source are requested at this time.

Note: If any box in 2. above identified with an asterisk (*****) is checked, be sure to include the completed **"**Remediation Cost Review and RFS-FA Form" available at http://nj.gov/dep/srp/srra/forms

SECTION N. PERSON RESPONSIBLE FOR CONDUCTING THE REMEDIATION INFORMATION AND CERTIFICATION

Full Legal Name of the Person Responsible for Conducting the Remediation: NJ Dept. of Military and Veteran's Affairs

Representative First Name: Frank Representative Last Name: Kirby

Title: Chief, Environmental Management Bureau

Phone Number: (609) 530-7135 Ext: Fax: (609) 445-9880

Mailing Address: 101 Eggerts Crossing Road

City/Town: Lawrenceville State: NJ Zip Code: 08648

Email Address: frank.kirby@us.army.mil

This certification shall be signed by the person responsible for conducting the remediation who is submitting this notification in accordance with Administrative Requirements for the Remediation of Contaminated Sites rule at N.J.A.C. 7:26C-1.5(a).

I certify under penalty of law that I have personally examined and am familiar with the information submitted herein, including all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, to the best of my knowledge, I believe that the submitted information is true, accurate and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute, I am personally liable for the penalties.

Signature: Frank Kirby Date: 14 Aug 12

Name/Title: Frank Kirby, Chief, Environmental Management Bureau **No Changes Since Last Submittal** ☐

Company Name: NJ Dept. of Military and Veteran's Affairs

SECTION O. LICENSED SITE REMEDIATION PROFESSIONAL INFORMATION AND STATEMENT

LSRP ID Number: 575610

First Name: Richard Last Name: Jasaitis

Phone Number: (609) 584-5271 Ext: 490 Fax: (609) 584-7498

Mailing Address: 3 AAA Drive, First Floor

City/Town: Hamilton State: NJ Zip Code: 08691

Email Address: rjasaitis@kleinfelder.com

This statement shall be signed by the LSRP who is submitting this notification in accordance with SRRA Section 16 d. and Section 30 b.2.

I certify that I am a Licensed Site Remediation Professional authorized pursuant to N.J.S.A. 58:10C to conduct business in New Jersey. As the Licensed Site Remediation Professional of record for this remediation, I:

[SELECT ONE OR BOTH OF THE FOLLOWING AS APPLICABLE]:

☐ *directly oversaw and supervised all of the referenced remediation, and\or*

☒ *personally reviewed and accepted all of the referenced remediation presented herein.*

I believe that the information contained herein, and including all attached documents, is true, accurate and complete.

It is my independent professional judgment and opinion that the remediation conducted at this site, as reflected in this submission to the Department, conforms to, and is consistent with, the remediation requirements in N.J.S.A. 58:10C-14.

My conduct and decisions in this matter were made upon the exercise of reasonable care and diligence, and by applying the knowledge and skill ordinarily exercised by licensed site remediation professionals practicing in good standing, in accordance with N.J.S.A. 58:10C-16, in the State of New Jersey at the time I performed these professional services.

I am aware pursuant to N.J.S.A. 58:10C-17 that for purposely, knowingly or recklessly submitting false statement, representation or certification in any document or information submitted to the board or Department, etc., that there are significant civil, administrative and criminal penalties, including license revocation or suspension, fines and being punished by imprisonment for conviction of a crime of the third degree.

LSRP Signature:  Date: 8/23/12

- ☐ Due Diligence with RAO
- ☐ Not Applicable

SECTION F. PUBLIC FUNDS

Did the remediation utilize public funds? ..... ☐ Yes ☐ No

If "Yes," check applicable:
- ☐ UST Grant
- ☐ UST Loan
- ☐ Brownfield Reimbursement Program
- ☐ HDSRF Grant
- ☐ HDSRF Loan
- ☐ Landfill Reimbursement Program
- ☐ Spill Fund
- ☐ Schools Development Authority

SECTION G. GENERAL

1. Was an inspection of the site conducted? ..... ☐ Yes ☐ No ☐ NA
   Date of the inspection 07/11/2011
2. Did the PA identify any areas of concern? ..... ☐ Yes ☐ No ☐ NA
   If "Yes," please complete section H2.
3. What page or appendix is the site map indicating all of the areas of concern located? Figure 2
4. Did the PA identify any current or historic industrial, commercial, agricultural or residential use at the site dating back to the time the site was naturally vegetated? ..... ☐ Yes ☐ No ☐ NA
   If "Yes," please complete section H1.
5. Prior to this submittal have any NFAs/RAOs been issued for this site? ..... ☒ Yes ☐ No
   a. Does the site currently have a Deed Notice? ..... ☐ Yes ☐ No
   b. Does the site currently have a CEA? ..... ☐ Yes ☐ No
   c. Has an order of magnitude evaluation been performed? ..... ☒ Yes ☐ No
6. Is the ground water at the site classified as a Class I Ground Water? ..... ☐ Yes ☐ No
7. Are there potable wells on-site? ..... ☐ Yes ☐ No

8. Has a well search been conducted pursuant to N.J.A.C. 7:26E-1.17? ☐ Yes ☐ No

   a. If "Yes," are there any potable wells within 200' of the AOCs listed in H2 or within 200' of the site boundary? ☐ Yes ☐ No

9. Is an environmentally sensitive natural resource (ESNR) present on, adjacent to, or potentially impacted by the site? ☐ Yes ☐ No

   a. If "Yes," are there visible signs of impact/impairment (e.g., discolored media, stressed vegetation, discharge/spill, seeps, fish kill)? ☐ Yes ☐ No

   b. Provide a scaled figure that documents the presence or absence of an ESNR.

10. Has the site investigation been completed for:

    Specific Areas Of Concern (AOC)s? ☐ Yes ☐ No

    Entire Site based on a PA? ☐ Yes ☒ No

11. Have all of the potentially contaminated AOCs identified in the PA been addressed within the regulatory timeframe? ☐ Yes ☐ No ☒ NA

SECTION H. SITE INFORMATION

H1. Current and Historic Operators/Operations (attach additional sheets as necessary)

Name of Operator	Type of Operation – e.g., dry cleaning, electro-plating, residence	Dates of Operation	
		Start	End
County of Mercer	National Guard Army Aviation Support Facility	Unknown	Ongoing

H2. Areas of Concern (For PA or PA/SI Report, list each AOC; for SI Report, list only AOCs documented in this submittal.)

	Area of Concern	Currently Exists? ☒ if "Yes"	Formerly Existed? ☒ if "Yes"	Investigation: SI Conducted ☒ if "Yes"	Investigation: RI Proposed ☒ if "Yes"

37	Waste water treatment	☐	☐	☐	☐
38	Other:	☐	☐	☐	☐

H3. Complete this section only if an ISRA waiver was issued or an ISRA NFA was issued under an expedited review or Limited Site Review.

ISRA Case #	Expedited Review	Limited Site Review	Remediation In Progress Waiver	Regulated UST Waiver	Date	Comments
	☐	☐	☐	☐		
	☐	☐	☐	☐		
	☐	☐	☐	☐		
	☐	☐	☐	☐		
	☐	☐	☐	☐		
	☐	☐	☐	☐		
	☐	☐	☐	☐		
	☐	☐	☐	☐		

H4. REGULATED USTs: Complete if any underground storage tanks (USTs) on site are regulated pursuant to N.J.A.C. 7:14B or if a UST Unknown Source Investigation was conducted pursuant to N.J.A.C. 7:14B-7.4.

a. Have all the regulated USTs on site been registered with the Department? ☐ Yes ☐ No

b. Have all incidents related to regulated USTs been remediated/investigated? ☐ Yes ☐ No

c. Have any USTs been removed on/after September 4, 1990? ☐ Yes ☐ No

d. Including this submittal, has an SI/RI report been submitted for all USTs closed on/after September 4, 1990? ☐ Yes ☐ No

e. Was an Unknown Source Investigation conducted per N.J.A.C. 7:14B-7.4? ☐ Yes ☐ No
If "No" skip to H5.

1) Did the investigation identify contamination? ☐ Yes ☐ No
If "No" skip to H5.

2) Was an ongoing release discovered? ☐ Yes ☐ No
If "No" skip to H5.

3) Was the UST system emptied and taken out-of-service? ☐ Yes ☐ No
(Note: A UST Facility Certification Questionnaire must be submitted to update the registration.)

H5. Compliance Check (Complete only if sampling of soil and/or ground water was conducted)

a. Identify the media if impacted above applicable standards/screening levels (check all that apply):
☐ soil ☐ ground water

Type of contamination in soil and ground water above applicable standards/screening levels (check all that apply):

Soil	Ground Water		Soil	Ground Water	
☐	☐	Volatile Organics	☐	☐	PCBs
☐	☐	Polycyclic Aromatic Hydrocarbons(PAHs)	☐	☐	Chromium
☐	☐	Acid Extractables	☐	☐	Dioxin
☐	☐	Base Neutrals (non-PAHs)	☐	☐	Mercury
☐	☐	Metals	☐	☐	Arsenic
☐	☐	Pesticides	☐	☐	Perchlorate, RDX, TNT, etc.
☐	☐	PHC	☐	☐	Other, specify _____

b. For all AOCs at which a SI was conducted, but no RI/RA is proposed:

1) Are any soil analytical results greater than the most stringent Direct Contact Soil Remediation Standards (DCSRS)? ☐ Yes ☐ No

2) Are any soil analytical results greater than the default Impact to Ground Water Soil Screening Levels (IGWSSL)? ☐ Yes ☐ No

3) Are any ground water analytical results greater than the Ground Water Quality Standards (GWQS)? ☐ Yes ☐ No ☐ NA

4) Are any Method Detection Limits (MDLs) greater than the applicable soil and/or ground water standards or screening levels? ☐ Yes ☐ No

5) Are any surface water analytical results greater than the most stringent, both human and ecological, Surface Water Quality Standards? ☐ Yes ☐ No ☐ NA

6) Are any sediment analytical results above the screening levels? ☐ Yes ☐ No ☐ NA

7) Are any analytical results above the vapor intrusion screening levels? ☐ Yes ☐ No ☒ NA

8) Did the SI document, via a background investigation, outside the influence of onsite AOCs and operational areas, determine that:

a) contamination is migrating onto this site per N.J.A.C. 7:26E-3.7(g)? ☐ Yes ☐ No ☐ NA

b) contamination is naturally occurring per N.J.A.C. 7:26E-3.10? ☐ Yes ☐ No ☐ NA

9) Contamination is associated with an ongoing ISRA remediation. ☐ Yes ☐ No ☐ NA

c. Have Alternative Remediation Standards (ARS) been utilized for Inhalation and/or Ingestion/Dermal pathways? ☐ Yes ☒ No

d. Have any site specific Impact to Groundwater Soil Remediation Standards (IGWSRS) been established? ☐ Yes ☒ No

Note: Complete if "Yes" to question b.) 1-4, c. or d. List affected AOC(s) below; attach additional sheets if necessary.

Area of Concern (from H2. above)	Exceeds DCSRS	Exceeds IGWSSL	Exceeds GWQS	MDLs > Standards	ARS	Site Specific IGWSRS	Comments
	☐	☐	☐	☐	☐	☐	
	☐	☐	☐	☐	☐	☐	
	☐	☐	☐	☐	☐	☐	
	☐	☐	☐	☐	☐	☐	
	☐	☐	☐	☐	☐	☐	

	☐	☐	☐	☐	☐	☐	
	☐	☐	☐	☐	☐	☐	
	☐	☐	☐	☐	☐	☐	

SECTION I. ALTERNATIVE STANDARD / VARIANCES

Alternative remediation standard

If proposing an alternative remediation standard pursuant to N.J.A.C. 7:26D-7.4, or alternate vapor intrusion screening level, check here ☐ and attach the Alternative Soil Remediation Standard and/or Screening Level Application Form as an addendum.

A site-specific screening level was developed for the evaluation of the VI pathway..... ☐ Yes ☐ No

Variance from regulations

If the Licensed Site Remediation Professional has varied from the Technical Rules, provide the citation(s) from which the remediation varied and the page(s) in the attached document where the rationale for the variance is provided.

SECTION J. PERSON RESPONSIBLE FOR CONDUCTING THE REMEDIATION INFORMATION AND CERTIFICATION

Full Legal Name of the Person Responsible for Conducting the Remediation: NJ Dept. of Military and Veteran's Affairs

Representative First Name: Frank Representative Last Name: Kirby

Title: Chief, Environmental Mgmt. Bureau Business Affiliation: NJ Dept. of Military and Veteran's Affairs

Phone Number: (609) 530-7135 Ext: _____ Fax: (609) 445-9880

Mailing Address: 101 Eggerts Crossing Road

City/Town: Lawrenceville State: NJ ZIP Code: 08648

Email Address: frank.kirby@us.army.mil

This certification shall be signed by the person responsible for conducting the remediation who is submitting this notification in accordance with Administrative Requirements for the Remediation of Contaminated Sites rule at N.J.A.C. 7:26C-1.5(a).

I certify under penalty of law that I have personally examined and am familiar with the information submitted herein, including all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, to the best of my knowledge, I believe that the submitted information is true, accurate and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute, I am personally liable for the penalties.

Signature: Frank Kirby Date: 14 Aug 12

Name/Title: Frank Kirby, Chief, Environmental Management Bureau **No Changes Since Last Submittal** ☐

SECTION K. LICENSED SITE REMEDIATION PROFESSIONAL INFORMATION AND STATEMENT

LSRP ID Number: 575610

First Name: Richard Last Name: Jasaitis

Phone Number: (609) 584-5271 Ext: 490 Fax: (609) 584-7498

Mailing Address: 3 AAA Drive, First Floor

City/Town: Hamilton State: NJ Zip Code: 08691

Email Address: rjasaitis@kleinfelder.com

This statement shall be signed by the LSRP who is submitting this notification in accordance with SRRA Section 16 d. and Section 30 b.2.

I certify that I am a Licensed Site Remediation Professional authorized pursuant to N.J.S.A. 58:10C to conduct business in New Jersey. As the Licensed Site Remediation Professional of record for this remediation, I:

[SELECT ONE OR BOTH OF THE FOLLOWING AS APPLICABLE]:

☐ *directly oversaw and supervised all of the referenced remediation, and\or*

☒ *personally reviewed and accepted all of the referenced remediation presented herein.*

I believe that the information contained herein, and including all attached documents, is true, accurate and complete.

It is my independent professional judgment and opinion that the remediation conducted at this site, as reflected in this submission to the Department, conforms to, and is consistent with, the remediation requirements in N.J.S.A. 58:10C-14.

My conduct and decisions in this matter were made upon the exercise of reasonable care and diligence, and by applying the knowledge and skill ordinarily exercised by licensed site remediation professionals practicing in good standing, in accordance with N.J.S.A. 58:10C-16, in the State of New Jersey at the time I performed these professional services.

I am aware pursuant to N.J.S.A. 58:10C-17 that for purposely, knowingly or recklessly submitting false statement, representation or certification in any document or information submitted to the board or Department, etc., that there are significant civil, administrative and criminal penalties, including license revocation or suspension, fines and being punished by imprisonment for conviction of a crime of the third degree.

LSRP Signature: R J Jasaitis Date: 8/23/12

RECEPTOR EVALUATION (RE) FORM

Date Stamp
(For Department use only)

SECTION A. SITE NAME AND LOCATION

Site Name: _____

List all AKAs: _____

Street Address: Scotch Road

Municipality: Ewing (Township, Borough or City)

County: _____ Zip Code: 08628

Program Interest (PI) Number(s): _____ Case Tracking Number(s): _____

Indicate the type of submission:

☒ Initial RE Submission

☐ Updated RE Submission

Indicate the reason for submission of an updated RE form

- ☐ Submission of an Immediate Environmental Concern (IEC) source control report;
- ☐ Submission of a Remedial Investigation Report;
- ☐ Submission of a Remedial Action Report;

Check if included in updated RE

- ☐ The known concentration or extent of contamination in any medium has increased;
- ☐ A new AOC has been identified;
- ☐ A new receptor is identified;
- ☐ A new exposure pathway has been identified.

SECTION B. ON SITE AND SURROUNDING PROPERTY USE

1. Identify any sensitive populations/uses that are currently on-site or surrounding property usage within 200 feet of the site boundary (check all that apply):

	On-site	Off-site
None of the following	☒	☐
Residences or residential property	☐	☐
Public or Private Schools grades K-12	☐	☐
Child care centers	☐	☐
Public parks, playgrounds or other recreation areas	☐	☐
Other sensitive population use(s) Explain _____	☐	☐

If any of the above applies, attach a list of addresses, facility names, type of use, and a map depicting each location relative to the site.

2. Current site uses (check all that apply):

☐ Industrial ☐ Residential ☐ Commercial ☐ Agricultural
☐ School or child care ☐ Government ☐ Park or recreational use
☐ Vacant ☐ Other: _____

3. Planned future site uses and off-site use within 200 ft of site boundary (check all that apply):

☐ Industrial ☐ Residential ☐ Commercial ☐ Agricultural
☐ School or child care ☐ Government ☐ Park or recreational use
☐ Vacant ☐ Other: _____

Provide a map depicting the location of the proposed changes in land use.

SECTION C. DESCRIPTION OF CONTAMINATION

1. Identify if any of the following exist at the site (check all that apply):
   - ☐ Free product [N.J.A.C. 7:26E-1.8] identified is ☐ LNAPL* or ☐ DNAPL**. Date identified: _____
   - ☐ Residual product [N.J.A.C. 7:26E-1.8]
   - ☐ Other high concentration source materials not identified above (e.g., buried drums, containers, unsecured friable asbestos)

     Explain: _____

   * LNAPL – measured thickness of .01 feet or more

   **DNAPL – See US EPA DNAPL Overview

2. Soil Migration Pathway

   Has soil contamination been delineated to the applicable Direct Contact Soil Remediation Standard? ..... ☐ Yes ☐ No

   Are all soils either below the applicable Direct Contact Criteria or under an institutional control (i.e. deed notice)? ..... ☒ Yes ☐ No

3. If this evaluation is submitted with a technical document that includes contaminant summary information, proceed to Section D. Otherwise attach a brief summary of all currently available data and information to be included in the site investigation or remedial investigation report.

SECTION D. GROUND WATER USE

1. Has the requirement for ground water sampling been triggered? ..... ☐ Yes ☐ No ☐ Unknown
   If "No," proceed to Section F. If "Unknown," explain:

   _____

2. Is Ground water contaminated above the Ground Water Remediation Standards [N.J.A.C.7:9C]? ..... ☐ Yes ☐ No ☐ Unknown

   Or ☐ Awaiting laboratory data with the expected due date: _____

   If "Yes," provide the date that the laboratory data was available and confirmed contamination above the Ground Water Remediation Standards. Date: _____

   If "Unknown," explain: _____

   If "No," or awaiting laboratory data proceed to Section F.

3. Has ground water contamination been delineated to the applicable Remediation Standard? ..... ☐ Yes ☐ No
4. Has a well search been completed? ..... ☐ Yes ☐ No

   Date of most recent or updated well search: _____

   Identify if any of the following conditions exist based on the well search [N.J.A.C.7:26E-1.14(a)] (check all that apply):
   - ☐ Potable wells located within 500 feet from the downgradient edge of the currently known extent of contamination.
   - ☐ Potable well located 250 feet upgradient or 500 feet side gradient of the currently known extent of contamination.
   - ☐ Ground water contamination is located within a Tier 1 wellhead protection area (WHPA).

5. Is a completed Well Search Spreadsheet or historical well search table attached and has an electronic copy of the spreadsheet been submitted to srpgis_wrs@dep.state.nj.us. ..... ☐ Yes ☐ No

   If "No," explain: _____

6. Are any private potable or irrigation wells located within ½ mile of the currently known extent of contamination? ..... ☐ Yes ☐ No

   If "Yes," was a door to door survey completed? ..... ☐ Yes ☐ No

   If survey was not completed explain: _____

7. Has sampling been conducted of ☐ potable well(s) and /or ☐ non-potable use well(s)? ..... ☐ Yes ☐ No

   If "No," provide justification then proceed to Section E.

   _____

8 Has contamination been identified in potable well(s) above Ground Water Remediation Standards that is not suspected to be from the site? (If "Yes," provide justification) ..... ☐ Yes ☐ No

_____

9 Has contamination been identified in potable well(s) that is above the Ground Water Remediation Standards or Federal Drinking Water Standards? ..... ☐ Yes ☐ No

Provide date laboratory data was received: _____

Or ☐ awaiting laboratory data with the expected due date: _____

If "Yes" for potable well contamination **not attributable to background**, follow the IEC Guidance Document at http://www.nj.gov/dep/srp/guidance/index.html#iec for required actions and answer the following:

Has an engineered system response action been completed on all receptors? ..... ☐ Yes ☐ No

Provide a brief narrative description:

Date completed: _____ NJDEP Case Manager: _____

10. Were Non-potable use well(s) sampled and results were above Class II Ground Water Remediation Standards? ..... ☐ Yes ☐ No

Provide date laboratory data was received: _____

Or ☐ awaiting laboratory data with the expected due date: _____

11. Has the ground water use evaluation been completed? ..... ☐ Yes ☐ No

SECTION E. VAPOR INTRUSION (VI)

1. Contaminants present in ground water exceed the Vapor Intrusion Ground Water Screening Levels that trigger a VI evaluation. (see NJDEP Vapor Intrusion Technical Guidance). ... ☐ Yes ☐ No ☐ Unknown

Or ☐ Awaiting laboratory data and the expected due date: _____

Provide the date that the laboratory data was available and confirmed contamination above the Vapor Intrusion Trigger Levels. Date: _____

2. Other existing conditions that trigger a VI evaluation. (see NJDEP Vapor Intrusion Technical Guidance)

☐ Wet basement or sump containing free product or ground water containing volatile organics
☐ Methane generating conditions causing oxygen deficient or explosion concern
☐ Other human or safety concern from the VI pathway (i.e. elemental mercury, unsaturated contamination, elevated soil gas or indoor vapor (explain):

If you answered "No," or awaiting laboratory data to Question 1., *and* did not check any boxes in Question 2, proceed to Section F, "Ecological Receptors", otherwise complete the rest of this section.

3. Has ground water contamination been delineated to the applicable Ground Water Vapor Screening Level? ..... ☐ Yes ☐ No

4. Was a site specific screening level, modeling or other alternative approach employed for the VI pathway? ..... ☐ Yes ☐ No

5. Identify and locate on a scaled map any buildings/sensitive populations that exist within the following distances from ground water contamination with concentrations above the Vapor Intrusion Ground Water Screening Levels or specific threats (check all that apply):

☐ 30 feet of petroleum free product or dissolved petroleum hydrocarbon contamination in ground water
☐ 100 feet of any non-petroleum free product or any non-petroleum dissolved volatile organic ground water contamination
☐ No buildings exist within the specified distances

6. The vapor intrusion pathway is a concern at or adjacent to the site (if "No," attach justification) ..... ☐ Yes ☐ No

7. Has soil gas sampling of the building(s) been conducted? ☐ Yes ☐ No ☐ N/A
   If "No," or "N/A," proceed to #10

8. Has indoor air sampling been conducted at the identified building(s)? ☐ Yes ☐ No
   If "No," proceed to #10

9 Has indoor air contamination been identified but not suspected to be from the site?
   (if "Yes," attach justification) ☐ Yes ☐ No

10. Indoor air results were above the NJDEP's Rapid Action Levels. ☐ Yes ☐ No

    Provide the date that the laboratory data was available and confirmed contamination above the Rapid Action Levels. Date: _____

    Or ☐ Awaiting laboratory data with the expected due date: _____

    If "Yes" to #8 above, follow the IEC Guidance Document at http://www.nj.gov/dep/srp/guidance/index.html#iec **for required actions.**

    The IEC engineering system response for control was implemented for all identified structures ☐ Yes ☐ No

    Date: _____ NJDEP Case Manager: _____

11. Indoor air sampling was conducted and results were above the NJDEP's Indoor Air Screening Levels but at or below the Rapid Action Levels ☐ Yes ☐ No

    Provide the date that the laboratory data was available. Date: _____

    Or ☐ Awaiting laboratory data with the expected due date: _____

    If "Yes" to #10 above, answer the following:

    Has the Vapor Concern (VC) Response Action Form notifying the NJDEP of the exceedances been submitted? ☐ Yes ☐ No
    Date: _____

    Has a plan to mitigate and monitor the exposure been submitted? ☐ Yes ☐ No
    Date: _____

    Has the Mitigation Response Action Report been submitted? ☐ Yes ☐ No
    Date: _____

12. Has the vapor intrusion investigation been completed? ☐ Yes ☐ No
    If "No", is the vapor intrusion investigation stepping out as part of the site investigation or remedial investigation. (If "No," attach justification) ☐ Yes ☐ No

SECTION F. ECOLOGICAL RECEPTORS

1. Has an Ecological Evaluation (EE) has been conducted? [N.J.A.C. 7:26E-1.16] ☐ Yes ☐ No

   Date conducted: _____

2. Do the results of an EE trigger a remedial investigation of ecological receptors? [N.J.A.C. 7:26E-4.8]. ☐ Yes ☐ No

3. Has a remedial investigation of ecological receptors been conducted? ☐ Yes ☐ No

   Date conducted: _____

4. Provide the name(s) of any surface water body on or within 200 feet of the site:

   _____

5. Is free product or residual product located within 100 feet from an ecological receptor? ☐ Yes ☐ No

6. Available data indicate an impact on: ☐ Ecological receptor(s) ☐ Surface water ☐ Sediment

   If this evaluation is submitted with a technical document that includes contaminant summary information, proceed to Section G. Otherwise attach a description of the type of contamination and provide a schedule and a description of all actions to be taken to mitigate exposure

SECTION G. PERSON RESPONSIBLE FOR CONDUCTING THE REMEDIATION INFORMATION AND CERTIFICATION

Full Legal Name of the Person Responsible for Conducting the Remediation: NJ Dept. of Military and Veteran's Affairs

Representative First Name: Frank Representative Last Name: Kirby

Title: Chief, Environmental Management Bureau

Phone Number: (609) 530-7135 Ext: Fax: (609) 445-9880

Mailing Address: 101 Eggerts Crossing Road

City/Town: Lawrenceville State: NJ Zip Code: 08648

Email Address: frank.kirby@us.army.mil

This certification shall be signed by the person responsible for conducting the remediation who is submitting this notification in accordance with Administrative Requirements for the Remediation of Contaminated Sites rule at N.J.A.C. 7:26C-1.5(a).

I certify under penalty of law that I have personally examined and am familiar with the information submitted herein, including all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, to the best of my knowledge, I believe that the submitted information is true, accurate and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute, I am personally liable for the penalties.

Signature: Frank Kirby Date: 14 Aug 12

Name/Title: Frank Kirby, Chief, Environmental Management Bureau **No Changes Since Last Submittal** ☐

SECTION H. LICENSED SITE REMEDIATION PROFESSIONAL INFORMATION AND STATEMENT

LSRP ID Number: 575610

First Name: Richard Last Name: Jasaitis

Phone Number: (609) 584-5271 Ext: 490 Fax: (609) 584-7498

Mailing Address: 3 AAA Drive, First Floor

City/Town: Hamilton State: NJ Zip Code: 08691

Email Address: rjasaitis@kleinfelder.com

This statement shall be signed by the LSRP who is submitting this notification in accordance with SRRA Section 16 d. and Section 30 b.2.

I certify that I am a Licensed Site Remediation Professional authorized pursuant to N.J.S.A. 58:10C to conduct business in New Jersey. As the Licensed Site Remediation Professional of record for this remediation, I:

[SELECT ONE OR BOTH OF THE FOLLOWING AS APPLICABLE]:

☐ *directly oversaw and supervised all of the referenced remediation, and\or*

☒ *personally reviewed and accepted all of the referenced remediation presented herein.*

I believe that the information contained herein, and including all attached documents, is true, accurate and complete.

It is my independent professional judgment and opinion that the remediation conducted at this site, as reflected in this submission to the Department, conforms to, and is consistent with, the remediation requirements in N.J.S.A. 58:10C-14.

My conduct and decisions in this matter were made upon the exercise of reasonable care and diligence, and by applying the knowledge and skill ordinarily exercised by licensed site remediation professionals practicing in good standing, in accordance with N.J.S.A. 58:10C-16, in the State of New Jersey at the time I performed these professional services.

I am aware pursuant to N.J.S.A. 58:10C-17 that for purposely, knowingly or recklessly submitting false statement, representation or certification in any document or information submitted to the board or Department, etc., that there are significant civil, administrative and criminal penalties, including license revocation or suspension, fines and being punished by imprisonment for conviction of a crime of the third degree.

1.0 INTRODUCTION

Kleinfelder East, Inc. (Kleinfelder) has been contracted by the New Jersey Department of Military and Veteran's Affairs (NJDMAVA) to prepare a *Site Investigation Report (*SIR*)* for the West Trenton Aviation Armory (the Site). The Site is located at the Mercer County Airport on Scotch Road, West Trenton, Mercer County, New Jersey.

In accordance with New Jersey Administrative Code (N.J.A.C.) 7:26E-3.13 and the *Remedial Investigation Summary Report/Remedial Investigation Workplan*, this report summarizes the environmental activities conducted to date, the Site Investigation (SI) activities conducted in March 2012, and provides data to support a Response Action Outcome (RAO) for the 550-gallon waste oil underground storage tanks (USTs), historically known as the E3 and E5 USTs.

1.1 Site Activity Chronology

The following chronology was developed through a review of NJDMAVA records and interviews with NJDMAVA personnel. The chronology presents an overview of environmental activities performed at the Site related to the removal of the USTs.

2/95 - Approval was granted to the NJDMAVA by the New Jersey Department of Environmental Protection (NJDEP) (Closure approval #C95-0124) to close and remove three USTs at the Site: one 550-gallon waste oil UST referred to in the closure request as E5 but shown on the accompanying plan as tank E3, one 2,000-gallon gasoline UST E1, and one 2,000-gallon diesel UST E2. No closure report was prepared to document the removal of these three tanks in 1995. Based upon interviews with NJDMAVA personnel, USTs E1 and E2 were replaced with new tanks in the same location using the same UST designation numbers.

7/98 - Due to changes in the UST regulations, the USTs installed in 1995 had to be removed in order to comply with the new regulations. Approval was granted to the NJDMAVA by the NJDEP (Closure approval numbers N98-0624 and N98-0625) to close and remove seven USTs at the Site. Closure approval #N98-0624 was for one 550-gallon waste oil tank (E5), and two 10,000 gallon aviation fuel tanks (00E6 and 00E7). Closure approval #N98-0625 was for the removal of one 550-gallon waste oil tank E3, one 2,000-gallon gasoline tank E1, one 2,000-gallon diesel tank E2, and one 2,000-gallon heating oil tank, designated as E4. The November 2000 *Underground Storage Tank Remedial Investigation Report* (USTRIR) details the removal of three tanks, E1, E2, and E4 (identified in the report as a 10,000-gallon tank). The closure report did not include any information on the closure and removal of UST E3.

- Tanks E1 and E2 were removed on July 20, 1998. Staining and elevated photoionization detector (PID) readings were noted in the soils surrounding USTs E1 and E2 during tank closure/removal. Soils were excavated until field screening indicated that impacted soils had been removed. Seven soil samples (S-1 through S-7) were collected from the sidewalls of the excavation of UST E2 and the associated dispenser and analyzed for total petroleum hydrocarbons (TPH). Seven soil samples (S-8 through S-14) were collected from the sidewalls of the excavation of UST E1 and analyzed for volatile organic compounds (VOCs) and lead. In addition, four temporary groundwater monitoring points (W-1 through W-4) were installed in the vicinity of USTs E1 and E2, and groundwater samples were collected and analyzed for VOCs and base neutral compounds (BNs). The results of the soil and groundwater sampling indicated that concentrations of targeted analytes in the samples were below the NJDEP Soil Cleanup Criteria (SCC) (the regulation in effect at that time) and Ground Water Quality Standards (GWQS).

8/98 - The 10,000-gallon heating oil UST (E4) was removed on August 19, 1998. Staining was noted in the excavation. Soils were excavated until field screening indicated that impacted soils had been removed. No soil or groundwater samples were collected at the time of the tank removal.

Copyright 2012 Kleinfelder
All Rights Reserved

- Approximately 1,299.6 tons of soil were excavated and removed from the Site. The NJDEP was notified of a potential release and case number 98-08-21-1407-53 was assigned.
- A 10,000 gallon capacity No. 2 heating oil tank was installed on August 1, 1998 and is designated 00E8. This tank is currently in-use.

1/99 NJDMAVA records indicate two 10,000 gallon capacity aviation fuel tanks (00E6 and 00E7) were removed on January 13, 1999. These tanks were removed under closure approval N98-0624.

11/00 - Seven soil borings (SW-1 through SW-6 and SW-PS) were advanced around the former heating oil UST (E4) area. One sample was collected from each boring and analyzed for TPH. In addition, one temporary groundwater monitoring point (MP-1) was advanced in the center of the excavation. A groundwater sample was collected and analyzed for VOCs and BNs. The results of the soil and groundwater sampling indicated that concentrations of targeted analytes in the samples were below the NJDEP SCC and GWQS.

12/00 - An USTRIR was submitted to the NJDEP requesting No Further Action (NFA) for USTs E1, E2, and E4.

4/01 - A letter was received from NJDEP granting NFA at the site for tanks E1, E2, E4, 00E6 and 00E7. The NFA letter is enclosed in **Appendix A**.

6/01 - According to the Site UST registration records, two 550-gallon waste oil USTs (E3 and E5) were removed from the site on or about June 1, 2001. Tank E3 was removed under closure approval N98-0625 and tank E5 was removed under closure approval N98-0624. There is no other documentation associated with these removals.

8/08 - Six monitoring wells, previously installed onsite to evaluate the tank closures, were abandoned as required by the April 2001 NFA letter. No information was found in the NJDMAVA files to document the installation or testing results of these wells.

1/10 - NJDMAVA was notified by the NJDEP in an e-mail from Rafael Rivera that USTs E3 and E5 were not included in the April 2001 NFA, and that a report for these two tanks was still required. This e-mail is enclosed in **Appendix A**.

3/12 - Five soil borings (SB-1 through SB-5) were advanced to investigate the former E3 and E5 UST locations since no end-point soil or groundwater samples were collected from the tank excavations. Historic figures show UST E5 in two different locations. Therefore, soil borings were advanced in both of the locations identified in the historic figures. The active underground flow-through process tank is located in one of the historic UST E5 locations, south of the Service Building. Samples were collected from each boring and analyzed for extractable petroleum hydrocarbons (EPH). Due to the detection of EPH in samples SB-1 (4.5-5.0) at 63 milligrams per kilogram (mg/kg) and SB-1 (9.0-9.5) at 75 mg/kg, one sample, SB-1 (9.0-9.5), was analyzed for additional contingency analyses listed in Table 2-1 of N.J.A.C. 7:26E for waste oil parameters. The results indicated that concentrations of targeted analytes were below the NJDEP Default Impact to Groundwater Soil Remediation Standards (DIGWSRS).

1.2 Remediation Standards

During the March 2012 soil sampling event EPH was analyzed for with the contingency that 25% of the samples where EPH is detected were also analyzed for Target Compound List (TCL) Volatile Organics plus Tentatively Identified Compounds (VO+TICs), TCL Base Neutrals+TICs (BN+TICs), Polychlorinated Biphenyls (PCBs) and Target Analyte List (TAL) Metals. The NJDEP DIGWSRS was used as soil quality cleanup goals for this Site. The DIGWSRS for those compounds detected in soil samples are listed in **Table 1**.

2.0 PHYSICAL CHARACTERISTICS OF THE SITE AND SITE AREA

The information presented within the following report is in accordance with N.J.A.C. 7:26E-3.13.

2.1 General Site Description

The Site is located on Scotch Avenue in a commercial/industrial section of West Trenton, Mercer County, New Jersey, as part of the Mercer County Airport Complex. The Site contains three buildings; one two-story building with a basement and two one-story buildings used for storage and vehicle maintenance. The Site is currently operating as a National Guard Army Aviation Support Facility, with one 10,000-gallon fiberglass-reinforced plastic #2 heating oil UST, one flow-through process tank and two 10,000-gallon concrete and steel aviation fuel above-ground storage tanks (ASTs). A Topographic Map on an annotated section of a United States Geological Survey (USGS) 7.5 minute series topographic quadrangle map and a Site Plan are presented as **Figures 1 and 2**, respectively.

A majority of the property is covered with asphalt or concrete including the Site buildings, paved parking lots, driveways, aircraft and helicopter taxi areas, and staging areas. There are landscaped areas located adjacent to the Site buildings, and around the fenced perimeter of the airport facility. The general location and orientation of pertinent Site features are depicted on **Figure 2**

Seven USTs are known to have been historically located at the Site. The following is a summary of the USTs formal name, size, contents, date of removal and the NJDEP closure approval number.

Tank Designation	Tank Capacity (in gallons)	Tank Contents	Date Removed	NJDEP Closure Approval Number
E1	2,000	Gasoline	7/20/98	N98-0625
E2	2,000	Diesel	7/20/98	N98-0625
E3	550	Waste Oil	6/1/01	N98-0625
E4	10,000	Heating Oil	8/19/98	N98-0625
E5	550	Waste Oil	6/1/01	N98-0624
00E6	10,000	JP8 Aviation Fuel	1/13/99	N98-0624
00E7	10,000	JP8 Aviation Fuel	1/13/99	N98-0624

2.2 Site Topography and Drainage

The subject Site is generally level and is located at an elevation of approximately 170 feet referenced to the North American Vertical Datum of 1988 (NAVD 88). The majority of the subject property is covered by asphalt and concrete, directing surface runoff to sewer grates on the Site which tie to the municipal storm water conveyance system located along the shoulder of Scotch Road.

2.3 Regional Geologic and Hydrogeologic Settings and Surface Water Bodies

The Site and surrounding area are located in the Piedmont physiographic province and are underlain by bedrock of the Lockatong Formation. The Lockatong Formation consists of lacustrine sequences of greenish-grey to black argillite, laminated mudstone, sandstone, and siltstone, with limestone intrusions (Owens, et al.).

Copyright 2012 Kleinfelder
All Rights Reserved

Groundwater in the region is stored within the Lockatong Formation. The Lockatong aquifer stores and transmits groundwater within fractures. Water is commonly fresh, slightly alkaline, non-corrosive and hard. Wells in this aquifer have shown a tendency to produce groundwater at below-average rates. (Herman, et al.).

Surface water bodies within one-half mile of the site include the West Branch Shabakunk Creek (Intermediate) and the West Branch Shabakunk Creek Tributary (Stream). These water bodies ultimately flow into the Delaware River are located approximately 300 feet east and 1,150 feet south of the Site, respectively. A man-made retention pond, which drains into the West Branch Shabakunk Creek, is located approximately 200 feet east of the site (**Figures 1 and 2**).

3.0 TECHNICAL OVERVIEW

The following sections present a general profile of the site investigation execution and results.

3.1 Description of Areas of Concern (AOCs) at the Site

The remaining AOCs to be addressed at the Site are the aforementioned former waste oil USTs E3 and E5. These AOCs are addressed in the following sections.

3.1.1 Summary of Historical Investigations Associated with AOCs

Kleinfelder conducted a file search at the NJDMAVA Lawrenceville, New Jersey office on July 8, 2011 and a Site visit at the West Trenton Aviation Armory on July 11, 2011. While conducting the file search, Kleinfelder also interviewed employees at the NJDMAVA office who had historical knowledge of the tank removal activities.

There is little written documentation regarding the USTs at the Site, therefore interviews with NJDMAVA personnel have been used to fill the data gaps. Based on interviews with NJDMAVA personnel, it is believed that a UST upgrade was conducted in 1995 where USTs E1 and E2 were removed and replaced with identically sized tanks that retained the E1 and E2 tank designations.

Excerpts from the November 2000 USTRIR and the UST table obtained during the file review were included in the *Remedial Investigation Summary Report/Remedial Investigation Workplan* submitted to the NJDEP by Kleinfelder in October 2011. According to this report prepared by Castlton Environmental Contractors, one 2,000-gallon gasoline UST (E1), one 2,000-gallon diesel UST (E2), and one 10,000-gallon heating oil UST (E4) were excavated and removed from the Site between July and August, 1998. No reference to either of the 550-gallon waste oil USTs (E3 and E5) is included in this report. However, figures included depict E5, but do not depict E3. There has been some supposition that tank E3 was removed during the 1995 tank removal and not re-installed. It is unlikely that E3 existed in the space between E1 and E2, based upon the size of the associated excavation and Sampling Location Map. However, NJDEP records indicate that USTs E3 and E5 were removed on or about June 1, 2001. No additional documentation has been found detailing the tank removal activities, including end-point sample analytical results. Similarly, formal decommissioning activity documentation for E5 was not found, although internal NJDMAVA records indicate a removal date of June 8, 2001 and an installation date of 2001 for an active flow-through process tank. Based on interviews conducted with NJDMAVA personnel, the active flow-through process tank was installed at the same time as the tank removal and in the same location of the former E5 UST.

3.1.2 Post-Excavation Sampling Results

Between July 1998 and November 2000, post-excavation samples were collected from the areas of the excavations of USTs E1, E2, and E4 and analyzed for one or more of the following: TPH, VOCs, and

Copyright 2012 Kleinfelder
All Rights Reserved

lead. According to the November 2000 USTRIR, no targeted compounds were detected above the applicable NJDEP SCC. Available soil sample results obtained from the file review are presented on **Table 1**.

Groundwater samples were collected from temporary well points installed near the limits of the E1 and E2 excavations in July 1998 and within the E4 excavation boundary in November 2000. Groundwater samples were analyzed for VOCs and BNs. According to the USTRIR, no targeted compounds were detected above the applicable NJDEP GWQS. Available groundwater sample results obtained from the file review are presented on **Table 2**. Soil and groundwater sampling locations are depicted on **Figure 3**.

Based on the data presented in the November 2000 USTRIR, the NJDEP has granted unconditional NFA approval for USTs E1, E2, E4, 00E6 and 00E7. It is unclear if another report documenting the tank removal activities at 00E6 and 00E7 was submitted to the NJDEP prompting their inclusion on the NFA approval.

No documentation has been found concerning the removal of USTs E3 and E5. In addition, historic figures show UST E5 in two different locations. Therefore, the investigation program included soil borings advanced in both of the locations identified in the historic figures. The active underground flow-through process tank is located in one of the historic UST E5 locations, south of the Service Building. Activities were conducted in March 2012 to investigate E3 and E5 and are discussed in **Section 3.2** of this report.

3.2 March 2012 Investigation Activities Associated with AOCs

Kleinfelder conducted a geophysical investigation and advanced soil borings to investigate the former E3 and E5 waste oil UST locations in March 2012. The following sections summarize these activities.

3.2.1 Geophysical Investigation

A Senior Geophysicist from Delta Geophysics, Inc. (Delta), of Catasauqua, Pennsylvania conducted a geophysical investigation to determine if tanks were present in the former E3 and E5 UST locations on March 1, 2012. Ground Penetrating Radar (GPR), Electromagnetic (EM) and Radiodetection (RD) equipment were used to characterize the subsurface conditions in the areas identified by the Kleinfelder representative on-site.

Findings of the survey indicated no USTs were present in the former E3 and E5 locations, but that an anomaly indicative of a fiberglass UST was present south of the Service Building. This fiberglass UST is the active 550-gallon double walled flow-through process tank described in **Section 2.1** of this report. No other sub-surface evidence of USTs in the E3 and E5 locations was found.

3.2.2 Soil Boring Activities

Kleinfelder advanced soil borings SB-1 through SB-5 to investigate possible locations of the former E3 and E5 550-gallon waste oil USTs on March 7, 2012 (**Figure 3**). The locations were advanced as proximal to the USTs as possible with consideration of underground and overhead utilities. Personnel from Uni-Tech Drilling Company, Inc. (Uni-Tech) of Franklinville, New Jersey advanced the borings to bedrock refusal using direct push technology. Bedrock was encountered at depths ranging between 9.5 to 12.5 feet below ground surface (bgs). Soil boring logs are included in **Appendix B**.

Soil samples were collected in accordance with the August 2005 NJDEP Field Sampling Procedures Manual from the 6-inch depth interval exhibiting either the greatest evidence of contamination based on field screening observations or the depth of groundwater. The samples were analyzed for EPH with additional analysis for TCL VO+TICs, TCL BN+TICs, PCBs and TAL Metals analysis for 25% of the

Copyright 2012 Kleinfelder
All Rights Reserved

samples with EPH detection in accordance with N.J.A.C. 7:26E Table 2-1. The samples were analyzed by TestAmerica, Inc. (TestAmerica), of Edison, New Jersey (NJ Certification 12028).

Six soil samples were collected and analyzed for EPH analysis. Two of the samples, SB-1 (4.5-5.0) and SB-1 (9.0-9.5) contained detectable concentrations of EPH at 63 mg/kg and 75 mg/kg, respectively. Concentrations of EPH in samples collected from SB-2, SB-3, SB-4 and SB-5 were non-detect. Contingency VO+TICs, BN+TICs, PCB and TAL Metals analysis was conducted on soil sample SB-1 (9.0-9.5). VO+TICs analysis detected acetone at 0.020B mg/kg, isopropylbenzene at 0.00076J mg/kg and toluene at 0.00016J mg/kg, all were below the NJDEP DIGWSRSs. BN+TICs analysis detected fluorine at 0.092J mg/kg, below the DIGWSRSs. PCBs were not detected. Of the 23 metal analytes analyzed for, 19 were detected, and all were detected below the DIGWSRSs. The DIGWSRS for those compounds detected in soil samples are listed in **Table 1**. The complete laboratory report is included in **Appendix C**.

4.0 SUMMARY AND CONCLUSIONS

The geophysical investigation indicated that USTs E3 and E5 are no longer present at the Site. It is believed that the USTs were removed from the Site during the activities summarized in **Section 3.1.1.** The soil boring investigation confirmed that subsurface soils have not been impacted at the former E3 or E5 locations.

Since the AOCs have not impacted the subsurface soils at the Site, neither a baseline ecological evaluation (BEE) nor a well search is being conducted at this time.

The soil boring activities conducted in March 2012 indicate waste oil specific compounds were either not detected or were detected at concentrations below the NJDEP DIGWSRS (**Table 1**). An RAO for the former USTs E3 and E5 is submitted in conjunction with this report.

limited number of observations and data. It is possible that conditions could vary between or beyond the data evaluated. Kleinfelder makes no other representation, guarantee or warranty, express or implied, regarding the services, communication (oral or written), report, opinion, or instrument of service provided.

This report may be used only by the Client and the registered design professional in responsible charge and only for the purposes stated for this specific engagement within a reasonable time from its issuance, but in no event later than two (2) years from the date of the report.

Kleinfelder offers various levels of investigative and engineering services to suit the varying needs of different clients. It should be recognized that definition and evaluation of geologic and environmental conditions are a difficult and inexact science. Judgments leading to conclusions and recommendations are generally made with incomplete knowledge of the subsurface conditions present due to the limitations of data from field studies. Although risk can never be eliminated, more-detailed and extensive studies yield more information, which may help understand and manage the level of risk.

Ewing Township, Mercer County
Block: 373 Lot: 7
Case #s 91-04-09-1438, 98-08-21-1407-53, UST # 0006716, Closure #s N98-0624, N98-0625

Dear Mr. Arrighi:

Pursuant to N.J.S.A. 58:10B-13.1 and N.J.A.C. 7:26C, the New Jersey Department of Environmental Protection (Department) makes a determination that no further action is necessary for the remediation of the area(s) of concern as specifically referenced above, except as noted below, so long as the NJ Department of Military & Veterans Affairs did not withhold any information from the Department. This action is based upon information in the Department's case file and the NJ Department of Military & Veterans Affairs' final certified report dated November 2000 and all addenda. In issuing this No Further Action Determination and Covenant Not to Sue, the Department has relied upon the certified representations and information provided to the Department.

By issuance of this No Further Action Determination, the Department acknowledges the completion of a Remedial Investigation pursuant to the Technical Requirements for Site Remediation (N.J.A.C. 7:26E) for the removal of one 2,000 gallon diesel fuel underground storage tank system (UST)[E1], one 2,000 gallon gasoline UST [E2], one 10,000 gallon #2/#4/#6 fuel oil UST [E4], two 10,000 gallon JP-8 aviation fuel USTs [E6 & E7], and no other areas.

NO FURTHER ACTION CONDITIONS

As a condition of this No Further Action Determination pursuant to N.J.S.A. 58:10B-12o, the **NJ Department of Military & Veterans Affairs** and any other person who was liable for the cleanup and removal costs, and remains liable pursuant to the Spill Act, shall inform the Department in writing within 14 calendar days whenever its name or address changes.

The **NJ Department of Military & Veterans Affairs** as well as each subsequent owner, lessee and operator (collectively Successors) shall comply with each of the following:

McBride, William C.

From: Rafael Rivera [Rafael.Rivera@dep.state.nj.us]
Sent: Tuesday, January 12, 2010 2:04 PM
To: McBride, William C.
Subject: Re: Additional Follow Up

PI #000671 (West Trenton)

According to our records case #06-09-07-1404-46 was referred to the County Health Department. Therefore, no further action is required.

An NFA was issued for case #91-04-09-1438 on 4/9/01 which included the closure of a 2000 diesel, 2000 gas, 10,000 #2/4/6 oil, and 2-10,000 gallon Aviation fuel USTs. However, the waste oil USTs were not part of the NFA according to our records.

Registration indicates two waste oil USTs (E3 and E5) were removed 6/1/01 which was after the NFA above was issued. A report has not been received for the two waste oil USTs.

Requirement: Submittal of a report for USTs E3 and E5.

PI #000693 (Woodstown)

The check submitted by the contractor had insufficient funds and was never re-submitted. Registration has to be updated to reflect the 3,000 gallon UST was a diesel UST not a gasoline UST. Registration currently list the UST as a gas UST(E1).

Requirement: Submit a check made out to the Treasurer State of New Jersey for the amount of $500.00 to replace the check that bounced from Active Oil. Submit an underground storage tank facility certification questionnaire to make the change(E1) from a gas to a diesel UST.

PI #000665 (Freehold)

According to our database there's no outstanding issues.

NFA issued 9/9/08 for NO4-2907 (5,000 gallon heating oil UST) NFA issued 9/8/05 for N02-1757 (550 heating oil UST) NFA issued 4/15/97 for Case #95-04-12-1345-32 (2000 gas and 3000 diesel)

If you need a copy of Feb 26 08 NOD you will be required to submit an OPRA request since the files have been archived.

Requirement: None

I'm currently looking into UTES/Ft. Dix and will update you on the deficiencies.

Client: Kleinfelder Inc

Project: West Trenton- NJDHAVA

Report Number: 460-37697-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 03/08/2012; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 2.9C and 3.5C.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

TOTAL METALS

Sample 460-37697-2 was analyzed for total metals in accordance with EPA SW-846 Method 6010B. The samples were prepared on 03/16/2012 and analyzed on 03/18/2012.

Aluminum and Iron failed the recovery criteria high for the MS of sample 460-37760-40 in batch 460-106422.

Refer to the QC report for details.

Sample 460-37697-2(4X) required dilution prior to analysis. The reporting limits have been adjusted accordingly.

As a standard practice all soil samples and related QC samples (i.e., MB, LCS, Dup, MS, SD) are diluted 2X-4X prior to analysis. Further dilutions may be required dependent upon analyte levels in the samples. Refer to the analytical results forms for dilutions.

No other difficulties were encountered during the metals analysis.

All other quality control parameters were within the acceptance limits.

TOTAL MERCURY

Sample 460-37697-2 was analyzed for total mercury in accordance with EPA SW-846 Method 7471A. The samples were prepared and analyzed on 03/19/2012.

No difficulties were encountered during the mercury analysis.

All quality control parameters were within the acceptance limits.

POLYCHLORINATED BIPHENYLS (PCBS)

Sample 460-37697-2 was analyzed for polychlorinated biphenyls (PCBs) in accordance with EPA SW-846 Method 8082. The samples were prepared on 03/16/2012 and analyzed on 03/18/2012.

No difficulties were encountered during the PCBs analysis.

All quality control parameters were within the acceptance limits.

VOLATILE ORGANIC COMPOUNDS (GC-MS)
Sample 460-37697-2 was analyzed for volatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8260B. The samples were prepared on 03/08/2012 and analyzed on 03/20/2012.

Acetone and/or Methylene Chloride were detected in method blanks LB3 460-105132/1-A, MB 460-106441/5 , MB 460-106657/5 at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged.

The laboratory control sample duplicate (LCSD) for batch 106441 exceeded control limits for Chlorobromomethane. This analyte was biased high in the LCSD and was not detected in the associated sample; therefore, the data have been reported.

No other difficulties were encountered during the volatiles analysis.

All other quality control parameters were within the acceptance limits.

SEMIVOLATILE ORGANIC COMPOUNDS (GC-MS)
Sample 460-37697-2 was analyzed for semivolatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8270C. The samples were prepared on 03/16/2012 and analyzed on 03/20/2012.

The matrix spike / matrix spike duplicate (MS/MSD) recoveries for batch 106026 were outside control limits. The %RPD was outside control limits for Caprolactam. The associated laboratory control sample (LCS) recovery met acceptance criteria.

The presence of the '4' qualifier in the report indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount.

Refer to the QC report for details.

No other difficulties were encountered during the semivolatiles analysis.

All other quality control parameters were within the acceptance limits.

PERCENT SOLIDS
Samples 460-37697-1 through 460-37697-12 were analyzed for percent solids in accordance with ASTM D2974-87 Modified. The samples were analyzed on 03/09/2012 and 03/10/2012.

No difficulties were encountered during the % solids analyses.

All quality control parameters were within the acceptance limits.

EXTRACTABLE PETROLEUM HYDROCARBONS (EPH)
Samples 460-37697-1, 460-37697-2, 460-37697-4, 460-37697-6, 460-37697-8, 460-37697-10 and 460-37697-11 were analyzed for extractable petroleum hydrocarbons (EPH) in accordance with NJDEP EPH. The samples were prepared on 03/09/2012 and analyzed on 03/11/2012.

No difficulties were encountered during the NJEPH analyses.

All quality control parameters were within the acceptance limits.

EXTRACTABLE PETROLEUM HYDROCARBONS (EPH)
Sample 460-37697-13 was analyzed for extractable petroleum hydrocarbons (EPH) in accordance with NJDEP EPH. The samples were prepared on 03/12/2012 and analyzed on 03/14/2012.

No difficulties were encountered during the NJEPH analysis.

All quality control parameters were within the acceptance limits.

DATA REPORTING QUALIFIERS

Client: Kleinfelder Inc Job Number: 460-37697-1

Lab Section	Qualifier	Description
GC/MS VOA		
	B	Compound was found in the blank and sample.
	J	Indicates an Estimated Value for TICs
	U	Indicates the analyte was analyzed for but not detected.
	*	Recovery or RPD exceeds control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
GC/MS Semi VOA		
	J	Indicates an Estimated Value for TICs
	U	Indicates the analyte was analyzed for but not detected.
	F	MS/MSD Recovery or RPD exceeds the control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	A	The tentatively identified compound is a suspected aldol-condensation product.
	N	This flag indicates the presumptive evidence of a compound.
GC Semi VOA		
	U	Indicates the analyte was analyzed for but not detected.
Metals		
	U	Indicates the analyte was analyzed for but not detected.
	4	MS, MSD: The analyte present in the original sample is 4 times greater than the matrix spike concentration; therefore, control limits are not applicable.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Als bottle: 2 QC Sample: METHSPIKE
Dil Factor: 1.00000
Integrator: HP RTE Compound Sublist: all.sub
Target Version: 3.50
Processing Host: hpd2

Concentration Formula: Amt * DF * ((Vt/Ws)/((100-M)/100)) * CpndVariable

Name	Value	Description
DF	1.00000	Dilution Factor
Vt	5.00000	Volume of final extract (mL)
Ws	5.00000	Weight of sample extracted (g)
M	0.00000	% Moisture (not decanted)

Cpnd Variable Local Compound Variable

Meth Date : 12-Mar-2012 14:31 monica Quant Type: ISTD
Cal Date : 12-MAR-2012 12:28 Cal File: p25016.d
Als bottle: 3 Calibration Sample, Level: 5
Dil Factor: 1.00000
Integrator: HP RTE Compound Sublist: all.sub
Target Version: 3.50
Processing Host: hpd1

Concentration Formula: Amt * DF * Uf*1000*Vt/(Ws*(100-M)/100) * CpndVariable

Name	Value	Description
DF	1.00000	Dilution Factor
Uf	1.00000	ng unit correction factor
Vt	1.00000	Volume of final extract (ml)
Ws	15.00000	Weight of sample extracted (g)
M	0.00000	% Moisture

Cpnd Variable Local Compound Variable

QC Flag Legend

a - Target compound detected but, quantitated amount
    Below Limit Of Quantitation(BLOQ).
R - Spike/Surrogate failed recovery limits.
M - Compound response manually integrated.

QC Flag Legend

a - Target compound detected but, quantitated amount
    Below Limit Of Quantitation(BLOQ).
A - Target compound detected but, quantitated amount
    exceeded maximum amount.
R - Spike/Surrogate failed recovery limits.
M - Compound response manually integrated.
H - Operator selected an alternate compound hit.

QC Flag Legend

a - Target compound detected but, quantitated amount
    Below Limit Of Quantitation(BLOQ).
A - Target compound detected but, quantitated amount
    exceeded maximum amount.
R - Spike/Surrogate failed recovery limits.
M - Compound response manually integrated.

Melyssa Garcia:

Thank you for your data request regarding rare species information for the above referenced project site.

Searches of the Natural Heritage Database and the Landscape Project (Version 3.4) are based on a representation of the boundaries of your project site in our Geographic Information System (GIS). We make every effort to accurately transfer your project bounds from the map(s) submitted with the Natural Heritage Data Request Form into our GIS. We do not typically verify that your project bounds are accurate or check them against other sources.

We have checked the Landscape Project habitat mapping for occurrences of any rare wildlife species or wildlife habitat on the referenced site. The Natural Heritage Biotics Database was searched for occurrences of rare plant species or ecological communities that may be on the project site. Please refer to Table 1 (attached) to determine if any rare plant species, ecological communities, or rare wildlife species or wildlife habitat are documented on site. A detailed report is provided for each category coded as 'Yes' in Table 1.

We have also checked the Landscape Project habitat mapping for occurrences of rare wildlife species or wildlife habitat in the immediate vicinity (within ¼ mile) of the referenced site. Additionally, the Natural Heritage Biotics Database was checked for occurrences of rare plant species or ecological communities within ¼ mile of the site. Please refer to Table 2 (attached) to determine if any rare plant species, ecological communities, or rare wildlife species or wildlife habitat are documented within the immediate vicinity of the site. Detailed reports are provided for all categories coded as 'Yes' in Table 2. These reports may include species that have also been documented on the project site.

We have also checked the Landscape Project habitat mapping for all occurrences of rare wildlife species or wildlife habitat within one mile of the referenced site. Please refer to Table 3 (attached) to determine if any rare wildlife species or wildlife habitat is documented within one mile of the project site. Detailed reports are provided for each category coded as 'Yes' in Table 3. These reports may include species that have also been documented on the project site.

For requests submitted in order to make a riparian zone width determination as part of a Flood Hazard Area Control Act (FHACA) rule application, we report records for all rare plant species and ecological communities tracked by the Natural Heritage Program that may be on, or in the immediate vicinity of, your project site. A subset of these plant species is also covered by the FHACA rules when the records are located within one mile of the project site. One-mile searches for FHACA plant species will only report precisely located occurrences for those wetland plant species identified under the FHACA regulations as being critically dependent on the watercourse. Please refer to Table 3 (attached) to determine if any

precisely located rare wetland plant species covered by the FHACA rules have been documented. Detailed reports are provided for each category coded as 'Yes' in Table 3. These reports may include species that have also been documented on, or in the immediate vicinity of, the project site.

The Natural Heritage Program reviews its data periodically to identify priority sites for natural diversity in the State. Included as priority sites are some of the State's best habitats for rare and endangered species and ecological communities. Please refer to Tables 1, 2 and 3 (attached) to determine if any priority sites are located on, in the immediate vicinity, or within one mile of the project site.

A list of rare plant species and ecological communities that have been documented from the county (or counties), referenced above, can be downloaded from https://nj.gov/dep/parksandforests/natural/heritage/database.html. If suitable habitat is present at the project site, the species in that list have potential to be present.

Status and rank codes used in the tables and lists are defined in EXPLANATION OF CODES USED IN NATURAL HERITAGE REPORTS, which can be downloaded from https://nj.gov/dep/parksandforests/natural/docs/nhpcodes_2010.pdf.

Beginning January 6, 2025, the Natural Heritage Program reports for wildlife species will utilize data from Landscape Project Version 3.4. If you have questions concerning the wildlife records or wildlife species mentioned in this response, we recommend that you visit the interactive web application at the following URL, https://dep.nj.gov/njfw/landscapeapp/, or contact the Division of Fish and Wildlife, Endangered and Nongame Species Program at (609) 292-9400.

Occurrences of Bald Eagle nest and roost habitat have "special concern" rank and are included in Landscape Project Version 3.4. The DEP also recognizes that the U.S. Fish & Wildlife Service maintains additional jurisdiction pursuant to the Bald and Golden Eagle Protection Act (BGEPA). They provide guidance to avoid negative impacts in the "National Bald Eagle Management Guidelines" document found at https://www.fws.gov/sites/default/files/documents/national-bald-eagle-management-guidelines_0.pdf. They also provide a screening tool to help identify activities that may require a Federal permit, at https://www.fws.gov/media/northeast-bald-eagle-project-screening-form.

For occurrences of Osprey nests and other bird nests that persist year to year, active nests continue to be protected from disturbance that can result in "take" (i.e., disturbance that can cause abandonment or loss) pursuant to the NJ Endangered and Nongame Species Conservation Act (ENSCA) and the Federal Migratory Bird Treaty Act. As a result of delisting of Osprey to "stable" conservation status, Osprey nests are not represented in Landscape Project maps, but nest locations are available online at www.Osprey-Watch.org.

For additional information regarding any Federally listed plant or animal species, please contact the U.S. Fish & Wildlife Service, New Jersey Field Office at http://www.fws.gov/northeast/njfieldoffice/endangered/consultation.html.

Information supplied by the Natural Heritage Program summarizes existing data known to the program at the time of the request regarding the biological elements (species and/or ecological communities) or their locations. They should never be regarded as final statements on the elements or areas being considered, nor should they be substituted for on-site surveys required for environmental assessments.

Thank you for consulting the Natural Heritage Program. The attached invoice details the payment due for processing this data request. Feel free to contact us again regarding any future data requests.

Sincerely,

Robert J. Cartica
Administrator

Re: **Biological Resources Technical Memorandum**
Replacement Airport Traffic Control Tower
Trenton-Mercer Airport
Township of Ewing, Mercer County, New Jersey
DY653.07-TTN-DOC_ATCT
DRGNJ Project #4877

On June 1, 2023, Davey Resource Group, Inc. "DRG" staff biologist Elizabeth Dancer, PWS, conducted a habitat assessment in support of the proposed Replacement Air Traffic Control Tower (ATCT) Project at Trenton-Mercer Airport (TTN) in Ewing Township, Mercer County, New Jersey. TTN is proposing to demolish and remove the existing ATCT, which is located on the infield west of Runway 16-34 and north of Runway 6-24 and construct a new replacement ATCT on a portion of the former site of the Army National Guard hangar complex. The new ATCT facility will include site improvements such as an access road, parking, utilities, and landscaping.

The habitat assessment was focused on the project limit of disturbance (LOD), as well as all areas within 50 feet of the LOD (collectively, the "Study Area"), totaling approximately 10.87 acres. DRG evaluated existing vegetation communities within the Study Area for their suitability to support State and/or federally listed threatened or endangered wildlife species identified through the New Jersey Department of Environmental Protection (NJDEP) Landscape Project Mapping (Version 3.4) (NJDEP 2024), New Jersey Natural Heritage Program Database searches (NJ NHP), and the US Fish and Wildlife Service Information for Planning and Consultation (USFWS IPaC) Official Species List. DRG also documented all wildlife species observed within and near the Study Area limits, during which three State listed bird species were identified.

Site Description

Existing published information was studied to preliminarily determine the location and extent of vegetation communities within the Study Area, including high-resolution aerial photography (NJOIT 2021), the Soil Survey Geographic Database (SSURGO) for Mercer County (USDA 2020), detailed topographic mapping (USGS 2023), and NJDEP wetlands and streams mapping (NJDEP 1999; 2020). During the field investigation, DRG determined that most of the Study Area consists of mowed/maintained, upland fields adjacent to paved taxiways, runways, and the former Army National Guard Aviation facility. Most of these fields are maintained at heights of two to

six inches, though areas containing buried utility lines contain grasses and forbs at heights of 12 to 18 inches. Plant species observed in these communities were typical of maintained, upland fields and included various cool season grasses (*Poa* and *Festuca* spp.), common dandelion (*Taraxacum officinale*), English plantain (*Plantago lanceolata*), tall buttercup (*Ranunculus acris*), meadow hawkweed (*Hieracium caespitosum*), ox-eye daisy (*Leucanthemum vulgare*), and common sheep sorrel (*Rumex acetosella*).

Wooded habitat is limited to the southeast end of the Study Area along Upper Ferry Road, which consists of secondary successional deciduous upland communities. The canopy contains black walnut (*Juglans nigra*), black locust (*Robinia pseudoacacia*), American elm (*Ulmus americana*), green ash (*Fraxinus pensylvanica*), red maple (*Acer rubrum*), and tree-of-heaven (*Ailanthus altissima*); a sapling/shrub understory of these same species, as well as eastern red cedar (*Juniperus virginiana*), rambler rose (*Rosa multiflora*), northern spicebush (*Lindera benzoin*), black raspberry (*Rubus occidentalis*), and wine raspberry (*Rubus phoenicolasius*); a herbaceous understory of garlic-mustard (*Alliaria petiolata*), orange day-lily (*Hemerocallis fulva*), and various types of grass; and a dense woody vine stratum of Japanese honeysuckle (*Lonicera japonica*), fox grape (*Vitis labrusca*), and Asian bittersweet (*Celastrus orbiculatus*).

The remaining portions of the Study Area consist of existing pavement associated with runways, taxiways, access roads, parking areas, and former helicopter landing pads.

The topography within the Study Area is generally flat to gently sloping to the east, with manufactured berms occurring around the existing ATCT. Onsite elevations range from approximately 160 to 200 feet above sea level.

No wetlands or State open waters were identified on the available NJDEP wetlands and stream mapping reviewed prior to the onsite investigation. No wetlands or State open waters were identified within the Study Area limits during the habitat assessment and wetland delineation conducted by DRG; however, West Branch Shabakunk Creek and associated wetlands occur within a wooded corridor immediately adjacent to the Study Area, east of the former Army National Guard hangar.

Species of Concern

In order to preliminarily identify State and/or federally listed plant or wildlife species potentially present within or immediately adjacent to the Study Area, DRG obtained a USFWS IPaC Official Species list and reviewed both NJDEP Landscape Project Mapping v3.3 (NJDEP 2017) and NJ NHP records.

The USFWS IPaC Report (dated June 18, 2025) identified the following species that should be considered in an effects analysis for the project:

- Indiana bat – *Myotis sodalis,* Federally listed Endangered
- Northern long-eared bat – *Myotis septentrionalis,* Federally listed Endangered
- Tricolored bat – *Perimyotis subflavus,* Federally Proposed Endangered
- Monarch – *Danaus plexippus,* Proposed Federally Threatened

No critical habitats, wildlife refuges, or fish hatcheries were identified as occurring within the Study Area.

A review of the NJDEP Landscape Project v3.4 did not identify any mapped habitat for any State or federally listed plant or wildlife species within or immediately adjacent to the Study Area.

Results and Discussion

None of the above-listed species were observed within the Study Area during the field investigation.

According to the USFWS document entitled *New Jersey Municipalities with Hibernation or Maternity Occurrence of Indiana Bat or Northern Long-eared Bat* (last updated February 14, 2023) (USFWS 2023a), Ewing Township is not known to support Indiana bat hibernacula or maternity roosts; however, the township is known to support northern long-eared bat maternity roosts. The species is known to utilize a variety of woodlands and will roost in live or dead trees of three inches diameter-at-breast-height (dbh) or larger, sheltering under bark, in cracks, or in cavities (USFWS 2022a). The species is also known to occasionally roost under or within manmade structures such as barns and bridges (USFWS 2014). Northern long-eared bats forage in forested wetlands, upland woodlots, linear forested corridors, emergent wetlands, old fields, and pastures (USFWS 2014).

Tricolored bats typically occur in large forest tracts (USFWS 2023b), particularly with riparian corridors (NYNHP 2023), which do not occur within the Study Area. The disturbed, secondary successional, wooded habitat in the southeastern portion of the Study Area and the adjacent wooded riparian corridor associated with West Branch Shabakunk Creek may provide marginally suitable roosting and foraging habitat for this species; however, due to the ongoing, existing disturbances surrounding these habitats, significant populations of tricolored bat would not be expected to be present. On September 13, 2022, the USFWS announced a proposal to list the tricolored bat as endangered under the Endangered Species Act of 1973 (USFWS 2022b). It should be noted that although proposed endangered species are not protected by the take prohibitions under Section 9 of the ESA until the rule to list is finalized, Section 7(a)(4) of the ESA directs federal agencies to consult with the USFWS if their action will jeopardize the continued existence of a proposed species.

Summer acoustic studies were completed in 2015 and 2021 by ICF, Inc. (formerly Eco-Tech Consultants, Inc.) in support of TTN's separate and independent Runway Protection Zone (RPZ) Obstruction Removal Project. The acoustic studies were performed to determine the presence or probable absence of Federally listed, proposed listed, and at-risk bat species. These studies encompassed various forested habitat at the TTN Airport property. The level of effort for the survey was based on the maximum area of tree clearing that could be expected as a result of the RPZ Obstruction Removal Project. Although the area of tree clearing proposed as part of the RPZ Obstruction Removal Project was significantly reduced to only include critical obstructions generally located at the departure and approach ends of each runway (approximately 31 acres collectively), the initial studies assumed up to 130 acres of tree removal. ICF conducted an automated and qualitative analysis of acoustic data that was collected from four survey sites during the summers of 2015 and 2021. The survey sites nearest to the study area occurred approximately 1,978 feet to the south (Site 4) and 2,150 feet to the northeast (Site 3).

During the initial 2015 acoustic study, one tricolored bat was detected in the forest habitat within Site 4. In 2021, tricolored bat was only detected within the moderate to high quality forest habitat located in the northern portion of TTN (Site 2), well beyond the study area limits. As further detailed in ICF's final report provided to the USFWS NJFO, dated September 28, 2021, the habitat

at Sites 3 and 4 were considered to be low to moderate suitability to support Myotis bat species. During the 2021 survey, three bat species were detected at Sites 3 and 4, including eastern red bat (Lasiurus borealis), silver-haired bat (Lasionycteris noctivagans), and big brown bat (Eptesicus fuscus). Based on the acoustic data collected during the time of the survey for the RPZ Obstruction Removal Project, the habitat at Site 2, located to the north of Sam Weinroth Road along Ewing Creek, likely supported the presence of Myotis bat species and tricolored bat. In a concurrence letter dated November 16, 2021, the USFWS NJFO found that the proposed tree removal was not expected to adversely affect federally listed bat species potentially present due to the implementation of seasonal tree clearing timing restrictions (April 1 to September 30), the limited acreage of tree removal proposed at the site located in the northern section of TTN (Site 2), and the use of other avoidance, minimization, and mitigation measures proposed by TTN.

Based on ICF's Bat Acoustic Survey Report, it was determined that the overall area was unlikely to support Indiana bats and that any potential impacts to NLEB resulting from the RPZ Obstruction Removal Project would be negligible to both the local and overall bat population. The USFWS NJFO concurred with these findings but recommended that a time-of-year restriction on tree-clearing activities for any trees greater than or equal to 5" diameter at breast height from April 1 through September 30 be implemented to prevent incidental death or injury to other at-risk bat species and/or their pups (letters dated October 8, 2015 and November 16, 2021). As a special condition of the Flood Hazard Area Individual Permit, Flood Hazard Area Verification, and Freshwater Wetlands General Permit #9, issued on May 15, 2024 for the TTN RPZ Obstruction Removal Project (File No. 1100-24-0001.1, Activity No. LUP240001), NJDEP further required that an April 1 to September 30 seasonal timing restriction be implemented on the clearing of woody vegetation to prevent adverse impacts to Indiana bat, NLEB, tricolored bat, and nesting migratory birds protected under the Federal Migratory Bird Treaty Act. A new presence/absence bat survey is scheduled to be updated in the summer of 2025 in support of this separate project.

Due to the nature of the proposed project and the limited disturbance to wooded habitat, no impacts to these species are anticipated.

The monarch is a migratory butterfly species that can be found throughout New Jersey during the summer and fall. It is primarily found within open habitats, including fallow fields and roadsides, gardens, and meadows. The monarch caterpillar is entirely dependent upon milkweed (*Asclepias* spp.) as a host plant, whereas adults will take nectar from a variety of wildflower species (USFWS 2020a). No milkweed was observed onsite, and nectar-producing wildflowers were generally absent from the mowed/maintained infields and wooded edges; therefore, the Study Area would not be expected to support significant populations of monarch and impacts to the species resulting from the project would not be anticipated. On December 12, 2024, the USFWS announced a proposal to list the species as threatened under the ESA (USFWS 2024). Similarly to proposed endangered species, proposed threatened species are not protected by the take prohibitions under Section 9 of the ESA until the rule to list is finalized.

As stated in a letter dated April 28, 2025, the NJ NHP does not have any records of rare plants, threatened, or endangered wildlife species or wildlife habitat, or Natural Heritage Priority Sites within the Study Area; however, the NJ NHP does have foraging records of Great Blue Heron (*Ardea herodias*), a State-listed species of special concern. The NJ Landscape Project maps habitat for this species as occurring within and along the West Branch Shabakunk Creek immediately adjacent to the existing Army National Guard Aviation facility. New Jersey Species of Special Concern are identified by the State as species that warrant special attention because of evidence of population decline or inherent vulnerability to environmental deterioration or habitat modification

that would result in the species becoming threatened. Since the subject parcels are not subject to these jurisdictions, no further analysis of NJ Special Concern Species is required.

Although not identified in the above-described database searches, three State listed grassland bird species were observed within and adjacent to the Study Area. These included the following:

- American Kestrel – *Falco sparverius,* State listed Threatened
- Grasshopper Sparrow – *Ammodramus savannarum,* State listed Threatened (breeding)
- Eastern Meadowlark – *Sturnella magna,* State listed Threatened

An American Kestrel was observed flying over the infield immediately north of the existing ATCT, where it appeared to be foraging. Several Eastern Meadowlarks were observed perching on the Airport Operation Area (AOA) fencing to the north and northeast of the former Army National Guard hangar, as well as foraging within the adjacent infields. This species, as well as a Grasshopper Sparrow, were heard vocalizing in the infield between Taxiway F and Runway 6-24; the grasses here, which are maintained at a taller height than in the surrounding infields due to the presence of an existing duct bank, may provide potentially suitable breeding habitat for these species. All three of the above-described species are known to utilize airfields for nesting and foraging.

No other State or federally listed plant or wildlife species were observed during the field investigation.

CONCLUSIONS

DRG reviewed existing, published information, and conducted a field investigation in support of the proposed ATCT replacement project at TTN, located in Ewing Township, New Jersey. DRG documented the presence and extent of onsite existing vegetative communities, evaluated each community for its potential to support State and/or federally listed plant or wildlife species, and documented all wildlife observed within the Study Area. No federally listed or State listed species identified during the database searches were identified onsite; however, three State listed grassland bird species were observed within the infields and may be using portions of the Study Area for breeding and foraging. Coordination with the NJDEP may be required to determine what measures, if any, should be taken to protect these and other grassland bird species potentially utilizing the Study Area.

While potentially suitable summer roosting and foraging habitat for northern long-eared bat and marginally suitable roosting and foraging habitat for tricolored bat was identified in the southeastern portion of the Study Area. Summer acoustic studies to identify areas of occupied bat habitat have been previously performed on the TTN in support of other separate, independent airport projects and updated studies are scheduled to be performed in the summer of 2025. However, due to the nature of the project and the limited disturbance to wooded habitat, no impacts to bat species are anticipated to result from the proposed ATCT replacement project. Due to the absence of milkweed and other nectar-producing flowers, the Study Area is not expected to support significant populations of monarch and no impacts to this species are anticipated.

The results and findings of this investigation represent the best professional judgement of DRG and are based upon observed field conditions and a review of existing, published information, as well as currently existing regulations.

Re: Summer bat acoustic survey report for the proposed obstruction/removal project at the Trenton-Mercer Airport in Ewing Township, Mercer County, New Jersey

Dear Mr. Schwierjohann:

This letter responds to your September 15, 2015 summer bat acoustic survey report submitted to the U.S. Fish and Wildlife Service's (Service), New Jersey Field Office (NJFO). The summer bat survey was completed to determine if the federally listed (threatened) northern long-eared bat (*Myotis septentrionalis*) and/or the federally listed (endangered) Indiana bat (*Myotis sodalis*) may occur within the action area of the Trenton-Mercer Airport in Ewing Township, Mercer County, New Jersey. The proposed project is being completed to remove obstructions that may affect navigable airspace surrounding the Trenton-Mercer Airport. The Service is providing comments regarding the results of the summer bat acoustic survey and potential impacts to migratory birds.

AUTHORITY

The following comments are provided pursuant to the Endangered Species Act of 1973 (87 Stat. 884, as amended; 16 U.S.C. 1531 *et seq.*) (ESA) to ensure the protection of federally listed endangered and threatened species, and the Migratory Bird Treaty Act of 1918 (40 Stat. 755, as amended; 16 U.S.C. 703-712) (MBTA) to ensure the protection of migratory bird species.

SERVICE REVIEW

The Service has reviewed the results of summer acoustic surveys conducted during the period of August 10 to August 13, 2015 on the subject property. No northern long-eared bats or Indiana bats were positively detected during the summer surveys. Due to the proximity of the project site to known northern long-eared bat and Indiana bat capture sites, transient northern long-eared bats and Indiana bats may occasionally forage or roost at the project site. However, since no northern long-eared bats or Indiana bats were captured, loss of foraging and roosting habitat from the proposed project is anticipated to be insignificant and discountable. Therefore, the Service concurs with your determination that the proposed project is not likely to adversely affect the

northern long-cared bat and Indiana bat. Since the project site is within the known range of the northern long-eared bat and Indiana bat, the project site may be occupied by northern long-eared bats or Indiana bats in future years. Therefore, if tree clearing within the project site is not completed prior to August 13, 2017, the Service must be contacted to determine if additional summer surveys will be required.

Except for the aforementioned species, no federally listed or proposed threatened or endangered flora or fauna are known to occur within the vicinity of the proposed project. In view of these findings we believe that the requirements of Section 7 of the ESA have been fulfilled for this project. Your obligations under Section 7 must be reconsidered, however, if: (1) new information reveals that the proposed action may affect listed species in a manner or to an extent not previously considered; (2) the proposed action is subsequently modified to include activities that were not considered during this consultation; (3) new species are listed or critical habitat designated; or (4) tree clearing is not completed by August 13, 2017.

MIGRATORY BIRDS

Tree cutting and/or shrub removal can adversely affect migratory birds if conducted during the nesting season. The MBTA prohibits taking, killing, possession, transportation, and importation of migratory birds, their eggs, parts, and nests, except when specifically authorized by the Department of the Interior. Neither the MBTA nor its implementing regulations at 50 CFR Part 21 provide for permitting of "incidental take" of migratory birds.

According to the New Jersey Division of Fish and Wildlife Guidance Manual for the Protection of Fish and Wildlife Resources dated June 2008, the appropriate timing restriction to protect nesting migratory birds from tree or shrub/scrub removal is March 15 to July 31. While nests without birds or eggs are unprotected under the MBTA, nest destruction that results in the un-permitted take of migratory birds or their eggs and unfledged chicks is illegal. We recommend implementing the aforementioned seasonal restriction for any proposed tree/shrub removal.

OTHER COMMENTS

The proposed project will remove forested habitat that may affect the navigable airspace surrounding the Trenton-Mercer Airport. Although the activities associated with the project are not likely to adversely affect federally listed species, the proposed project may impact other wildlife that are being reviewed for listing under the ESA. Currently the Service is conducting an internal review of the little brown bat (*Myotis lucifugus*) to determine if this species may warrant protection under the ESA. Based on the 2015 summer acoustic survey results, the little brown bat may occur within the footprint of the proposed project. The assumed presence of little brown bats suggests little brown bats may use the footprint of the project for foraging or as a travel corridor. Although mist netting and radio telemetery was not used to document a maternity colony or maternity roosts, the Service believes maternity roosts may occur in the action area. Removal of maternity roosts during the active season (April 1 to September 30) may result in the death or injury of adults and/or their pups. The removal of maternity roosts may also cause a little brown bat colony to split or search for other roosting and foraging areas. To prevent injury or death to individual little brown bats that may roost in the footprint of the project, the Service

recommends a time-of-year restriction on tree clearing activities. The recommended time-of-year restriction on tree clearing activities (any trees ≥ 5" diameter at breast height) is from April 1 to September 30.

If you have any questions or require further assistance regarding federally listed threatened or endangered species, or migratory birds, please contact Jeremy Markuson at (609) 383-3938, extension 45.

Sincerely,

Eric Schrading
Field Supervisor

Email: jennifer.lastella@davey.com

Ms. LaStella:

This letter responds to your September 30, 2021 summer bat acoustic survey report submitted to the U.S. Fish and Wildlife Service (Service), New Jersey Field Office. The summer bat survey was completed to determine if the federally listed Indiana bat (*Myotis sodalis*, endangered) and/or northern long-eared bat (*Myotis septentrionalis*, threatened) may occur within the action area of the Trenton-Mercer Airport in Ewing Township, Mercer County, New Jersey. The proposed project is being completed to remove obstructions that may affect navigable airspace surrounding the Trenton-Mercer Airport. The Service is providing comments regarding the results of the summer bat acoustic survey and the potential impacts to migratory birds.

AUTHORITY

These comments are provided pursuant to the Endangered Species Act of 1973 (ESA) (87 Stat. 884, as amended; 16 U.S.C. 1531 *et seq.*) to ensure the protection of federally listed endangered and threatened species, and the Migratory Bird Treaty Act of 1918 (40. Stat.755, as amended; 16 U.S.C. 703-712) (MBTA) to ensure the protection of migratory bird species. These comments may not address all Service concerns for fish and wildlife resources and do not preclude separate review and comment by the Service pursuant to the December 22, 1993 Memorandum of Agreement among the U.S. Environmental Protection Agency, New Jersey Department of Environmental Protection (NJDEP), and the Service, which was updated and annotated on May 10, 2018, if project implementation requires a permit from the NJDEP pursuant to the New Jersey Freshwater Wetlands Protection Act (N.J.S.A. 13:9B *et seq*.); comments directed to the Corps of Engineers via the Fish and Wildlife Coordination Act (48 Stat. 401; 16 U.S.C. 661 *et seq*.) for any permits required pursuant to Section 404 of the Clean Water Act (33 U.S.C. 1344 *et seq*.); or comments on any forthcoming environmental documents pursuant to the National Environmental Policy Act of 1969 as amended (83 Stat. 852; 42 U.S.C. 4321 *et seq.*).

SERVICE REVIEW

The Service has reviewed the results of the summer acoustic surveys conducted June 15-16, 2021 on the subject property. The Indiana bat, and possibly northern long-eared bat, were positively detected during the summer surveys. Additionally, the little brown bat (*Myotis*

lucifugus) and tri-colored bat (*Perimyotis subflavus*) were detected at the site and are currently considered at-risk species. The Service is currently conducting a review of both the little brown bat and the tri-colored bat to determine if these species warrant protection under the ESA, with determinations tentatively scheduled for 2022.

Up to 31 acres of tree removal and trimming are proposed around Trenton-Mercer Airport across four locations at the end of the airport runways; however, less than 10 acres of tree removal will occur in the vicinity of Site 2 (runway 16) where the calls of the federally listed and at-risk bat species were detected. The forested area and Ewing Creek riparian corridor in the vicinity of Site 2 are likely used by the bat species as foraging habitat. Bats also likely use Ewing Creek as a travel corridor and may use the culvert under I-295 as a crossing structure. Roosting habitat for the bats may be present at Site 2, though the noise disturbance associated with the adjacent I-295 roadway and airplane traffic from runway 16 likely make this location less attractive for bat roosting.

The project will incorporate a time of year restriction (April 1 – September 30) on tree removal and trimming activities to avoid and minimize direct impacts to federally listed bats species, at-risk bat species, and nesting migratory birds. Vegetation will remain (or will be replanted) along Ewing Creek, including around the I-295 culvert openings, which should support continued bat use of the riparian corridor for foraging and travel. The acreage of tree removal proposed at Site 2 represents a small percentage of the total forested area (*i.e.*, suitable roosting and foraging habitat) available in the vicinity; therefore, the proposed tree removal is not expected to adversely affect the federally listed bat species.

CONCLUSIONS

Except for the aforementioned species, no federally listed or proposed threatened or endangered flora or fauna are known to occur within the vicinity of the proposed project. In view of these findings, we believe that the requirements of Section 7 of the ESA have been fulfilled for this project. The project proponent's obligations under Section 7 must be reconsidered if: (1) new information reveals that the proposed action may affect listed species in a manner or to an extent not previously considered; (2) the proposed action is subsequently modified to include activities that were not considered during this consultation; or (3) new species are listed or critical habitat designated. If you have any questions concerning the above comments or provisions of the ESA and MBTA do not hesitate to contact Ron Popowski of the Service's New Jersey Field Office at ron_popowski@fws.gov.

Sincerely,

Eric Schrading
Field Supervisor

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

If the enclosed list indicates that any listed species may be present in your action area, please visit the New Jersey Field Office Project Review Guide web page as the next step in evaluating potential project impacts: http://www.fws.gov/northeast/njfieldoffice/Endangered/consultation.html

On the New Jersey Field Office consultation web page you will find:

- habitat descriptions, survey protocols, and recommended best management practices for listed species;
- recommended procedures for submitting information to this office; and
- links to other Federal and State agencies, the Section 7 Consultation Handbook, the Service's wind energy guidelines, communication tower recommendations, the National Bald Eagle Management Guidelines, and other resources and recommendations for protecting wildlife resources.

The enclosed list may change as new information about listed species becomes available. As per Federal regulations at 50 CFR 402.12(e), the enclosed list is only valid for 90 days. Please return to the IPaC website at regular intervals during project planning and implementation to obtain an updated species list. When using IPaC, be careful about drawing the boundary of your Project Location. Remember that your action area under the ESA is not limited to just the footprint of the

project. The action area also includes all areas that may be indirectly affected through impacts such as noise, visual disturbance, erosion, sedimentation, hydrologic change, chemical exposure, reduced availability or access to food resources, barriers to movement, increased human intrusions or access, and all areas affected by reasonably foreseeable future that would not occur without ("but for") the project that is currently being proposed.

We appreciate your concern for threatened and endangered species. The Service encourages Federal and non-Federal project proponents to consider listed, proposed, and candidate species early in the planning process. Feel free to contact this office if you would like more information or assistance evaluating potential project impacts to federally listed species or other wildlife resources. Please include the project code in the header of this letter with any correspondence about your project.

OFFICIAL SPECIES LIST

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

New Jersey Ecological Services Field Office

PROJECT SUMMARY

Project Code: 2026-0135610

Project Name: Trenton-Mercer Airport Replacement Air Traffic Control Tower and Airfield Lighting Vault

Project Type: Airport - New Construction

Project Description: Trenton-Mercer Airport (TTN) is proposing to replace the existing air traffic control tower (ATCT) and existing airfield lighting vault due to both exceeding their design useful life.

Project Location:

The approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@40.276395050000005,-74.80775423674343,14z

Counties: Mercer County, New Jersey

ENDANGERED SPECIES ACT SPECIES

There is a total of 4 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries[1], as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

---

1. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

INSECTS

NAME	STATUS
Monarch butterfly *Danaus plexippus* There is **proposed** critical habitat for this species. Your location does not overlap the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/9743 General project design guidelines: https://ipac.ecosphere.fws.gov/project/GEJWRSNLVJCEZJO3FXT6FCBBGA/documents/generated/10545.pdf	Proposed Threatened

CRITICAL HABITATS

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

YOU ARE STILL REQUIRED TO DETERMINE IF YOUR PROJECT(S) MAY HAVE EFFECTS ON ALL ABOVE LISTED SPECIES.

USFWS NATIONAL WILDLIFE REFUGE LANDS AND FISH HATCHERIES

Any activity proposed on lands managed by the National Wildlife Refuge system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS OR FISH HATCHERIES WITHIN YOUR PROJECT AREA.

BALD & GOLDEN EAGLES

Bald and Golden Eagles are protected under the Bald and Golden Eagle Protection Act [2] and the Migratory Bird Treaty Act (MBTA) [1]. Any person or organization who plans or conducts activities that may result in impacts to Bald or Golden Eagles, or their habitats, should follow appropriate regulations and consider implementing appropriate avoidance and minimization measures, as described in the various links on this page.

---

1. The Bald and Golden Eagle Protection Act of 1940.
2. The Migratory Birds Treaty Act of 1918.
3. 50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)

There are Bald Eagles and/or Golden Eagles in your project area.

Measures for Proactively Minimizing Eagle Impacts
For information on how to best avoid and minimize disturbance to nesting bald eagles, please review the National Bald Eagle Management Guidelines. You may employ the timing and activity-specific distance recommendations in this document when designing your project/ activity to avoid and minimize eagle impacts. For bald eagle information specific to Alaska, please refer to Bald Eagle Nesting and Sensitivity to Human Activity.

The FWS does not currently have guidelines for avoiding and minimizing disturbance to nesting Golden Eagles. For site-specific recommendations regarding nesting Golden Eagles, please consult with the appropriate Regional Migratory Bird Office or Ecological Services Field Office.

If disturbance or take of eagles cannot be avoided, an incidental take permit may be available to authorize any take that results from, but is not the purpose of, an otherwise lawful activity. For assistance making this determination for Bald Eagles, visit the Do I Need A Permit Tool. For assistance making this determination for golden eagles, please consult with the appropriate Regional Migratory Bird Office or Ecological Services Field Office.

Ensure Your Eagle List is Accurate and Complete
If your project area is in a poorly surveyed area in IPaC, your list may not be complete and you may need to rely on other resources to determine what species may be present (e.g. your local FWS field office, state surveys, your own surveys). Please review the Supplemental Information

on Migratory Birds and Eagles, to help you properly interpret the report for your specified location, including determining if there is sufficient data to ensure your list is accurate.

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to bald or golden eagles on your list, see the "Probability of Presence Summary" below to see when these bald or golden eagles are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
Bald Eagle *Haliaeetus leucocephalus* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1626	Breeds Sep 1 to Jul 31

PROBABILITY OF PRESENCE SUMMARY

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read "Supplemental Information on Migratory Birds and Eagles", specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

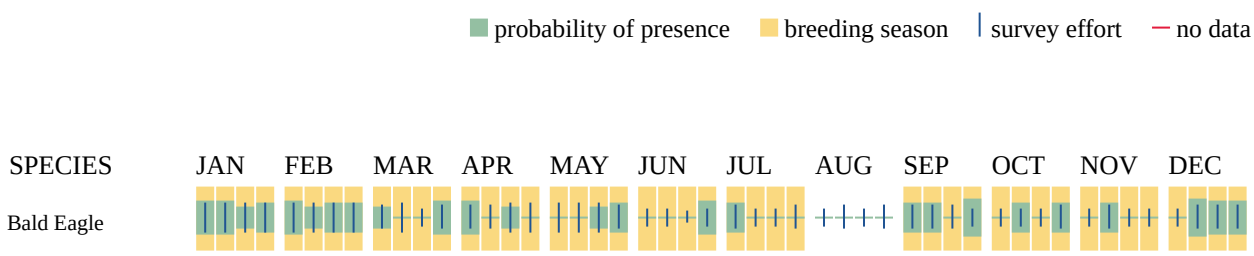
Probability of Presence (▪)

Green bars; the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during that week of the year.

Breeding Season (▪)
Yellow bars; liberal estimate of the timeframe inside which the bird breeds across its entire range.

Survey Effort (|)
Vertical black lines; the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps.

No Data (–)
A week is marked as having no data if there were no survey events for that week.



Non-BCC
Vulnerable

TRENTON-MERCER AIRPORT ACOUSTIC BAT DETECTOR SURVEY

Trenton-Mercer Airport Obstruction Removal Project – Phase 3
Mercer County, New Jersey

Submitted to: Jennifer LaStella
Davey Resource Group, Inc.
4 Walter E. Foran Blvd.
Suite 209
Flemington, NJ 08822

Date: October 22, 2025

INTRODUCTION

ICF Jones & Stokes (ICF) was contracted by Davey Resource Group (DRG) to conduct summer presence/absence acoustic bat surveys for the Trenton-Mercer Airport (County of Mercer) Obstruction Removal project (Phase 3) located in Mercer County, New Jersey. The proposed obstruction mitigation includes three phases: Phase 1 - removal of on-airport trees located in non-environmentally sensitive areas, Phase 2 - removal of on-airport trees located in environmentally sensitive areas, and Phase 3 - removal of off-airport trees and installation of obstruction lighting. Phase 1, which consisted of the removal of approximately 5-acres of trees, has been completed. Phase 2 (approximately 13-acres of trees) and Phase 3 (approximately 10 acres) have received approval from the NJDEP but have not yet been completed. In addition to the above, the County is currently negotiating the removal of an additional 5.2-acres of trees off-airport at the Runway 34 End associated with the installation of obstruction lights to mark a railroad.

The proposed Project Area is within the known range of the federally endangered Indiana bat (*Myotis sodalis*) and northern long-eared bat (*Myotis septentrionalis*), as well as the federally proposed endangered tri-colored bat (*Perimyotis subflavus*). On July 1, 2025, ICF submitted a study plan to the U.S. Fish and Wildlife Service (USFWS) New Jersey Ecological Services Field Office (NJFO), detailing the proposed level of effort for presence/probable absence surveys for the federally listed bat species. Approval and concurrence of the study plan was received from USFWS on July 11, 2025. The purpose of the project is to remove existing obstructions located within the Runway Protection Zones of Trenton-Mercer Airport.

SURVEY METHODOLOGY

Acoustic Monitoring Survey Level of Effort

The survey level of effort followed the *2024 Range-wide Indiana Bat and Northern Long-eared Bat Summer Survey Guidelines*[1] (there were no updates to the survey guidelines for the 2025 calendar year). The Project Area consists of the Trenton-Mercer Airport structures and runways, open managed grasslands, forested blocks, and the Mountain View Golf Course. A total of 15.2 acres of tree removal is proposed as a part of the Phase 3 obstruction removal activities and Phase 2 obstruction removal activities, which includes the offsite cemetery property. (original Phase 3 = 10 acres plus cemetery property = 5.2 acres). With this project being considered non-linear, the USFWS guidelines suggest a minimum of 14 detector nights (1 detector for one calendar night = 1 detector night) per 123 acres of suitable habitat. A total of five (5) acoustic survey sites were spread throughout the proposed sample area and surveyed for three nights each (Appendix A - Figure 1); equaling 15 detector nights, exceeding the minimum requirements for survey effort. Coordinates and detector direction for acoustic sites are provided in Table 1.

Table 1. Acoustic survey site locations.

Acoustic Survey Site #	Coordinates (WGS84)	Detector Direction (Bearing)
D1	40.264550°; -74.829890°	39° NE
D2	40.287470°; -74.824170°	274° W
D3	40.286100°; -74.817110°	256° W
D4	40.284810°; -74.799446°	71° E
D5	40.269970°; -74.807730°	104° E

Site Selection

ICF selected acoustic detector sites based on coordination with Sarah Crestol of the USFWS NJFO and the recommendations outlined in the survey guidelines. The detector sites were selected to represent all potential habitats that local bat species could utilize for foraging within the Project Area. Habitat at the detector sites consisted of mature oak hickory forest blocks, early successional field and forest edge, and small forested perennial streams. All detectors that were deployed within forested areas were placed in predicted foraging and travel corridors of potential foraging myotis species. Typical high quality acoustic sites are those with high bat traffic and generally included but are not limited to:

- borders of riparian corridors running through open landscapes;
- fencerows/forest edge adjacent to open habitats; and
- other open linear corridors, including woodland roads/trails and rights-of-way.

One Wildlife Acoustics Songmeter Mini Bat detector equipped with an integrated SMM-U2 high frequency omni-directional microphone was placed at each sample location (Wildlife Acoustics, Inc., Maynard, MA). To reduce the influence of ground clutter, detectors/microphones were mounted

[1] USFWS. 2024. Range-Wide Indiana Bat Survey Guidelines. Midwest Region Endangered Species. fws.gov/sites/default/files/documents/USFWS_Range-wide_IBat_%26_NLEB_Survey_Guidelines_2023.05.10_0.pdf

approximately three meters above ground level and approximately 10 meters from vegetation located directly in front of the microphone and overhead. Microphones are omnidirectional and were oriented horizontally to prevent water damage per manufacturer recommendations. Representative photographs are provided in Appendix B. Bat detectors recorded in full spectrum mode with a sample rate of 256 kHz and were set to retain noise files. All other settings were left at manufacturer recommended defaults. Bat detectors recorded from 30 minutes before sunset to 30 minutes after sunrise.

Software Analysis of Acoustic Data

ICF used SonoBat 30 to properly attribute acoustic data files, filter out noise, and then automatically classify bat passes (i.e. a single recording file) to species using U.S. Fish and Wildlife Service approved settings. ICF included all (n=11) species with potential to occur in the Project Area: eastern small-footed bat (*Myotis lebeii*), northern long-eared bat, Indiana bat, little brown bat (*Myotis lucifugus*), tricolored bat, eastern red bat (*Lasiurus borealis*), evening bat (*Nycticeius humeralis*), big brown bat (*Eptesicus fuscus*), silver-haired bat (*Lasiurus noctivagans*), and hoary bat (*Lasiurus cinereus*). The SonoBat classifier used for the analysis included an additional species, Rafinesque's big-eared bat (*Corynorhinus rafinesquii*), that is not known to occur in the Project Area but is included in the results tables. SonoBat classifiers are pre-built by region and may not include the exact species assemblage for a given area. Classifiers are selected based on the closest fit for a given area that includes the species of interest. Additionally, Rafinesque's big-eared bat is not acoustically similar to the species of interest in this survey and therefore does not present a potential misclassification issue. Details on the software version, classifier, and settings used for the analysis are presented in Table 2. The sampling and software identification summary is presented in Table 3.

After classification was completed, a maximum likelihood estimate (MLE) value was generated for each species by the software, assessing the likelihood that a species identification was correct on a site-night basis (single bat detector on a single calendar night). Maximum likelihood estimators are a multivariate statistical technique used to test the strength of a proposed relationship based on known or assumed error rates. In this case, the proposed relationship is the presence of bats that have been identified by the software. The MLE considers the number of call sequences identified as a species and compares that to the number of call sequences that were identified belonging to a similar species based on the assumed error rates. Assumed error rates are obtained by testing the software classifiers against libraries of known calls. The goal is to provide a mechanism to reduce errors resulting from misclassification. Post-hoc MLE p-values are used to determine acceptance thresholds for final identification; a low (near zero) p-value suggests presence but does not provide proof of presence. The original USFWS guidelines set the presence determination threshold at a p-value < 0.05 for a given site-night. However, updated guidance published April 14, 2025, effectively removed MLE p-values from use to determine presence moving forward[2]. Instead, any detection (i.e. a single identified pass) of a listed species is considered presence unless manual vetting is conducted regardless of the MLE p-value. This is due to USFWS and independent source testing that indicated automated ID programs do not reliably provide an MLE p-value of <0.05 for rare target species (e.g.

[2] U.S. Fish and Wildlife Service (USFWS). April 2025. *Automated Acoustic Bat ID Software Programs*. U.S. Fish and Wildlife Service. Available: https://www.fws.gov/media/automated-acoustic-bat-id-software-programs

northern long-eared bats), when they are present in low numbers at the night level (i.e. <15 passes per site-night)[2]. Receiving fewer than approximately 15 passes could result in false negatives for rare target species. However, we report the MLE p-values in Table 4 as they are a helpful indicator of how likely software species classification results are for more common species on a given site-night.

Table 2. SonoBat Software Version, Classifier, and Settings Used for Analysis of Acoustic Data

Version	SonoBat 30.2.20250526
Batch File Scrubber settings	Thorough: more carefully scans
	Autofilter
	(High Grade) accepts only files with strong, clear calls and rejects more noise
	If stereo, scan right channel
Classifier	Northeastern NA-northeastern US-[c20250502]
Acceptable call quality	0.60
Sequence decision threshold	0.90
Max # of calls to consider per file	32
Filter	Autofilter

Manual Review of Acoustic Data

Manual vetting of the acoustic data by a qualified bat biologist (Dr. Samuel Freeze & Drew Powell, ICF) was conducted to assess if a recorded bat pass was suitable to use for species-level identification and if so, confirm or change the species identification as needed. Manual review started by examining any pass identified by SonoBat as a northern long-eared bat, Indiana bat, tricolored bat, or ambiguous Indiana bat/little brown bat pass (LUSO category) in the species accepted column using SonoBat 30. The USFWS protocol states that if presence is not established from the species accepted column, then any leaning species identifications should be examined[2]. Due to the low overall number (n = 44) of passes identified as a listed or candidate species in either the species accepted or the leaning species decision columns, all passes were manually reviewed for this project.

RESULTS

Weather Conditions

Weather conditions were within acceptable limits based on USFWS guidelines for all three survey nights: temperatures remained above 50° F throughout the survey, precipitation did not exceed 30 minutes or continue intermittently during the survey, and there were no sustained winds greater the nine miles per hour (mph) for 30 minutes or more during the survey.

Acoustic Detector Placement

Acoustic detectors were placed by Drew Powell, Samuel Freeze, and Melyssa Garcia on July 21, 2025, and all but detector D2 were retrieved on July 24, 2023. A detector malfunction occurred at site D2 during the original survey period (July 21 – July 23); therefore, another detector was deployed at the same location from July 24 through July 26, 2025, to account for the missing data. Detectors were programmed to begin recording approximately 30 minutes before sunset and cease 30 minutes after sunrise. Examination of the log files indicate the detectors ran as programmed for all valid survey nights. Log files are provided electronically as Appendix C.

Software Analysis of Acoustic Data

Of the 15,437 files recorded during the survey, 5,354 files had tonal features consistent with bat echolocation calls and passed the SonoBat noise filter. Finally, 3,419 files were identified to the species accepted level by SonoBat's automatic classifier. SonoBat identified two passes as northern long-eared bats at site D2 and three passes at site D3. SonoBat identified two passes as tri-colored bats at site D1 and one pass at site D5. Table 4 provides a detailed summary of species identifications by site and night. As stated above under *Software Analysis of Acoustic Data*, Rafinesque's big-eared bat was excluded from the results since it does not occur in the Project Area. No passes were identified by the software as Rafinesque's big-eared bat. The full software output is provided electronically upon request as Appendix C.

Maximum Likelihood Estimator Results

Maximum likelihood analysis in SonoBat identified significant (p-value < 0.05) nightly p-values for big brown (all sites, all nights), eastern red (all sites, all nights except Jul. 25 at D2), and the hoary bat (D4, Jul. 21; D5, Jul. 21 and Jul. 22). The nightly MLE p-values generated from the automated identification software can be found in Table 5. Note that MLE p-values do not apply for determining presence or probable absence of listed bat species and is provided only for reference purposes.

Manual Review

There were eight passes identified as a listed or candidate species in the species accepted column and an additional 17 passes that received a leaning species decision. After manual review, one federally endangered northern long-eared bat pass was confirmed at site D3 on July 22. Additionally, one federal proposed endangered tricolored bat pass was confirmed at site D5 on July 22. Manual review results by site and night are displayed in Table 6.

The manually confirmed northern long-eared bat pass at site D3 contained search phase pulses with approximately 9–10 pulses per second and a large bandwidth of approximately 70–74 kHz. The pulses had “tails” leading off the end of the pulses which is indicative of a *Myotis* species. The pass was converted to zero-crossing format, and the slope was examined in AnalookW with a noise filter applied. The minimum slope across the call sequence was ≥200 octaves per second, which is indicative of a northern long-eared bat when a pass is search phase and recorded in a relatively

uncluttered habitat. Evidence suggests that a northern long-eared bat ID is warranted. Additionally, the surrounding habitat at site D3 makes sense for a northern long-eared bat as it consists of a forest interior stream corridor.

The manually confirmed tricolored bat pass at site D5 appeared to be a flyby of the bat detector with search phase pulses followed by approach/inspection pulses, some of which were oversaturated leading to aliasing. Site D5 was a small open field surrounded by forest on three sides and a vegetation buffer between the Project Area and an adjacent property with no clutter near the microphone. While tricolored bats more frequently forage along riparian corridors, they will also forage along forest–field edges like site D5. The minimum frequency of pulses was ≥40 kHz and was consistent (i.e. no bounce) across the call sequence. Pulse shapes and characteristics were consistent with tricolored bat voucher calls that were compared to the recorded pass. The recorded pass was not ideal due to the approach/inspection pulses and some aliasing; however, enough evidence supports not removing the software indicated tricolored bat ID.

SUMMARY

ICF completed a presence/absence acoustic survey in accordance with the 2024 USFWS Summer Survey Guidelines for the Phase 3 Obstruction Removal Project at the Trenton-Mercer Airport in Mercer County, NJ. Coordination with the USFWS NJFO resulted in an approved study plan on July 11, 2025. ICF surveyed five acoustic detector sites each for three calendar nights from July 21 to July 26, 2025, for a total of 15 detector nights, exceeding the required minimum effort. All valid survey nights met weather and placement requirements.

A total of 3,419 files were identified to the species accepted level by SonoBat. Eight of the 11 bat species with potential to occur within the Trenton-Mercer Airport project boundary were detected by the SonoBat automatic classifier. Of these identifications, five calls from northern long-eared bats and three calls from tri-colored bats were identified by the SonoBat classifier. Manual vetting of passes confirmed the presence of one northern long-eared bat pass and one tri-colored bat pass. Software outputs were provided electronically to DRG. Raw acoustic data will be maintained by ICF for a period of three years post survey completion and is available upon request.

ICF appreciates the opportunity to provide this report for summer acoustic bat detector surveys for the Trenton-Mercer Airport Obstruction Removal Project located in Mercer County, New Jersey. Should you have any questions or concerns, please contact Drew Powell at drew.powell@icf.com.

Sincerely,

Drew Powell

Re: Flood Hazard Area Verification Approval
File No.: 1102-12-0002.5 LUP 200001
Block(s) & Lot(s): Block No. 373 and Lot Nos. 9, 9.01
Township: Ewing; County: Mercer

Dear Mr. Macholdt,:

This letter is in response to your request for a flood hazard area verification along a tributary to the West Branch Shabakunk Creek at the above-referenced site. The Department has reviewed your application and hereby verifies the flood hazard area elevation and riparian zone limits on this site, as depicted on the approved plans described below.

The flood hazard area was established using Method 5 (Approximate Method) as described at N.J.A.C. 7:13-3.5. The flood hazard area design flood elevation is a depth of 6 feet above the stream's invert.

The riparian zone extends 50 feet from the stream's top of bank along both sides of each regulated water on this site. If a discernible bank is not present along a regulated water, the riparian zone is measured in accordance with the definition of the top of bank at N.J.A.C. 7:13-1.2.

Please note that altering land cover or topography in a flood hazard area, as well as clearing, cutting and/or removing vegetation within a riparian zone, is regulated by the Flood Hazard Area Control Act rules, and may be prohibited or restricted in some cases. A flood

hazard area permit is required prior to undertaking any regulated activity within a flood hazard area or riparian zone described at N.J.A.C. 7:13-2.4. Some projects may qualify for a permit-by-rule at N.J.A.C. 7:13-7, a general permit by certification at N.J.A.C. 7:13-8, a general permit at N.J.A.C. 7:13-9, or an individual permit at N.J.A.C. 7:13-10. Projects situated entirely outside both the flood hazard area and riparian zone do not require a flood hazard area approval.

This verification is based on the best information presently available to the Department, and is subject to change if this information is no longer accurate or if additional information is made available to the Department including, but not limited to, information supplied by the applicant.

The drawings hereby approved are two (2) drawings prepared by Van Cleef Engineering Associates, LLC., dated November 15, 2019, last revised March 18, 2020, entitled:

"TRENTON-MERCER AIRPORT BLOCK 373, PART OF LOT 9 AND 9.01 SITUATED IN EWING TOWNSHIP, MERCER COUNTY, NEW JERSEY"

"FLOOD HAZARD AREA DELINEATION MAP", Sheet No. 1 of 2

"STREAM PPROFILE AND SECTIONS", Sheet No. 2 of 2

Within 90 calendar days of the date of this letter, the applicant shall submit the following information to the clerk of each county in which the site is located, and shall send proof to the Department that this information is recorded on the deed of each lot referenced in the verification:

1. The Department file number for the verification;
2. The approval and expiration dates of the verification;
3. A metes and bounds description of any flood hazard area limit approved under the verification;
4. The flood hazard area design flood elevation, or range of elevations if variable, approved under the verification; and
5. The following statement: "The State of New Jersey has determined that all or a portion of this lot lies in a flood hazard area. Certain activities in flood hazard areas are regulated by the New Jersey Department of Environmental Protection and some activities may be prohibited on this site or may first require a permit. Contact the Division of Land Use Regulation at (609) 777-0454 for more information prior to any construction onsite."

Failure to have this information recorded in the deed of each lot and/or to submit proof of recording to the Department constitutes a violation of the Flood Hazard Area Control Act rules and may result in suspension or termination of the verification and/or subject the applicant to enforcement action pursuant to N.J.A.C. 7:13-24.

A copy of this plan, together with the information upon which this boundary determination is based, has been made part of the Division's public records. Please note that this letter in no way legalizes any fill that may have been previously placed onsite, or any other regulated activities that may have previously occurred. Also this determination does not affect the applicant's responsibility to obtain any local, State or Federal permits that may be required, such as local building permits or freshwater wetlands approvals.

This verification is valid for five years from its issuance date and it can be transferred at the time of sale of a property to which the verification applies to a new owner pursuant to N.J.A.C. 7:13-22.4. Pursuant to N.J.A.C. 7:13-5.4(a), if the Department issues a verification for a site, and within five years issues a general permit authorization or an individual permit for a regulated activity that references or relies upon the verification at that site, the Department shall automatically reissue the verification upon approval of the permit or authorization so that the verification and permit or authorization have the same expiration date. This automatic reissuance shall occur only once per verification and there is no fee for this reissuance. The reissued verification shall reflect any alterations to the flood hazard area design flood elevation, flood hazard area limit and/or floodway limit that will result from the regulated activities authorized under the individual permit or general permit authorization. All pre-construction and post-construction elevations and limits shall be demarcated on drawings approved under the reissued verification.

In accordance with N.J.A.C. 7:13-23.1, any person who is aggrieved by this decision may request a hearing within 30 days after notice of the decision is published in the DEP Bulletin by writing to: New Jersey Department of Environmental Protection, Office of Legal Affairs, Attention: Adjudicatory Hearing Requests, Mail Code 401-04L, PO Box 402, 401 East State Street, 7th Floor, Trenton, NJ 08625-0402. This request shall include a completed copy of the Administrative Hearing Request Checklist. The DEP Bulletin is available through the Department's website at http://www.nj.gov/dep/ and the Checklist is available through the Division's website at http://www.nj.gov/dep/landuse/forms.html.

Please contact me at dennis.contois@dep.nj.gov or by telephone at (609) 633-6563 should you have any questions regarding this letter. Be sure to indicate the Division's file number in all communication.

Sincerely,

Dennis Contois

Re: **Wetland Investigation Technical Memorandum**
Replacement Airport Traffic Control Tower
Trenton-Mercer Airport
Township of Ewing, Mercer County, New Jersey
DY653.07-TTN-DOC_ATCT
DRGNJ Project #4877

On June 1, 2023, Davey Resource Group, Inc. "DRG" staff biologist Elizabeth Dancer, PWS, conducted a wetland and State open water delineation in support of the proposed Replacement Air Traffic Control Tower (ATCT) Project at Trenton-Mercer Airport (TTN) in Ewing Township, Mercer County, New Jersey. TTN is proposing to demolish and remove the existing ATCT, located within the infield west of Runway 16-34 and north of Runway 6-24, and construct a new replacement ATCT on a portion of the former site of the Army National Guard hangar complex. The new ATCT facility will include site improvements such as an access road, parking, utilities, and landscaping. The wetland investigation was focused on the project limit of disturbance (LOD), as well as all areas within 50 feet of the LOD (collectively, the "Study Area"). Vegetation, soils, and hydrology were examined throughout the Study Area for evidence of wetland characteristics in accordance with the methodologies outlined in the *Federal Manual for Identifying and Delineating Jurisdictional Wetlands* (FICWD 1989), as required by the New Jersey Department of Environmental Protection (NJDEP) under the NJ *Freshwater Wetlands Protection Act* (FWPA) Rules (N.J.A.C. 7:7A et seq.).

Existing published information was studied to determine the approximate extent of wetlands and State open waters within the Study Area, including high-resolution aerial photography (NJOIT 2021), the Soil Survey Geographic Database (SSURGO) for Mercer County (USDA 2020), detailed topographic mapping (USGS 2023), and NJDEP wetlands and streams mapping (NJDEP 1999; 2020). DRG also referenced information obtained from previous investigations performed in support of the Proposed Aircraft Rescue and Firefighting Station (ARFF) Project, for which there is a valid, existing NJDEP Letter of Interpretation (LOI; NJDEP File #1102-12-0002.5 FWW 190001, issued September 18, 2020). DRG also conducted a brief reassessment of the adjacent ARFF Study Area to confirm that existing conditions were consistent with those verified in the existing LOI.

The topography throughout the Study Area is generally flat to gently sloping to the east, with manufactured berms occurring around the existing ATCT tower. Onsite elevations range from approximately 160 to 200 feet above sea level.

The SSURGO for Mercer County, New Jersey indicates three soil mapping units within the Study Area. Soil mapping units occurring within the Study Area are described below:

- *Udorthents, bedrock substratum, 0 to 8 percent slopes (UdbB)* – This soil unit is associated with low hills and is derived from loamy lateral spread deposits. It is moderately well drained and is listed as containing hydric inclusions. The northwestern portions of the Study area, including the existing ATCT tower, occur within this soil unit.
- *Quakertown silt loam, 2 to 6 percent slopes (QukB)* – This soil unit is associated with hills and is derived from fine-grained fine-loamy residuum weathered from sandstone and siltstone. It is well drained and is not listed as a hydric soil. The southeastern portions of the Study Area, including the former Army National Guard facility, are mapped within this soil unit.
- *Chalfont silt loam, 2 to 6 percent slopes (ChcB)* – This soil unit is associated with flats and is derived from silty noncalcareous loess over residuum weathered from sandstone and shale. It is somewhat poorly drained and is listed as containing hydric inclusions. This soil unit overlaps the southeastern limits of the Study Area.

Existing vegetative communities within the Study Area consist predominantly of mowed/maintained fields adjacent to taxiways, runways, and the Army National Guard Aviation facility. Most of these fields are maintained at heights of two to six inches, though areas containing buried utility lines contain grasses and forbs at heights of 12 to 18 inches. Plant species observed in these communities were typical of maintained, upland fields and included various cool season grasses (*Poa* and *Festuca* spp.), common dandelion (*Taraxacum officinale*), English plantain (*Plantago lanceolata*), tall buttercup (*Ranunculus acris*), meadow hawkweed (*Hieracium caespitosum*), ox-eye daisy (*Leucanthemum vulgare*), and common sheep sorrel (*Rumex acetosella*).

Wooded habitat is limited to the southeast end of the Study Area along Upper Ferry Road, which consists of secondary successional, deciduous, upland communities. The canopy contains black walnut (*Juglans nigra*), black locust (*Robinia pseudoacacia*), American elm (*Ulmus americana*), green ash (*Fraxinus pennsylvanica*), red maple (*Acer rubrum*), and tree-of-heaven (*Ailanthus altissima*); a sapling/shrub understory of these same species, as well as eastern red cedar (*Juniperus virginiana*), rambler rose (*Rosa multiflora*), northern spicebush (*Lindera benzoin*), black raspberry (*Rubus occidentalis*), and wine raspberry (*Rubus phoenicolasius*); a herbaceous understory of garlic-mustard (*Alliaria petiolata*), orange day-lily (*Hemerocallis fulva*), and various types of grass; and a dense, woody vine stratum of Japanese honeysuckle (*Lonicera japonica*), fox grape (*Vitis labrusca*), and Asian bittersweet (*Celastrus orbiculatus*). The proposed project limit of disturbance does not encroach upon this habitat.

No wetlands or State open waters were identified on the available NJDEP wetlands and stream mapping reviewed prior to the onsite investigation. No jurisdictional wetlands or State open waters were identified within the ATCT Study Area during the wetland investigation conducted by DRG. The West Branch Shabakunk Creek was observed within the secondary successional, wooded habitat adjacent to and to the east of the Study Area. This feature crosses beneath Upper Ferry Road before continuing southeast beneath the existing railroad. Wetlands and State open waters associated with this tributary, located northwest of Upper Ferry Road, were previously investigated, delineated, and verified under the existing LOI; however, no impacts to the stream,

freshwater wetlands, or associated wetland transition area will occur as a result of the proposed project. Lastly, an additional intermittent stream was also observed draining from a culvert at the intersection of Scotch Road and Upper Ferry Road, which drains into the West Branch Shabakunk Creek immediately upstream of the railroad. This intermittent stream and its associated palustrine scrub-shrub/emergent wetland fringes were initially delineated during DRG's field investigation; however, it was subsequently determined that these features will occur outside of the project's limit of disturbance.

CONCLUSIONS

The NJDEP regulates activities in freshwater wetlands, wetland transition areas, and State open waters under the NJ FWPA Rules at N.J.A.C. 7:7A et seq. Wetlands receive one of three resource value classifications: Ordinary resource value, intermediate resource value, and exceptional resource value. Ordinary resource value wetlands include ditches, swales, detention basins, and certain isolated wetlands. Ordinary resource value wetlands are not subject to standard transition areas. Wetlands that discharge to Freshwater (FW) 1 or 2 Trout-Production (TP) waters, or those which are documented habitat for endangered or threatened species, are classified as exceptional resource value and are subject to a 150-foot transition area. All other wetlands are classified as intermediate resource value and subject to a 50-foot transition area.

Resource value classifications and boundaries of delineated wetlands are subject to review and verification by the NJDEP. These are formally established when the NJDEP issues a Letter of Interpretation (LOI) for a site. A LOI is obtained by applying to the NJDEP Division of Land Resource Protection (DLRP) in accordance with the requirements at N.J.A.C. 7:7A-4. An application for a LOI was prepared and submitted to the NJDEP DRLP for the TTN Airfield Rescue and Firefighting Station (ARFF) Study Area, which occurs immediately adjacent to the ATCT study area, to verify the limits and resource value classifications of the freshwater wetlands previously delineated by DRG. The LOI for the ARFF Study Area was issued by the NJDEP DRLP on September 18, 2020 (NJDEP File #1102-12-0002.5 FWW190001). The LOI verified the limits and resource value classifications of the delineated wetlands and State open waters. Specifically, wetlands (Wetlands "HH" and "II") associated with an unnamed tributary to West Branch Shabakunk Creek are classified as Intermediate Resource Value with a standard 50-foot wetland transition area. State open waters associated with the unnamed tributary are not subject to wetland transition areas. The proposed ATCT project is located outside the limits of Wetlands HH and II, as well as their associated wetland transition areas. The above referenced LOI remains valid for five years from the date of issuance and can be extended for an additional five years in accordance with N.J.A.C. 7:7A-16.6.

The NJDEP also regulates certain activities in regulated waters, flood hazard areas, and riparian zones pursuant to NJ Flood Hazard Area Control Act (FHACA) Rules at N.J.A.C. 7:13 et seq. The NJDEP will issue an FHA Verification for an entire site or a portion of a site, which provides a formal determination of one or more of the following: the FHA design flood elevation, FHA limit, floodway limit, and/or riparian zone limit.

A request for an FHA Verification (NJDEP File No. 1102-12-0002.5 LUP 200001) was previously prepared and submitted to the NJDEP to verify the FHA limit, the riparian zone limit, and FHA design flood elevation for the ARFF study area, located east of the ATCT Study Area. Impacts to the NJDEP regulated FHA and riparian zone are not anticipated and a FHA permit is not expected to be required; however, the existing NJDEP FHA Verification will need to be reauthorized to comply with the revised NJDEP FHACA Rules, which became effective July 17, 2023. The amended FHACA Rules require the use of future projected precipitation when calculating flood elevations (NJDEP 2023). Use of this new methodology may change the regulated FHA limits

and flood hazard area design flood elevations. The limits of the riparian zone, which fall entirely outside the Study Area limits, are not expected to change due to the amended FHACA Rules.

The results and findings of this investigation represent the best professional judgment of DRG and are based upon observed field conditions and review of existing, published information, as well as currently existing regulations.

SEP 1 8 2020

RE: Letter of Interpretation: Line Verification-Portion of a Site
File No.: 1102-12-0002.5
Activity Number: FWW190001
Applicant: Mercer County Airport
Block(s): 373; Lot(s): 9 & 9.01
Ewing Township, Mercer County
Sub-watershed: Shabakunk Creek WB
Watershed: Assunpink Creek

Dear Ms. Montgomery:

This letter is in response to your request for a Letter of Interpretation to have Division of Land Use Regulation (Division) staff verify the boundary of the freshwater wetlands and/or State open waters **on a portion** of the referenced property and not the entire block and lot.

In accordance with agreements between the State of New Jersey Department of Environmental Protection, the U.S. Army Corps of Engineers Philadelphia and New York Districts, and the U.S. Environmental Protection Agency, the NJDEP, the Division is the lead agency for establishing the extent of State and Federally regulated wetlands and waters. The USEPA and/or USACE retain the right to reevaluate and modify the jurisdictional determination at any time should the information prove to be incomplete or inaccurate.

Based upon the information submitted, and upon a site inspection conducted by Division staff on March 12, 2020, the Division has determined that the wetlands and waters boundary line(s) as shown on the plan map entitled: "**WETLANDS DELINEATION PLAN FOR TRENTON-MERCER AIRPORT BLOCK 373 PART OF LOT 9 AND LOT 9.01 SITUATED IN EWING TOWNSHIP, MERCER COUNTY, NEW JERSEY**", consisting of two sheets, dated November 25, 2019, unrevised, and prepared by Christopher A. Melick, P.L.S., of Van Cleef Engineering Associates, is accurate as shown.

Wetlands Resource Value Classification ("RVC")

In addition, the Division has determined that the resource value and the standard transition area or buffer required adjacent to the delineated wetlands are as follows:

Intermediate: All remaining freshwater wetlands shown. [50 foot wetland buffer]

Ordinary: XX-1 through XX-5; YY-1 through YY-4. [No wetland buffer]

State open water: Within wetlands and as shown on the referenced plan. [No wetland buffer]

In addition, the Department has determined that the following wetland points are isolated and not part of a surface water tributary system: XX-1 through XX-5 and YY-1 through YY-4. RVC may affect requirements for wetland and/or transition area permitting. This classification may affect the requirements for an Individual Wetlands Permit (see N.J.A.C. 7:7A-9 and 10), the types of Statewide General Permits available for the property (see N.J.A.C. 7:7A-5 and 7) and any modification available through a transition area waiver (see N.J.A.C. 7:7A-8). Please refer to the Freshwater Wetlands Protection Act (N.J.S.A. 13:9B-1 et seq.) and implementing rules for additional information.

Wetlands resource value classification is based on the best information available to the Department. The classification is subject to reevaluation at any time if additional or updated information is made available, including, but not limited to, information supplied by the applicant.

General Information

Pursuant to the Freshwater Wetlands Protection Act Rules, you are entitled to rely upon this jurisdictional determination for a period of five years from the date of this letter unless it is determined that the letter is based on inaccurate or incomplete information. Should additional information be disclosed or discovered, the Division reserves the right to void the original letter of interpretation and issue a revised letter of interpretation.

Regulated activities proposed within a wetland, wetland transition area or water area, as defined by N.J.A.C. 7:7A-2.2 and 2.3 of the Freshwater Wetlands Protection Act rules, require a permit from this office unless specifically exempted at N.J.A.C. 7:7A-2.4. The approved plan and supporting jurisdictional limit information are now part of the Division's public records.

Please be advised that any surface water features on the site or adjacent to the site may possess flood hazard areas and/or riparian zones and development within these areas may be subject to the Flood Hazard Area Control Act rules at N.J.A.C. 7:13. The Department can verify the extent of flood hazard areas and/or riparian zones through a flood hazard area verification under the application procedures set forth at N.J.A.C. 7:13-5.1.

This letter in no way legalizes any fill which may have been placed, or other regulated activities which may have occurred on-site. This determination of jurisdiction extent or presence does not make a finding that wetlands or water areas are "isolated" or part of a surface water tributary system unless specifically called out in this letter as such. Furthermore, obtaining this determination does not affect your responsibility to obtain any local, State, or Federal permits which may be required.

Recording

Within 90 calendar days of the date of this letter, the applicant shall submit the following information to the clerk of each county in which the site is located, and shall send proof to the Division that this information is recorded on the deed of each lot referenced in the letter of interpretation:

1. The Department file number for the letter of interpretation;

2. The approval and expiration date of the letter of interpretation;

3. A metes and bounds description of the wetland boundary approved under the letter of interpretation;

4. The width and location of any transition area approved under the letter of interpretation; and

5. The following statement: "The State of New Jersey has determined that all or a portion of this lot lies in a freshwater wetland and/or transition area. Certain activities in wetlands and transition areas are regulated by the New Jersey Department of Environmental Protection and some activities may be prohibited on this site or may first require a freshwater wetland permit. Contact the Division of Land Use Regulation at (609) 777-0454 or http://www.nj.gov/landuse for more information prior to any construction onsite."

Failure to have this information recorded in the deed of each lot and/or to submit proof of recording to the Division constitutes a violation of the Freshwater Wetlands Protection Act rules and may result in suspension or termination of the letter of interpretation and/or subject the applicant to enforcement action pursuant to N.J.A.C. 7:7A-22.

Appeal Process

In accordance with N.J.A.C. 7:7A-21, any person who is aggrieved by this decision may request a hearing within 30 days of the date the decision is published in the DEP Bulletin by writing to: New Jersey Department of Environmental Protection, Office of Legal Affairs, Attention: Adjudicatory Hearing Requests, Mail Code 401-04L, P.O. Box 402, 401 East State Street, 7th Floor, Trenton, NJ 08625-0402. This request must include a completed copy of the Administrative Hearing Request Checklist found at www.state.nj.us/dep/landuse/forms. Hearing requests received after 30 days of publication notice may be denied. The DEP Bulletin is available on the Department's website at www.state.nj.us/dep/bulletin. In addition to your hearing request, you may file a request with the Office of Dispute Resolution to engage in alternative dispute resolution. Please see the website www.nj.gov/dep/odr for more information on this process.

Please contact Maxwell Dolphin of our staff by e-mail at maxwell.dolphin@dep.nj.gov or by phone at (609) 777-0454 should you have any questions regarding this letter. Be sure to indicate the Department's file number in all communication.

Sincerely,

Christopher Squazzo, Environmental Specialist III
Division of Land Use Regulation

COUNTY EXECUTIVE AND CLERK TO THE BOARD AUTHORIZED TO EXECUTE A MEMORANDUM OF AGREEMENT BETWEEN THE DELAWARE AND RARITAN CANAL COMMISSION, AND THE COUNTY OF MERCER/TRENTON-MERCER AIRPORT REGARDING CERTAIN ACTIVITIES IN ORDER TO COMPLY WITH N.J.A.C. 7:45 ET. SEQ.

WHEREAS, the Delaware and Raritan Canal Commission (DRCC) is a duly authorized entity of the State of New Jersey under N.J.S.A. 13:13A-1 et. seq., and the Trenton-Mercer Airport (TTN) is located within the confines of a geographic area placing it under the jurisdiction of the DRCC, under N.J.A.C. 7:45 et. seq.; and,

WHEREAS, the DRCC is tasked with the regulation of stormwater and other activities impacting the Delaware and Raritan Canal, their tributaries, and the Delaware and Raritan Canal State Park; and,

WHEREAS, TTN must perform federally required safety and maintenance activities within DRCC regulated areas of the facility, and the DRCC has requested a Memorandum of Agreement (MOA) to be completed between the DRCC and TTN; and,

Clerk to the Board

WHEREAS, the attached MOA describes permitted activities, pertinent regulatory bodies, and the means by which to amend or terminate the MOA; now, therefore,

BE IT RESOLVED, that the County Executive and Clerk to the Board be and are hereby authorized to execute a Memorandum of Agreement between the Delaware and Raritan Canal Commission, located at Prallsville Mills, P.O. Box 539, 33 Risler Street, Stockton, NJ 08559, for the purpose aforesaid; and,

BE IT FURTHER RESOLVED, that the Clerk to the Board shall forward three (3) certified copies of this Resolution, along with three (3) fully executed Memorandums of Agreement, to the Office of the Airport Manager for further distribution to the DRCC and Omni Environmental, LLC, and a copy of each to the Director of the Mercer County Department of Transportation and Infrastructure.

I hereby certify this to be a true copy of the original.
Mercer County Board of Freeholders
Deputy
Clerk to the Board

2011-228

Memorandum of Agreement
between
County of Mercer/Trenton-Mercer Airport and Delaware and Raritan Canal Commission

I. Purpose

This Memorandum of Agreement (MOA) is between the County of Mercer/Trenton-Mercer Airport (COM/TTN), which owns certain real property designated as Lot(s) 1,5,6,7,8 Block(s) 373, on the tax map of Ewing Township in the County of Mercer, State of New Jersey (the facility); and the Delaware and Raritan Canal Commission (DRCC), a duly authorized entity of the government of the State of New Jersey, and its successors and assignees.

This MOA is designed to bring COM/TTN into compliance with N.J.A.C. 7:45 et seq., and to define and make all parties aware of the present regulated areas located at the facility, and the present development plans of the COM/TTN. COM/TTN will insure against any adverse impacts on the corridors shown and to otherwise comply with the DRCC's requirements. This MOA in no way diminishes any rights and powers of COM/TTN under N.J.A.C. 7:45 et seq.

II. Agreements

A. Both parties agree that:

1. Consistent with N.J.A.C. 7:45 et seq, attached Exhibit A is a map of the facility with the location of all DRCC Stream Corridors (corridors) depicted, as well as depictions of current and planned land use for the balance of the facility.

2. Permitted activities in regulated areas include any approved by the DRCC, as well as those pursuant to all pertinent Federal and State Statutes and Regulations, including those of the U.S. Federal Aviation Administration, the U.S. Transportation Security Administration, the U.S. Department of Agriculture, the U.S. Environmental Protection Agency, the New Jersey Department of Transportation, all Federal Grant Assurances, as well as all other regulatory agencies.

3. Permitted activities include general maintenance, tree removal and pruning, the control of grass and weeds, the culling of unwanted pests, and any other activity designed to maintain a safe, secure, and legally compliant airport facility.

4. Any need to modify the designated activities or areas beyond that agreed upon in this agreement, as identified in Exhibit A, will require DRCC approval and modification of this MOA, consistent with N.J.A.C. 7:45 et seq.

III. Effective Date and Duration

This agreement will take effect immediately upon the signature of duly authorized representatives of both parties. This agreement shall remain in effect unless amended by consent of both parties or otherwise terminated by either party, upon 60-days written notice.

HPO Project #25-0600-1, -2
HPO-B2025-160

February 19, 2025

Heather Davis-Jenkins
Environmental Protection Specialist
Federal Aviation Administration (FAA)
Via email: Heather.F.Davis-Jenkins@faa.gov

Dear Ms. Davis-Jenkins;

As Deputy State Historic Preservation Officer for New Jersey, in accordance with 36 CFR Part 800: Protection of Historic Properties, as published in the Federal Register on December 12, 2000 (65 FR 77725-77739) and amended on July 6, 2004 (69 FR 40553-40555), I am providing consultation comments on the following proposed undertaking:

Mercer County, Ewing Township
Air Traffic Control Tower Relocation Project
Trenton-Mercer Airport (TTN)
Federal Aviation Administration (FAA)

Summary: This **updated SHPO opinion** finds the **Aeronautical Turbine Laboratory Complex Historic District** no longer retains sufficient integrity to be eligible for listing in the New Jersey and National Registers of Historic Places. The proposed scope of work will have **no adverse effect** on the Delaware and Bound Brook (Reading) Railroad Historic District and the First Presbyterian Church and Cemetery of Ewing.

800.4 Identification of Historic Properties

Thank you for providing the Historic Preservation Office (HPO) the opportunity to review and comment on the following Phase IA archaeological survey and Intensive-Level historic architectural survey report, received at this office on January14, 2025, and the subsequent Phase IB archaeological report, received on February 18, 2024, for the above-referenced undertaking:

Dunkle, Lauren, *et al.*
2024 *Phase IA Historical and Archaeological Survey and Intensive-Level Historic Architectural Survey, Air Traffic Control Tower Relocation, Trenton-Mercer Airport, Ewing Township, Mercer County, New Jersey.* Prepared for DY Consultants, New York, NY. Prepared by Richard Grubb and Associates, Cranbury, NJ.

Gold, Theodore
2025 *Phase IB Archaeological Survey, Trenton-Mercer Airport Air Traffic Control Tower Relocation, Ewing Township, Mercer County, New Jersey.* Prepared for DY Consultants, New York, NY. Prepared by Richard Grubb and Associates, Cranbury, NJ.

According to the documentation submitted, this Phase IA/IB archaeological survey and Intensive-Level historic architectural survey was completed as part of Section 106 consultation with the Federal Aviation Administration (FAA) for the proposed relocation of the Air Traffic Control Tower (ATCT) at Trenton-Mercer Airport. This undertaking will involve the demolition of the existing ATCT, the construction of a new tower in a different location on the airport property, and various associated infrastructure/utility upgrades.

Archaeology

The above-referenced Phase IA archaeological investigation consisted of background research and site reconnaissance within the area of potential effects (APE) at Trenton-Mercer Airport. Based on the sensitivity assessment provided in the Phase IA analysis, the consultant recommended a Phase IB subsurface archaeological investigation within the areas in proximity to the West Branch Shabakunk Creek, in order to determine the presence of any archaeological sites within the APE.

The above-referenced Phase IB archaeological survey comprised the excavation of 45 shovel test pits (STPs) within the study area, resulting in the recovery of 10 historic/modern artifacts including metal, brick, glass, and ceramics. No Native American cultural materials were recovered from any tests. Consequently, the report states that no significant archaeological remains, features, or sites were identified as part of the Phase I investigation. Therefore, the consultant recommends that the undertaking is not likely to impact any archaeological historic properties, and no further archaeological survey is recommended. *Upon review, the HPO concurs with the assessments and recommendations made in the above-referenced reports.*

Historic Architecture

The above-referenced intensive-level architectural survey generally established the APE-architecture as a 1-mile buffer around the new tower location. Nineteen (19) properties were surveyed at the intensive level as it was determined that they had no current visibility to the existing ATCT, but there would be a visual effect after the construction of

the new ATCT. Additionally, three (3) properties within the APE that were previously determined to be eligible for listing in the New Jersey and National Registers of Historic Places were re-surveyed at the intensive level to determine if they still retained their integrity for listing.

The newly-identified nineteen (19) properties include the Trenton-Mercer Airport, eleven (11) houses built between the late nineteenth century and the early twentieth century, the Ewing Cemetery and Crematorium, Fisher Middle School, a mid-twentieth-century gas station, three (3) mid-twentieth-century industrial/commercial buildings, and an early 1970s shopping center. According to information in the report, none of these resources were determined to be eligible for listing in the New Jersey and National Registers of Historic Places. Additionally, of the properties that were previously determined to be eligible for listing in the New Jersey and National Registers of Historic Places, the consultant states that the Delaware and Bound Brook (Reading) Railroad Historic District (SHPO Opinion: 9/9/2005) and the First Presbyterian Church and Cemetery of Ewing (CoE: 9/9/2008) retain sufficient integrity to continue to be eligible for listing in the New Jersey and National Registers of Historic Places. *The HPO concurs with this assessment.*

As part of the above report, the consultant also re-surveyed the Aeronautical Turbine Laboratory Complex Historic District (SHPO Opinion: 3/28/1996) at the intensive-level. According to information in the report, demolition of buildings and structures within this district has been ongoing since 2020. As of August 2024, thirteen (13) buildings remained within the district, which is slightly more than half of the buildings present at the height of the complex's significance. It is the understanding of the HPO that demolition of the facility has continued since the completion of the survey, resulting in the demolition of the remaining structures. Taking this information into consideration, the consultant recommends that the Aeronautical Turbine Laboratory Complex Historic District no longer retains sufficient historic integrity to qualify for listing on the NRHP in the New Jersey and National Registers of Historic Places. *The HPO concurs with this assessment.*

Therefore, as Deputy State Historic Preservation Officer for the State of New Jersey, I find that the Aeronautical Turbine Laboratory Complex Historic District is **no longer eligible for listing in the New Jersey and National Registers of Historic Places**, due to its loss of integrity as a result of demolition. In consequence, this represents an **updated SHPO opinion.**

800.5 Assessment of Adverse Effect

In light of the above information, I find that the relocation of the ATCT at the Trenton-Mercer Airport is unlikely to impact extant historic and archaeological resources and will therefore result in **no adverse effect** to the Delaware and Bound Brook (Reading) Railroad Historic District and the First Presbyterian Church and Cemetery of Ewing. Consequently, pursuant to 36 CFR 800.4(d)(1), no further Section 106 consultation is required unless additional resources are discovered during project implementation pursuant to 36 CFR 800.13.

Additional Comments:

Thank you again for the opportunity to review and comment on the proposed undertakings. Please reference HPO project number **25-0600** in any future calls, emails, or written correspondence to help expedite your review and response. Please feel free to contact Lucy Bianchi of my staff at Lucy.Bianchi@dep.nj.gov with questions regarding archaeology or Christopher Romanoski (Christopher.Romanoski@dep.nj.gov) with questions regarding historic architecture.

Sincerely,

Katherine J. Marcopul
Deputy State Historic
Preservation Officer

Camp Hill, Pennsylvania 17011
Email: Heather.F.Davis-Jenkins@faa.gov

Reference: Trenton-Mercer Airport (TTN) Replacement Airport Traffic Control Tower and Airfield Lighting Vault, Ewing Township, Mercer County, New Jersey

The U.S. Fish and Wildlife Service (Service) has reviewed the above-referenced proposed project pursuant to the Endangered Species Act of 1973 (87 Stat. 884, as amended; 16 U.S.C. 1531 *et seq.*) (ESA) and the Migratory Bird Treaty Act of 1918 (40 Stat. 755, as amended; 16 U.S.C. 703-712 *et seq*.) (MBTA). The following comments do not address all Service concerns for fish and wildlife resources and do not preclude separate review and comment by the Service as afforded by other applicable environmental legislation.

Federally Listed Species

A known occurrence or potential habitat for the following federally listed threatened or endangered species is located in or near the project's action area. However, the Service concurs that the proposed project 'may affect but is not likely to adversely affect' these species for the reasons stated below.

Species	Basis for Determination
Indiana bat (*Myotis sodalis*, endangered) and northern long-eared bat (*Myotis septentrionalis*, endangered)	The project proposes to demolish an air traffic control tower (ATCT) and construct a replacement ATCT with associated communications equipment, antennae, lights, and an airport beacon. An access road, parking, utilities, and landscaping will also be developed for the new ATCT. Secondly, the project proposes to demolish and replace an airfield lighting vault building. The project is located approximately 4 miles from the nearest known occurrence of the northern long-eared bat (NLEB) and more than 10 miles from the nearest known occurrence of the Indiana bat (IBAT). The

	project site is located within 1000 feet of forested areas that may be suitable for roosting and/or foraging by either bat species. No trees will be cleared for the project. Therefore, the project will avoid direct impacts to roosting bats. The project includes artificial lighting. Due to project constraints (*e.g.*, safety and navigation needs), when installing new or replacing existing permanent lights, not all lights may be downward-facing, full cut-off lens lights. However, given the existing conditions of the airport and its surroundings, the project is not expected to meaningfully increase ambient light within the action area; potential adverse effects to NLEBs or IBATs from light pollution are expected to be insignificant.

Except for the above-mentioned species, no other federally listed threatened or endangered species under Service jurisdiction are known to occur within the proposed project's action area. Therefore, no further consultation pursuant to the ESA is required.

As provided in 50 CFR §402.16, reinitiation of consultation is required and shall be requested by the Federal action agency where discretionary Federal involvement or control over the action has been retained or is authorized by law and:

1. If new information reveals effects of the action that may affect listed species or critical habitat in a manner or to an extent not previously considered;
2. If the identified action is subsequently modified in a manner that causes an effect to the listed species or critical habitat that was not considered in this letter; or
3. If a new species is listed or critical habitat designated that may be affected by the identified action.

The monarch butterfly (*Danaus plexippus,* proposed threatened) and tricolored bat (*Perimyotis subflavus*, proposed endangered) may occur within the action area. This project is not likely to jeopardize the continued existence of these species; therefore, ESA Section 7(a)(4) conference is not required. Once a final rule to list the monarch butterfly or tricolored bat is published and goes into effect (typically 30–60 days after publication), Section 7(a)(2) requirements for consultation and Section 9 prohibitions against unpermitted 'take' of the species will apply. If the proposed project is not completed prior to the effective date of a final rule to list the monarch butterfly or tricolored bat, the action agency should assess the project's potential impacts to monarch butterflies or tricolored bats and reinitiate consultation with the Service if remaining project activities 'may affect' either species. For assistance, contact the New Jersey Field Office. Information on the monarch butterfly is available at *https://www.fws.gov/species/monarch-danaus-plexippus*. Information on the tricolored bat is available at *https://www.fws.gov/species/tricolored-bat-perimyotis-subflavus*.

The Service encourages adherence to best management practices for avoiding impacts to proposed species and improving habitat where possible. Please see the following for narratives and best practices for these species in New Jersey: *https://www.fws.gov/media/narratives-and-best-practices-federally-listed-proposed-and-candidate-species-new-jersey.*

Bird Conservation

Please be aware that the MBTA prohibits certain actions that result in the wounding, killing, trapping, capturing, or collecting of migratory birds and their nests or eggs, without prior authorization by the Service. For actions that are prohibited pursuant to the MBTA, please contact the Service's Migratory Bird Program for information on permitting (*https://www.fws.gov/program/migratory-bird-permit*).

The Service recommends considering general stressors that may impact birds, such as vegetation removal or alteration (including spread of invasive species), ground disturbance, structures (*e.g.,* window glass, tall features, overhead powerlines, entrapment hazards), lighting, noise, chemical hazards, features or activities that may promote free-ranging cat or predator populations, watercourse disturbances where birds may be present, and human presence. Migratory birds are protected year-round but are particularly vulnerable during their breeding season (March 15 to September 15 for many species). If impacts to suitable breeding habitat (*e.g.,* woody and herbaceous vegetation, bridges, etc.) are proposed, we recommend conducting field surveys of those areas no more than five days before project activities to locate any nests, eggs, and flightless birds. If breeding birds are present in your project's action area, the Service recommends postponing activities and/or implementing conservation measures that minimize disturbance. Year-round, if native migratory birds are present within active/proposed work areas, the Service recommends providing an opportunity for those birds to leave before work occurs.

Please refer to the Migratory Birds section of your IPaC Report for additional information on birds of conservation concern that may occur in the action area, including their breeding season dates and web links to help identify stressors and inform conservation measures.

Other Wildlife Resources

Please refer to this office's website at *https://www.fws.gov/office/new-jersey-ecological-services/* for the National Bald Eagle Management Guidelines and information from the New Jersey Natural Heritage and the Endangered and Nongame Species Programs regarding State-listed and other species of concern.
